These guidelines are intended to help bring the Brunswick brand to life. This document presents an overview of our brand framework, details our visual identity system framework, and guides use of the visual elements to produce clear, engaging touchpoints that ensure brand consistency across our communications.

1.0 — Brand Framework

Brand Driver — Innovation Untethered

Brunswick exists for

Transforming experiences on the water and beyond.

Brand Idea

Innovation Untethered

We believe

Our end-to-end control across the product and experience ecosystems puts us in position to change the game.

Unconstrained, courageous thinking and collaboration between diverse mindsets powers our innovations.

Our deep understanding of the consumer amplifies the experiences, technology and digital capabilities we create.

The rugged marine environment is the ultimate proving ground for the high-performance engineering we deliver.

Brand Attributes — Innovation Untethered

Our brand attributes represent our most distinctive traits. They fundamentally drive what we do, how we look, and how we speak. These strategic components are the blueprint we use to help us bring our brand to life.

Imaginative

We recognize and support everyone to play at the top of their creative game and dream big, regardless of their role here.

Collaborative

We reimagine the status quo; work with partners to embrace risk to test ideas, fail fast and push frontiers.

Passionate

We work to assess market positioning, staying nimble to identify.

Disciplined

We are keenly aware, in order to optimize our many partnerships and capabilities, that discipline and accountability is a requirement, not an option.

Resilient

We tap into our vast experience and knowledge to sustain ourselves and succeed even in the most adverse of times.

Messaging Platform – Innovation Untethered

Connective Pillar	Advancing Innovation Innovation is the heart of Brunswick. It allows us to challenge long held conventions and revolutionize experiences on the water and beyond. Innovation integrates, bringing together an easy, holistic experience for our users, as well as our partners and talent. Innovation is what drives Brunswick forward and what excites others to join us as we craft a better, more sustainable future.			
Pillars	Challenging Convention We are committed to reimagining the future and creating fresh, technology-driven solutions. Anticipating consumer needs positions us to change the game and elevate the industries we serve. We are passionate, ambitious, and inspired to win, but not afraid to fail.	Pursuing Excellence Driven and dedicated, we are committed to leading industries. Revolutionary technologies and consistently exceptional execution make Brunswick the most professional business partner, product and service provider and investment opportunity.	Driven By Human Experiences Combining engineering and technological expertise with robust consumer insights, allows Brunswick to craft harmonious solutions. We are customer-focused, blending the digital and physical for frictionless experiences.	Delivering on Synergies Brunswick prioritizes collaborative and dynamic relationships to support the business transformation we strive to deliver. Leveraging our scale and advanced capabilities, we offer engaging experiences to elevate communities, businesses and careers.
Core Principle	Championing Sustainability We recognize our role in connecting people to the world we share by creating experiences on the water and beyond. Our responsibility to a sustainable future extends far beyond the environments we serve. Sustainability is core to our way of business, driving our commitment to a healthy and happy work environment, our leading role in the democratization of boating, and improvements to our products across the full lifecycle. By making sustainability central to our enduring success, we hold ourselves to a higher standard.			

People Platform – Innovation Untethered

These attributes reflect the principles by which we, as a company, live. They inspire our people, establish a tone for our internal culture and guide our actions, decisions and behavior.

United

- Our businesses come together as a team and individuals see their impact across the enterprise
- We don't distance ourselves from difficult things, we work together to overcome challenges
- We collaborate with purpose and intention to drive cohesive growth
- We provide space to navigate your career in untraditional ways, explore your passions and create value on behalf of the enterprise
- Our diversity of brands and people are connected in a differentiated way and enable us to win in the market

Authentic

- We celebrate individuals and foster an environment in which they feel accepted, included and heard
- We come together with sincere care and respect for one another
- We show up with genuine confidence, not egos, and focus on doing the right thing
- We lead with empathy, warmth and compassion

Driven

- We challenge ourselves and persevere to win in everything we do
- We are action-oriented and share a collective desire to succeed
- Our agility, creativity and willingness to step into new spaces reflect our courageous mindset

Innovative

- We deliver distinctly better solutions by leveraging the deep expertise and diverse perspectives of our employees
- We go beyond ideation, working hard to deliver and delight our customers
- We are changing the future of our industries through technology and a practical, consumer-led approach
- We reach further and challenge convention to reimagine what could be

Exceptional

- We prioritize the safety of our employees and customers above all else
- We empower employees to deliver results and make an impact
- The quality of our products is reflected in how we work and our thoughtfully designed processes
- We understand the difference between excellence and perfection, producing results with openness to continuous improvement
- Trust and integrity anchor our decisions and actions - we do the right thing even when no one is looking

Tone of Voice — Attributes

Passionate

We let our enthusiasm and excitement for what lies ahead gleam brightly. This means we aren’t afraid to be bold and courageous with our words. It means we check our hesitations at the door and write with passion, drive and inspiration. At the same time, we want to be seen as grounded and thoughtful; never coming off as reckless.

Approachable

We demonstrate our willingness to be a good partner and supporter of leisure activities, both on and off the water, by using conversational, intuitive language and clearly structuring our content so it’s easy to understand and digest. This doesn’t mean we’re simplistic or minimal — we still speak with detail and precision.

Knowledgeable

We indicate our breadth of knowledge and information in the industry in everything we engage with — whether forging partnerships to maximize abilities and resources, or letting our investors know why a particular course of action will serve the company well now and in the future. But we don’t come off as know-it-alls — there’s always more to learn.

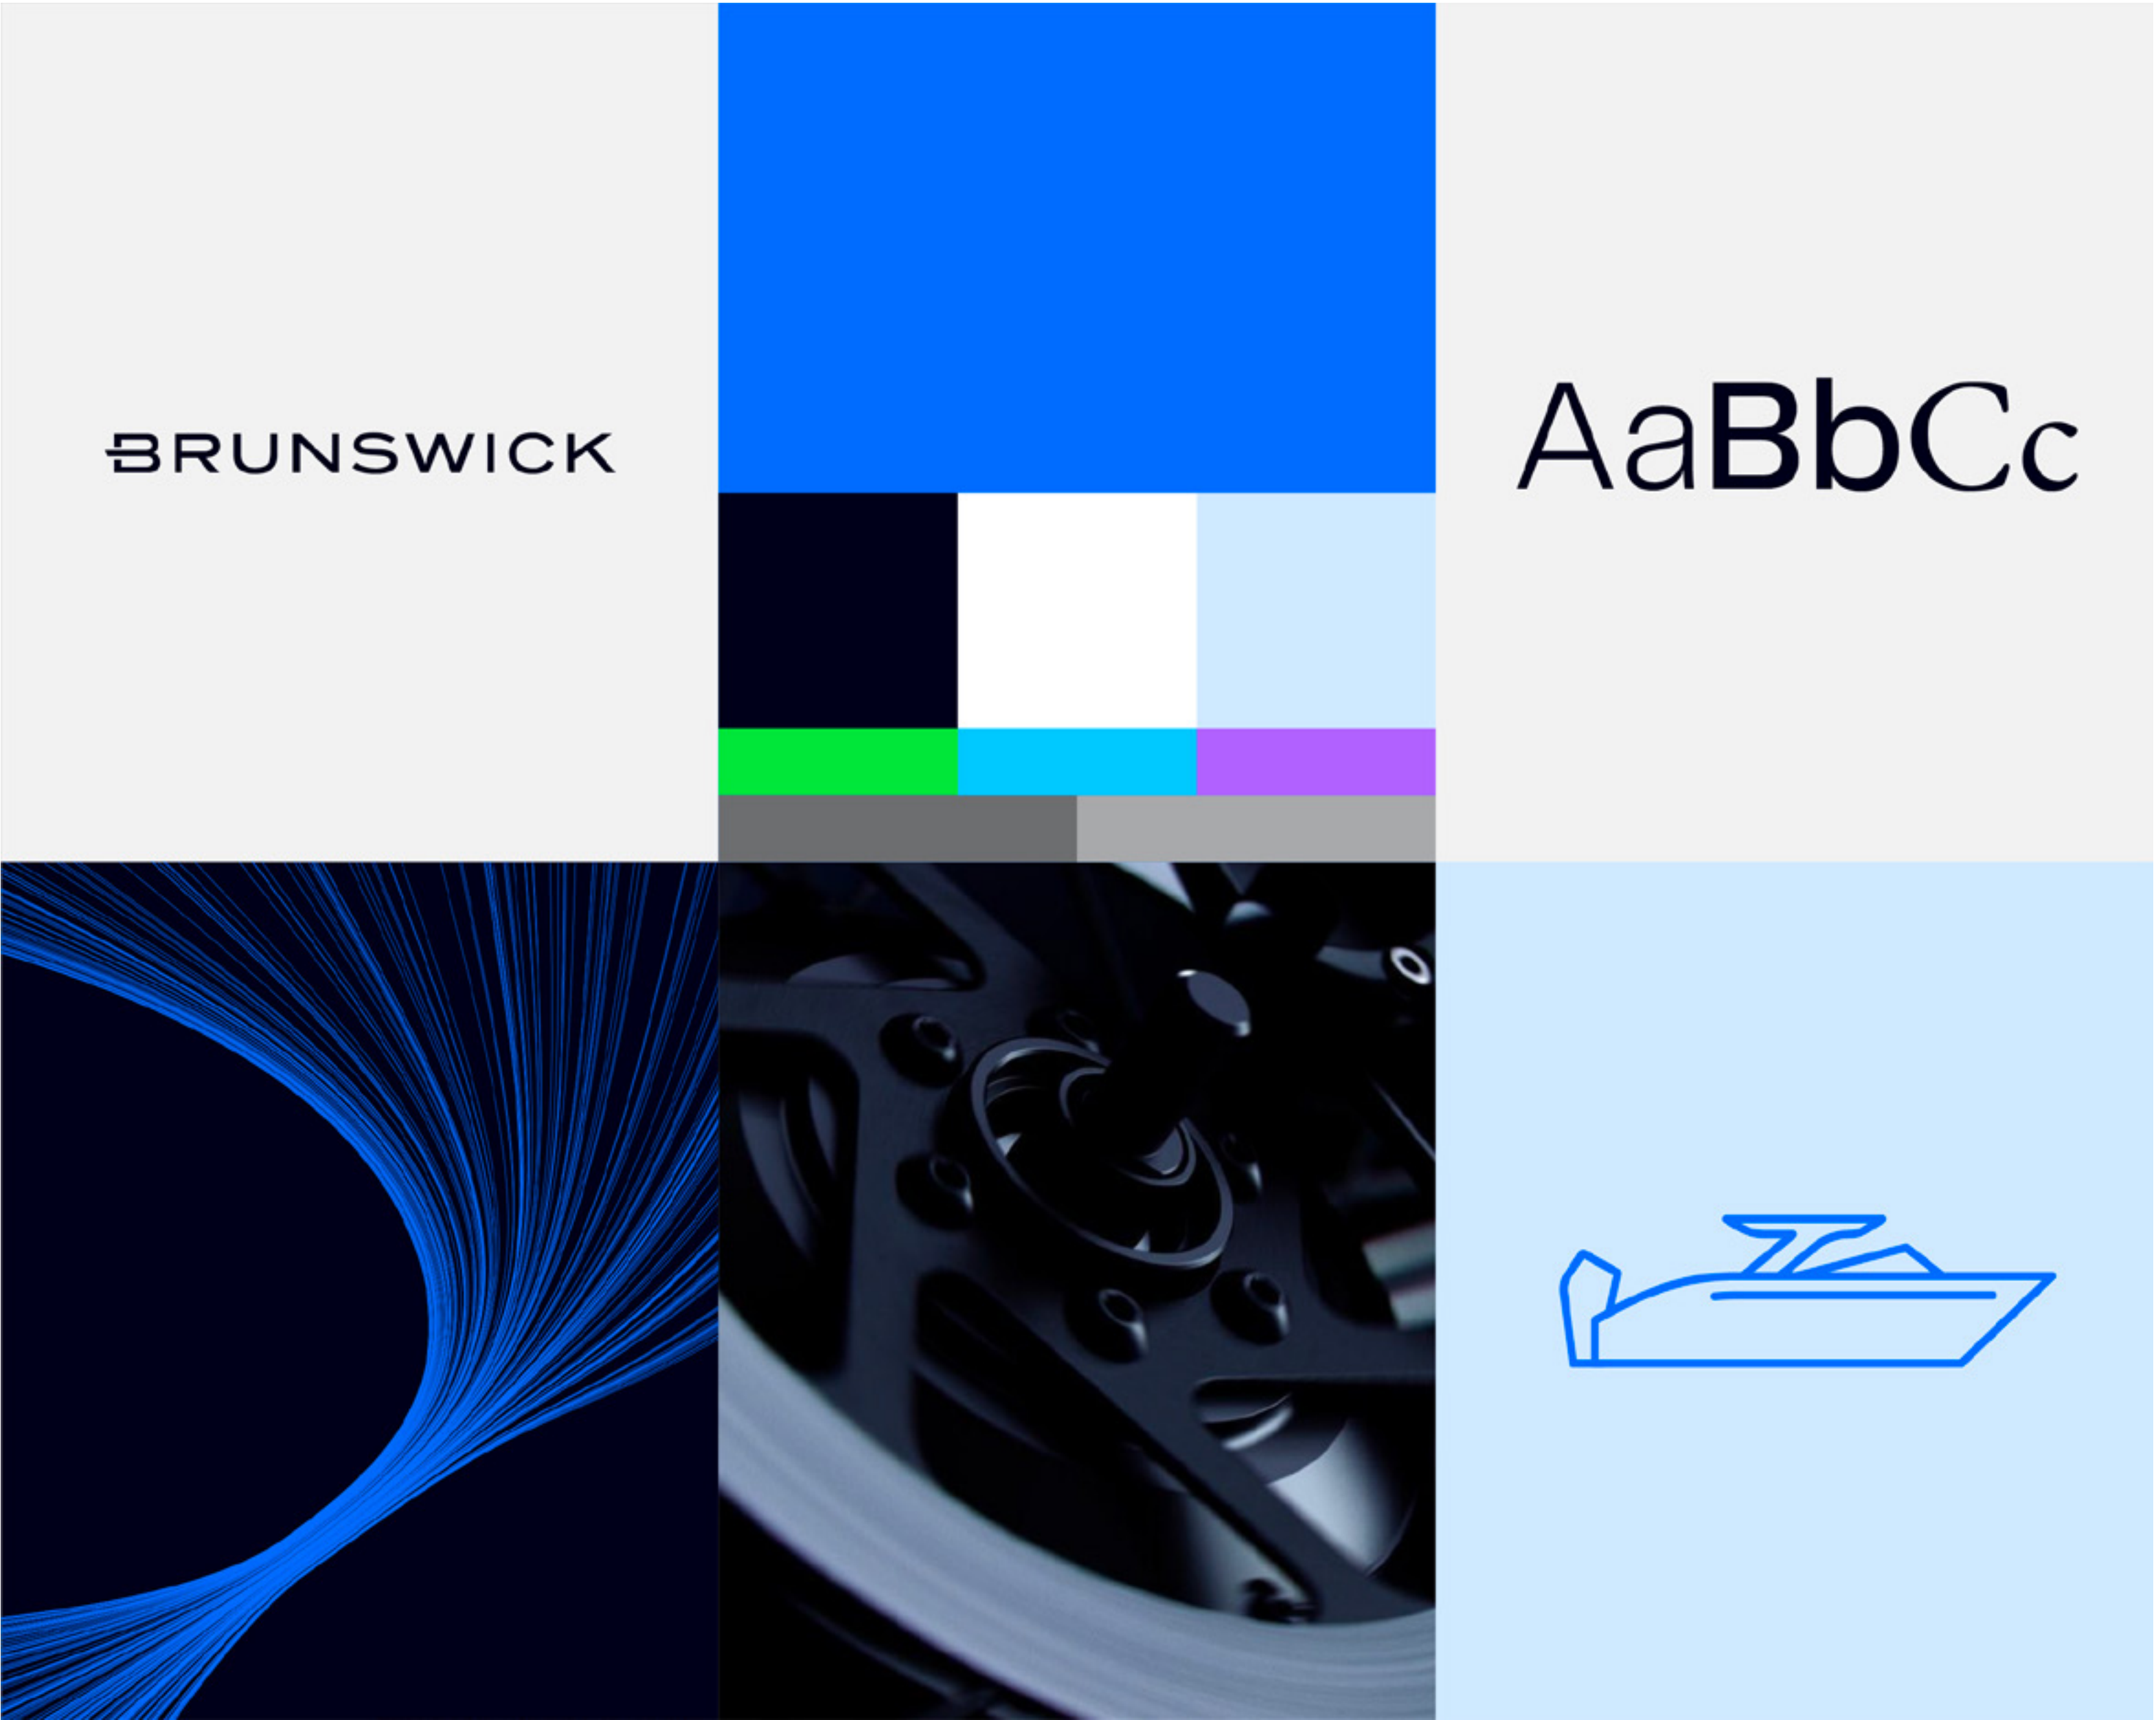

2.0 – Visual Identity

System Overview

Our visual identity toolkit is comprised of the primary components shown on this page. These elements are the building blocks of our visual system, designed to provide flexibility for our diverse branding needs, while creating a strong, cohesive look. When used together in a consistent and purposeful way, they help to create a strong and compelling brand.

- Logo System
- Color System
- Typography System
- Energy Current
- Iconography
- Grid and Composition

Note:
All photography contained in these guidelines is for reference only and may not be used outside of this document.

2.1— Logo System

Configurations

The Brunswick logo embodies the artistry that represents our brand and the emotional impact on those engaging with it.

Note:

The Brunswick logo is custom drawn. Do not recreate it or its elements. Always use the supplied artwork.

The image shows the Brunswick logo in white text on a dark blue background. The logo consists of a stylized 'B' followed by the word 'RUNSWICK' in a sans-serif font, with a trademark symbol (TM) at the end. The 'B' is unique, with a horizontal bar that has a small gap in the middle. The letters are evenly spaced and centered horizontally.

Configurations

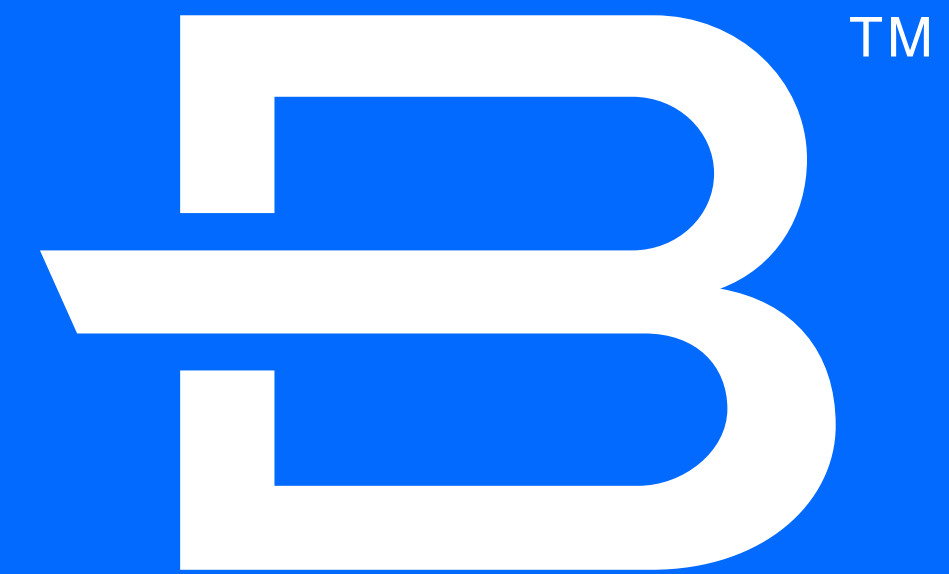

The typographic artwork has been thoughtfully crafted with a bespoke “B” form which also becomes the Brunswick symbol on its own.

The Brunswick B symbol must always appear with the Brunswick logo to satisfy trademark needs. The Brunswick B symbol can be used as an artistic element or to enhance the Brunswick branding as long as the full Brunswick logo appears in the same piece or space.

There is no required lockup of the logos together and they should not be used as a combined logo.

Note:

The Brunswick logo is custom drawn. Do not recreate it or its elements. Always use the supplied artwork.

Color Variations

Our logo and our symbol are available in these colors as shown on this page: Brunswick Blue, Brunswick Midnight, and White (reverse).

Note:
The Brunswick logo is custom drawn. Do not recreate it or its elements. Always use the supplied artwork.

Clear Space & Minimum Size

The Brunswick logo and symbol must appear clearly and legibly in all applications.

Clear Space

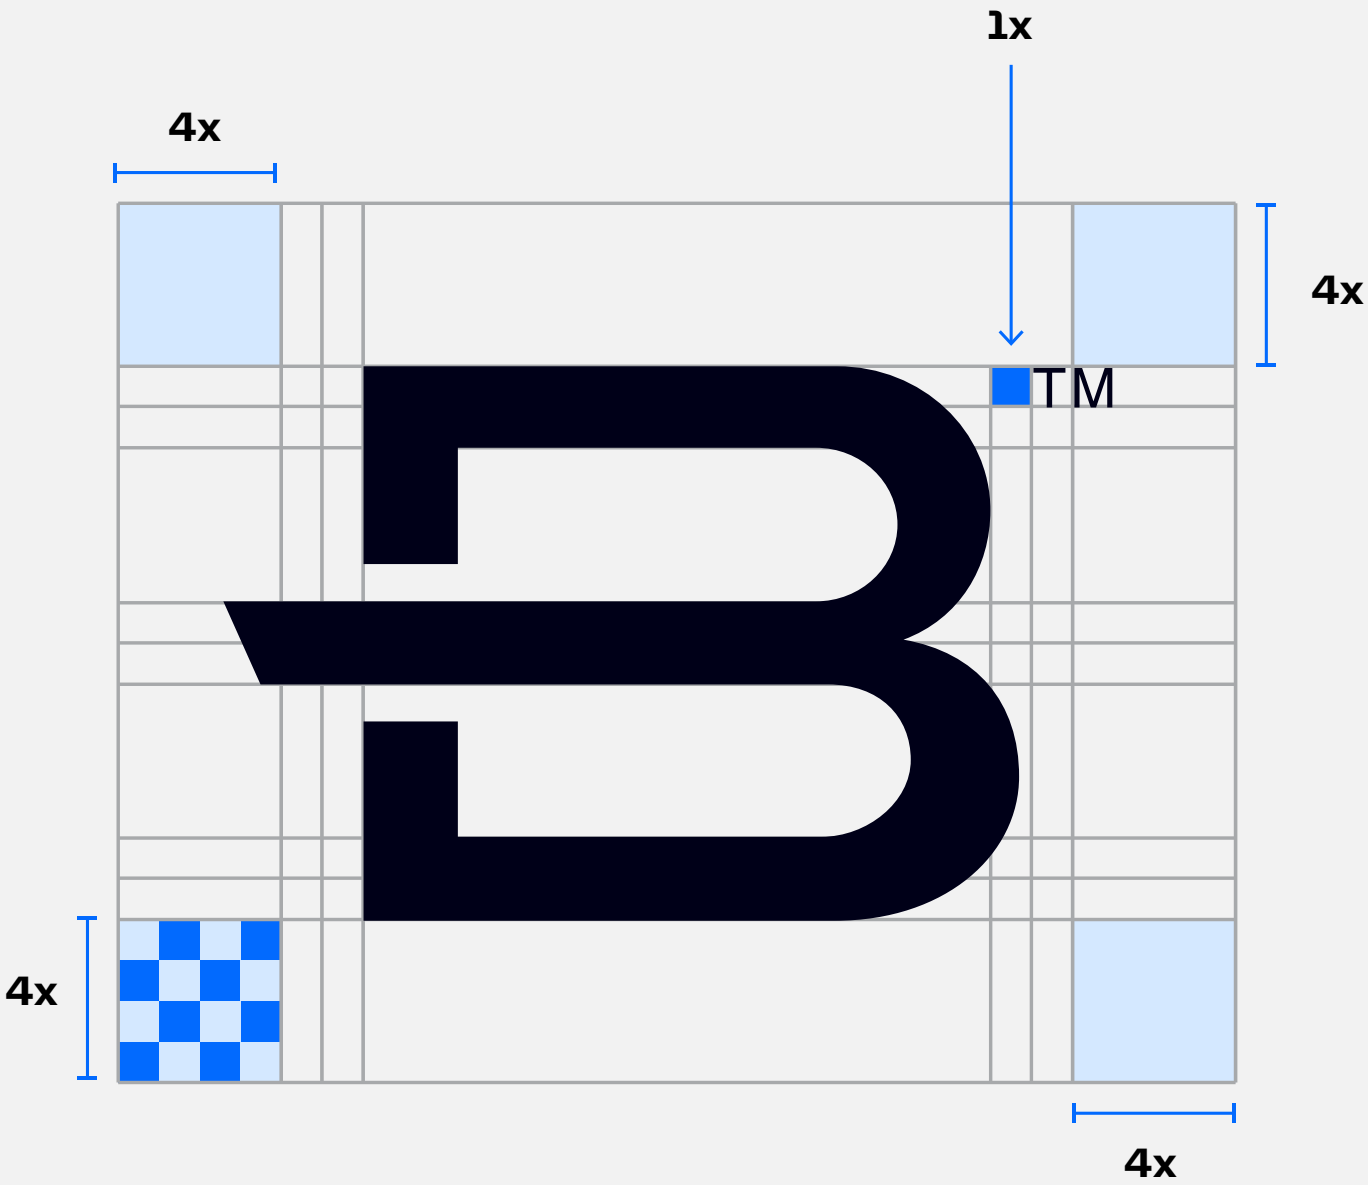

Clear space is the area surrounding the entire logo that must be kept free of any visual elements — text, graphics, borders, patterns, other logos, etc. When looking at the B on its own, the clear space is equal to X, where X is half of the width of the core form of the letter “B” in the logo or symbol, as shown on this page.

Minimum Size

The minimum size is determined by principles of legibility, rather than a spec. The logo mark and symbol should always be scaled large enough that the letters can be clearly discerned.

Note:

The Brunswick logo has been custom drawn. Do not recreate it or its elements. Always use the supplied artwork.

Clear Space & Minimum Size

The Brunswick logo and symbol must appear clearly and legibly in all applications.

Clear Space

Clear space is the area surrounding the entire logo that must be kept free of any visual elements — text, graphics, borders, patterns, other logos, etc. It is equal to X, where X is the width of the core form of the letter “B” in the logo or symbol, as shown on this page.

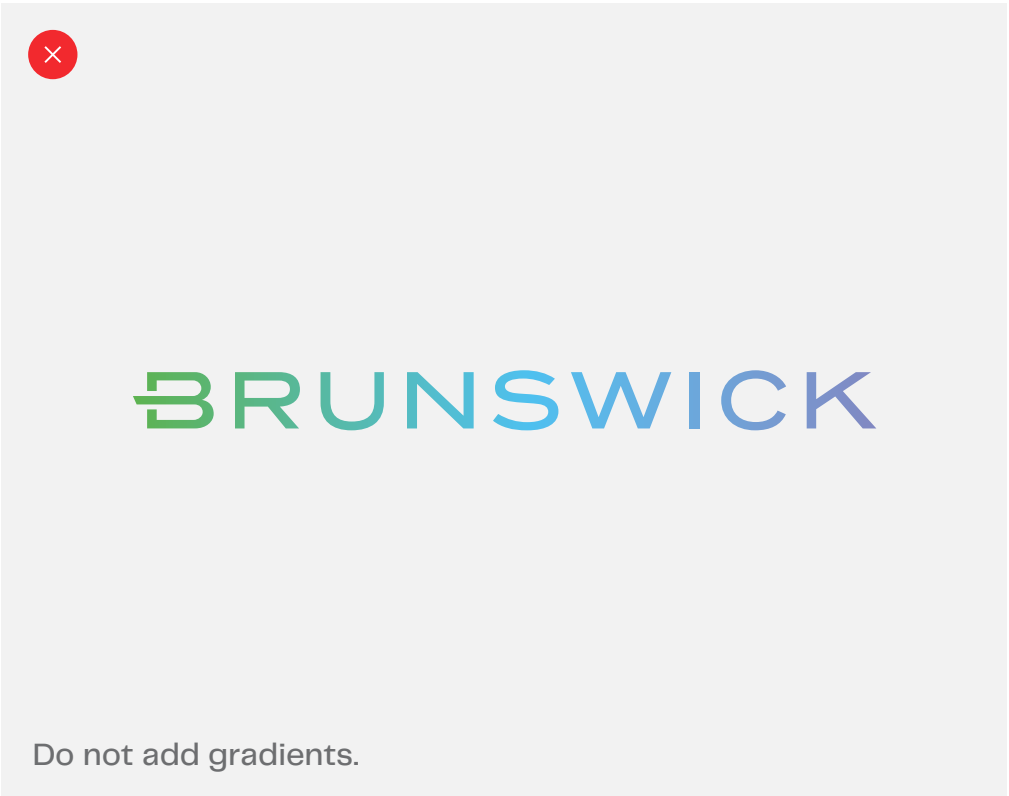

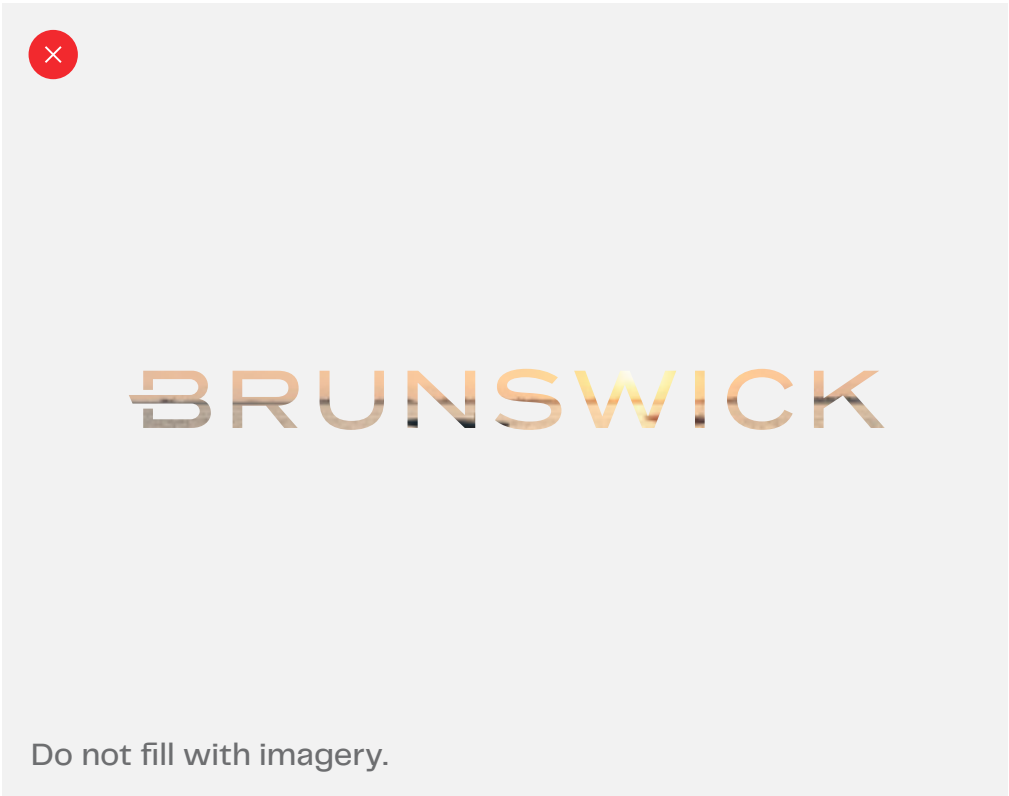

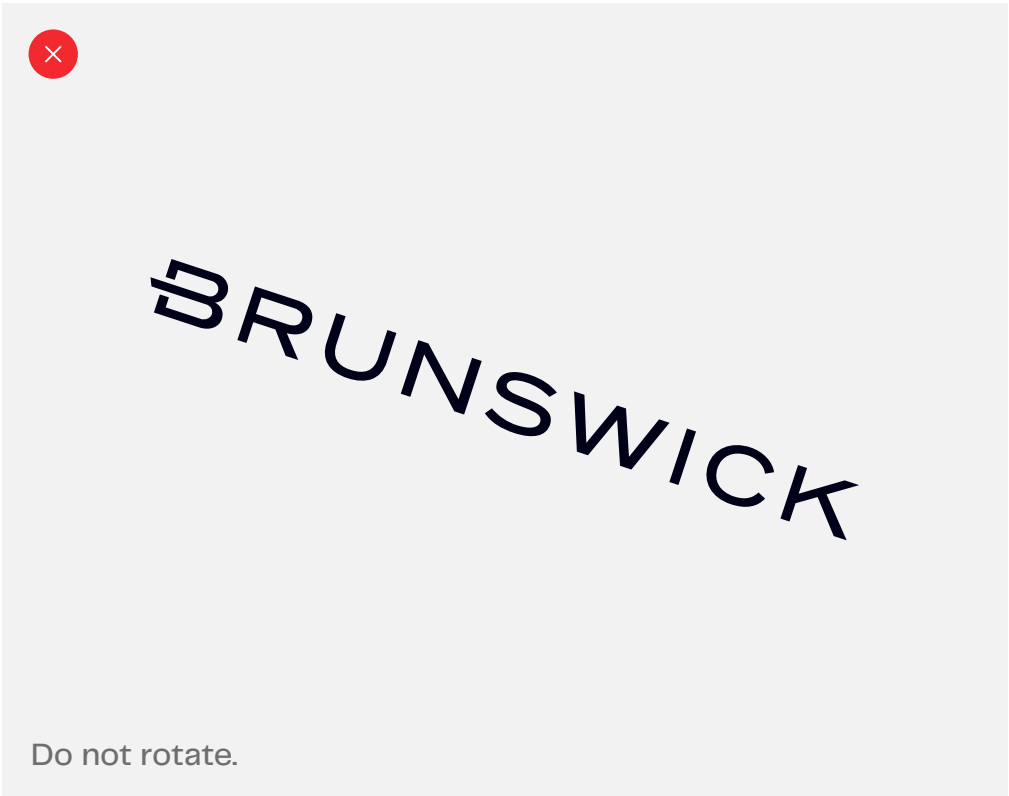

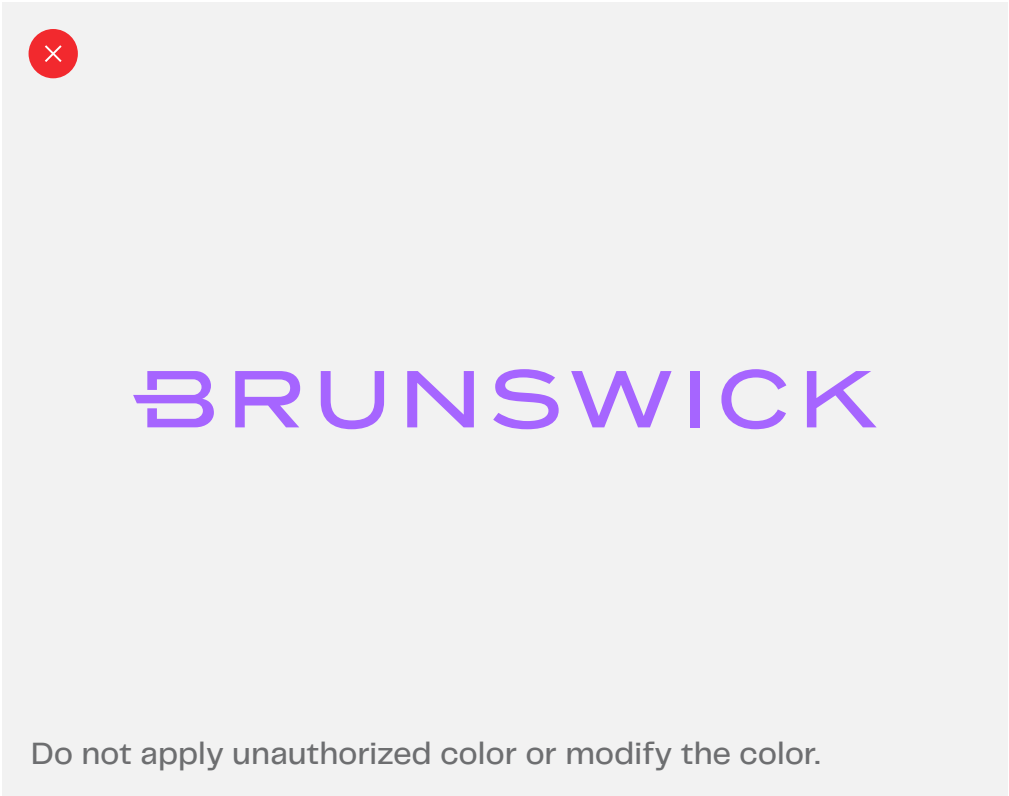

Minimum Size

The minimum size is determined by principles of legibility, rather than a spec. The logo mark and symbol should always be scaled large enough that the letters can be clearly discerned.

Misuse

The examples here show common off-brand use of our logo. Avoid using our logo in these ways. These are only some of the possible misuses and not a comprehensive list. The rules defined on this page are applicable to all versions of the logo and symbol in the Brunswick identity’s suite.

Social Frames

The following examples show current profile containers for social platforms.

1. App Icon

2. Circular Avatar

3. Squared Avatar

Tagline

The Brunswick logo and tagline, “Next Never Rests,TM” must appear clearly and legibly in all applications. The proportions shown should not be altered in any way.

Minimum Size

The minimum size is determined by principles of legibility, rather than a spec. The logo mark with tagline should always be scaled large enough that the letters can be clearly discerned.

Note:

The Brunswick logo is custom drawn. Do not recreate it or its elements. Always use the supplied artwork.

The image shows the Brunswick logo and tagline centered on a dark blue background. The logo consists of a stylized 'B' followed by the word 'RUNSWICK' in a bold, sans-serif font, with a trademark symbol (TM) to the upper right. Below the logo, the tagline 'NEXT NEVER RESTS' is written in a smaller, all-caps, sans-serif font, also with a trademark symbol (TM) to the upper right.

BRUNSWICKTM
NEXT NEVER RESTSTM

Our Divisions

When describing Brunswick’s divisions in general or talent acquisition scenarios, they are described as:

- Mercury — Propulsion + Engine Parts & Accessories
- Navico Group — Power Systems + Electronics
- Brunswick — Boat Group
- Brunswick — Shared Access + Services

Both standard and vertical logo lockup options are available and can be chosen for maximum readability given the available space.

These divisional breakdowns are only for general Brunswick messaging and talent acquisition purposes. When talking to the investor community or during financial reporting, please refer to the IR divisional breakdown.

Standard Logo Lockup

Our Marquee Brands

Brunswick is home to many iconic brands within marine recreation and beyond. When visually representing Brunswick’s brands, please refer to this lockup whenever possible.

Given space limitations, designers can adjust the layout but can not change the order, add or subtract brands from the list.

Standard Logo Lockup

Vertical Logo Lockup

2.2— Color System

Color Palette

Shown on this page are the ratios in which our brand colors should be used in relation to each other.

Our palette is built around our primary color, Brunswick Blue. The secondary palette includes complementary colors — Brunswick Midnight, White and Brunswick Sky — which are purposefully part of the same color family and enrich the overall visual language. Our tertiary palette includes two cool grays to support our other colors and three vivid accent colors which are for use in digital applications only. An exception is when our accent colors are used for the Pop of Color treatment of our Energy Currents (see later section.) When Energy Currents are printed, the Pantone (PMS) colors provided are the color match targets for our vivid accent colors.

The specifications are shown here for reproducing our color palette in both print and digital communications. For print applications, consult current Pantone color publications and your printer to determine optimum color matches.

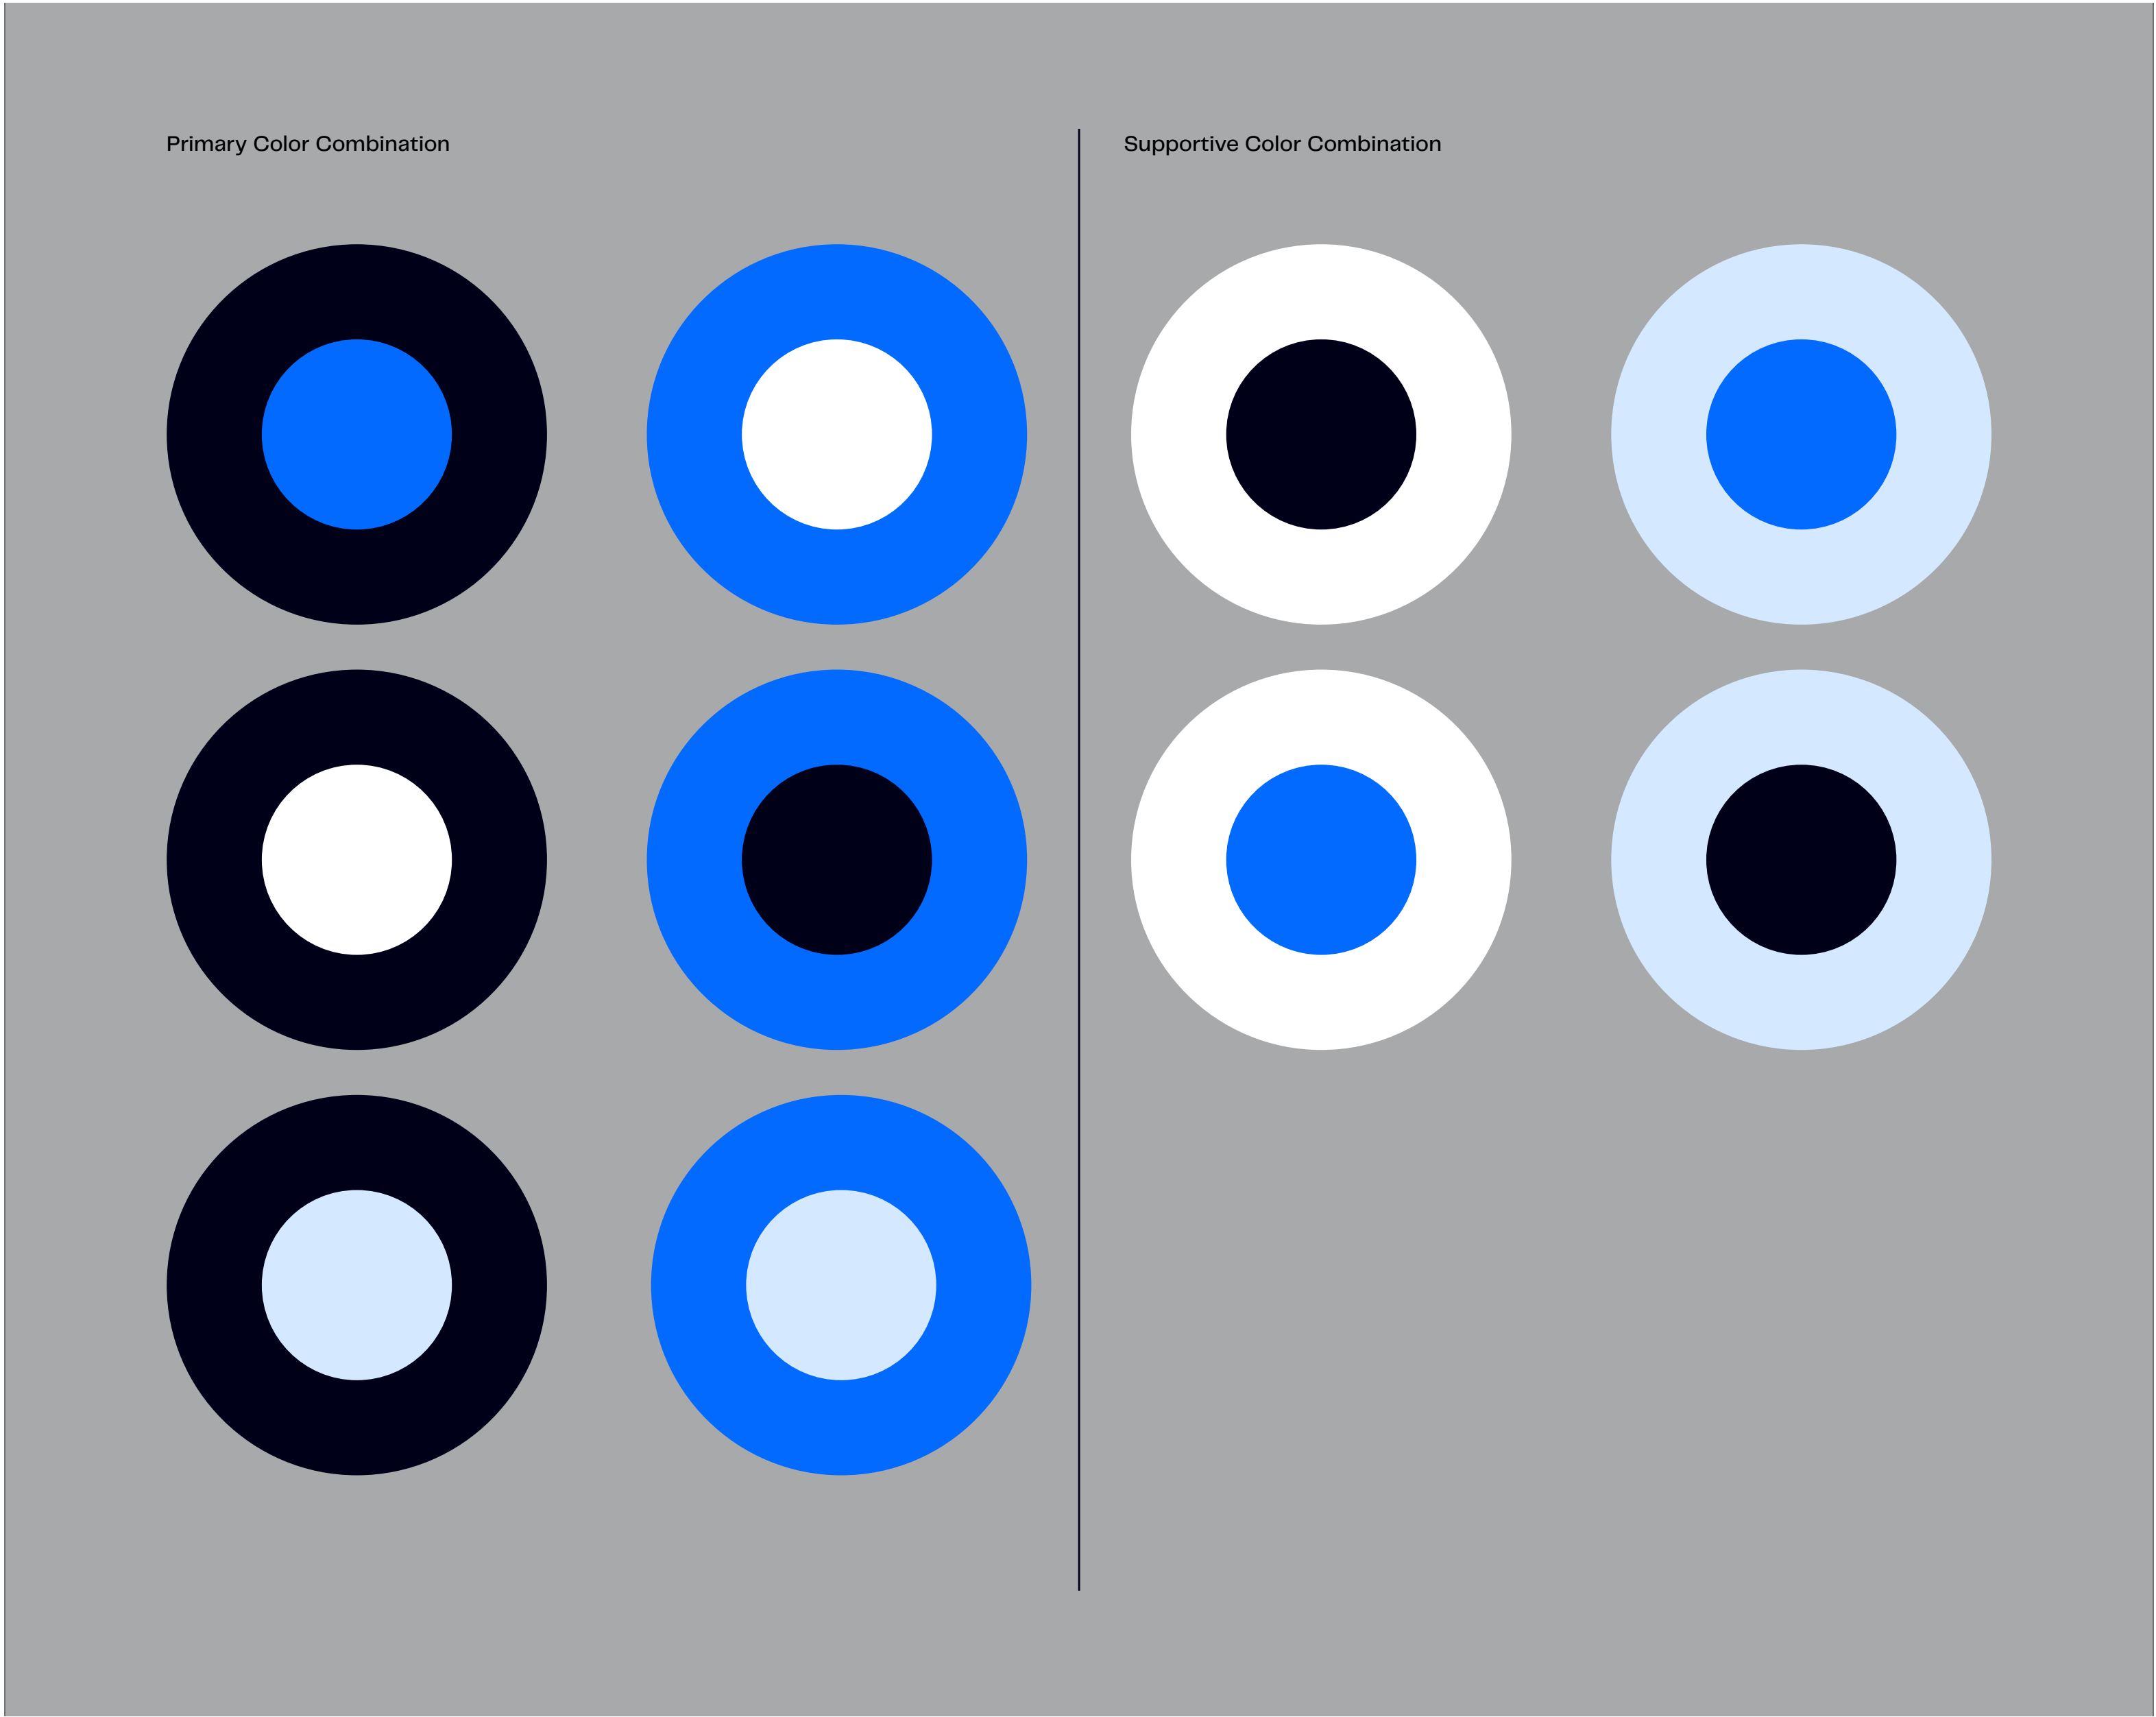

Note:

*These accents are designed for digital use. Only use them for print when absolutely necessary.

Brunswick Blue #026AFE PMS 2388 R 2 / G 106 / B 254 C 100 / M 69 / Y 0 / K 0					
Brunswick Midnight #000018 PMS 289 R 0 / G 0 / B 24 C 82 / M 75 / Y 60 / K 80		Brunswick White #FFFFFF R 255 / G 255 / B 255 C 0 / M 0 / Y 0 / K 0		Brunswick Sky #D4E8FF PMS 657 R 212 / G 232 / B 255 C 19 / M 7 / Y 0 / K 0	
Accent Green* #04E255	PMS 2420 R 4 / G 226 / B 85 C 67 / M 0 / Y 94 / K 0	Accent Blue #00C4FF	PMS 3545 R 0 / G 196 / B 255 C 63 / M 2 / Y 0 / K 0	Accent Purple* #A665FF	PMS 266 R 166 / G 101/ B 255 C 71 / M 80 / Y 3 / K 0

Combining Color

These pairings provide a general guide for combining colors across all Brunswick brand elements. These color combinations allow for color contrast in order to be compliant with ADA guidelines and provide legibility.

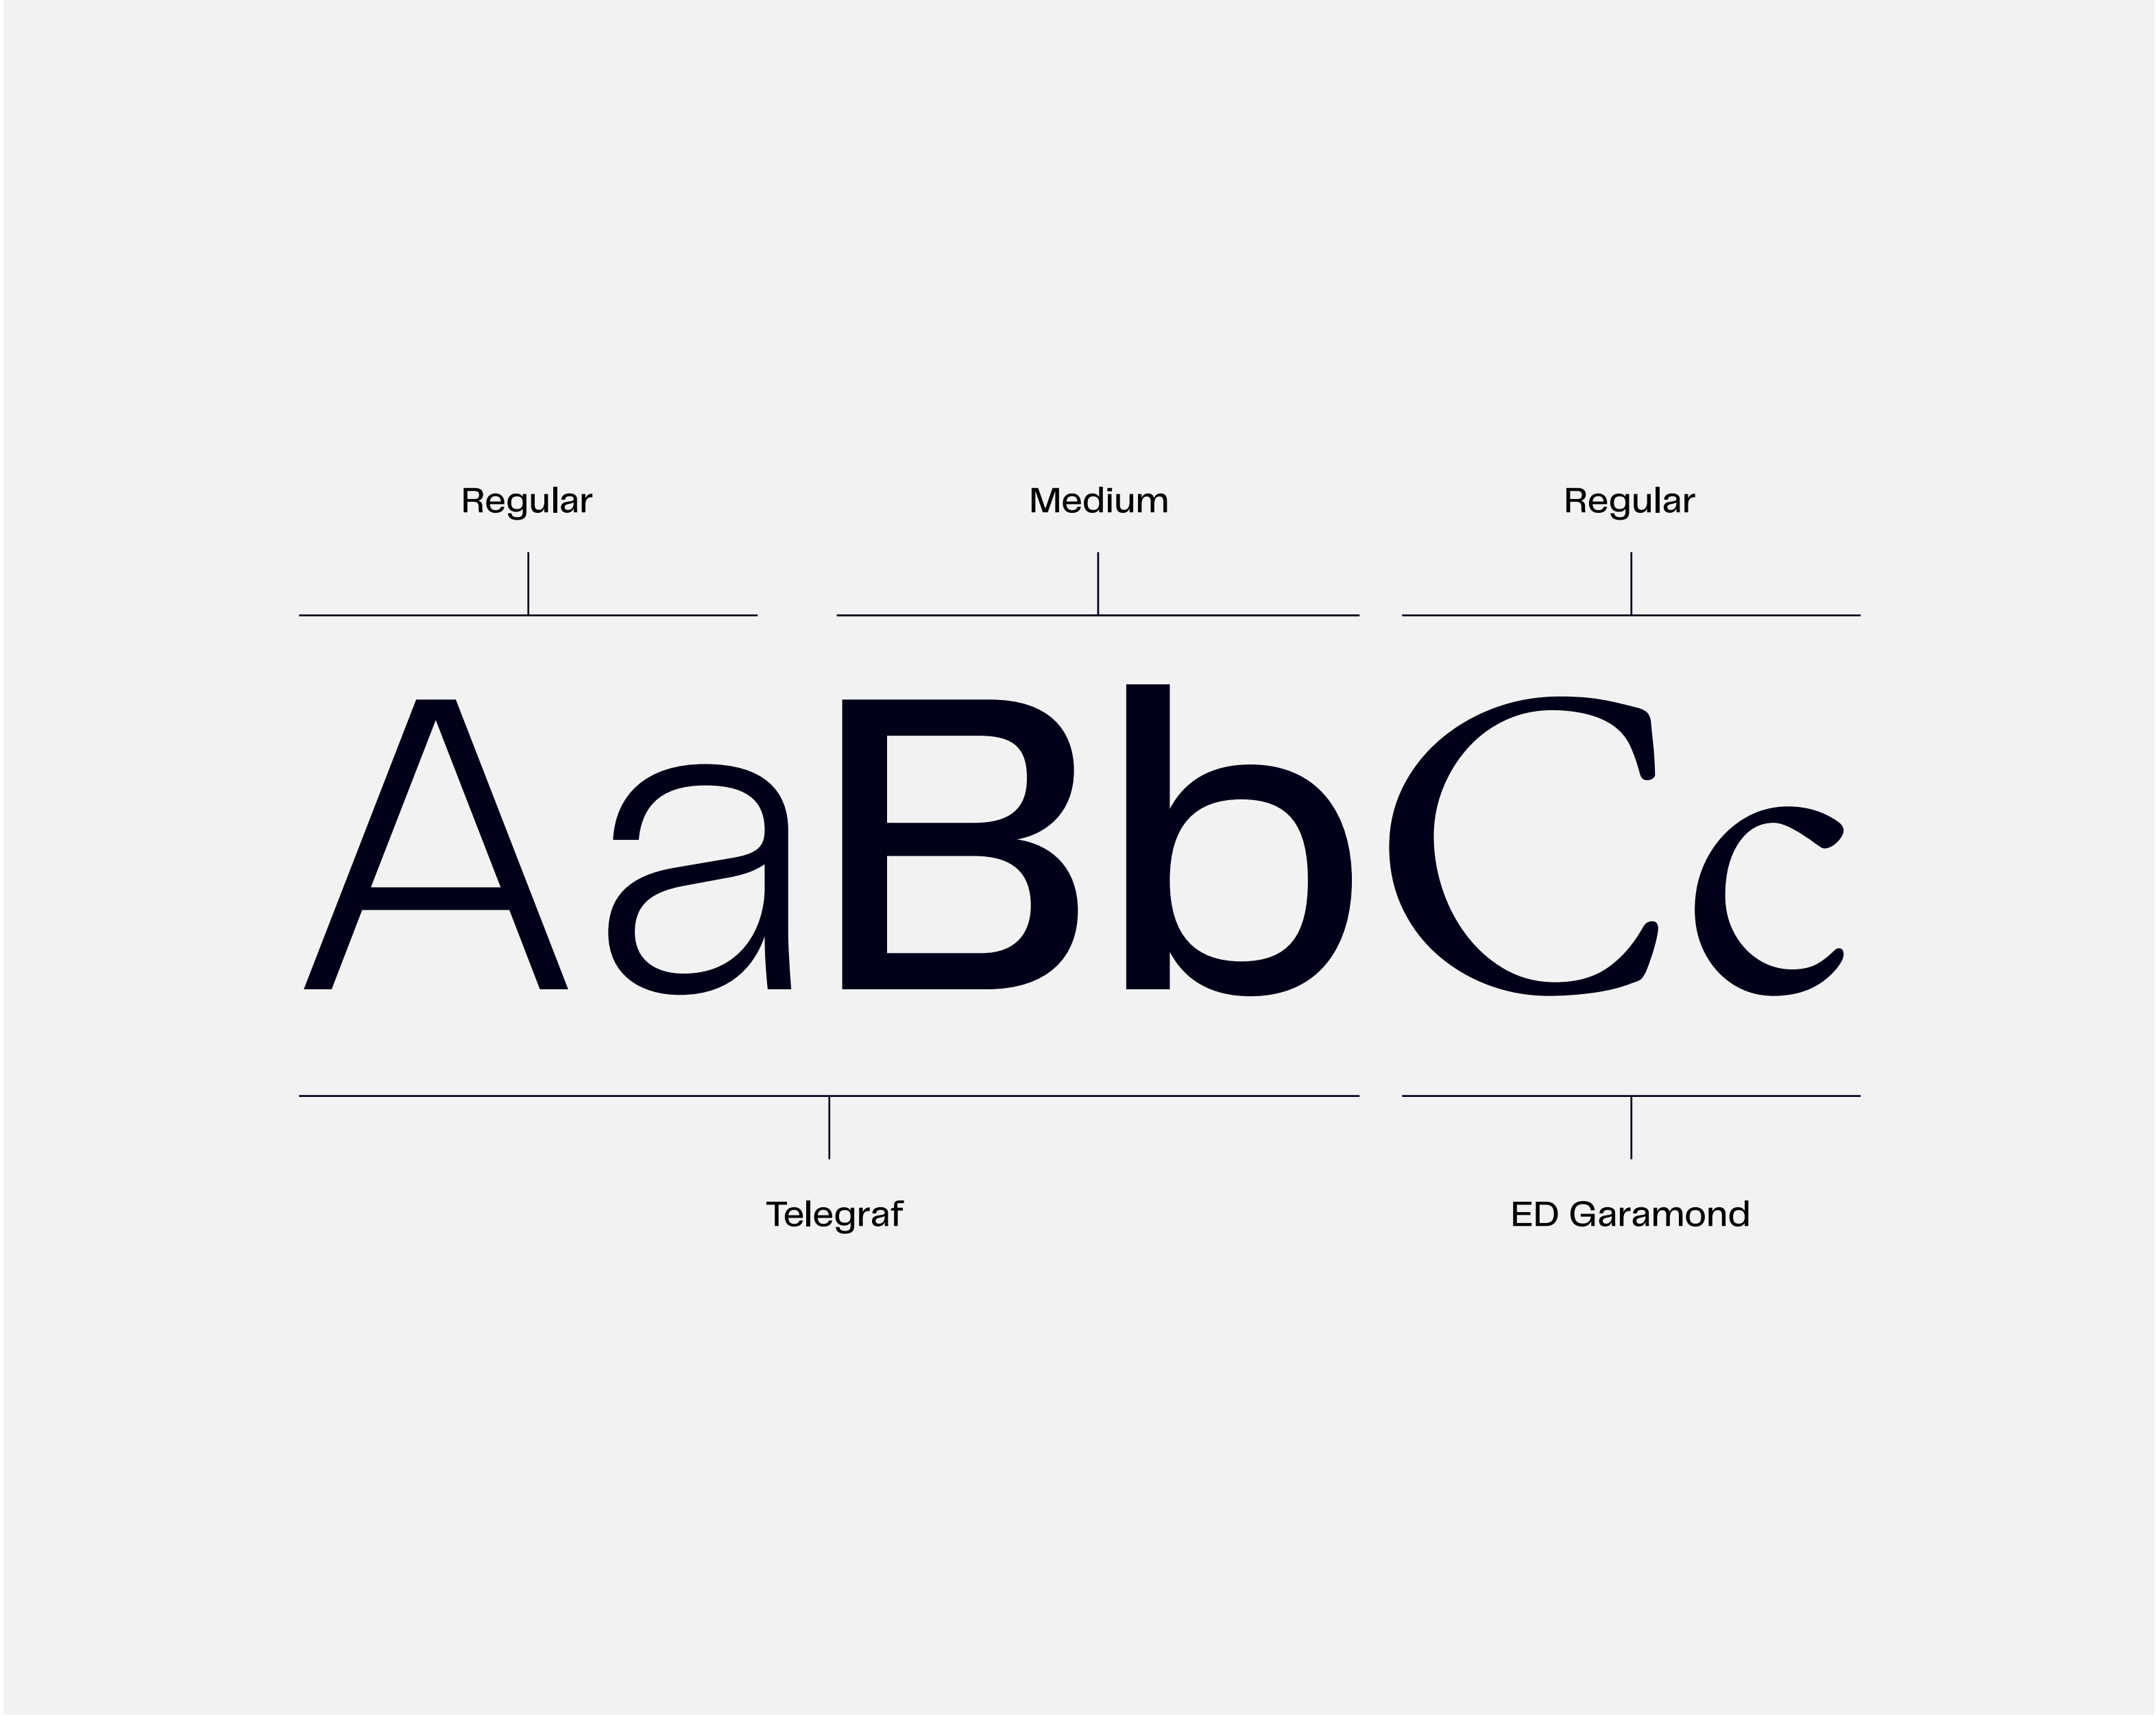

2.3 – Typography System

Fonts Overview

We have two brand typefaces which combine to reflect our blend of human, technical and professional energy. Our primary font is Telegraf, a sans serif font, which is supported by EB Garamond, a serif font. Their contrasting forms bring interest and dynamism to our written communications.

When setting type in our branded communications, always use these typefaces whenever possible. The following pages provide more detail on how and where to use each typeface so that our written communications convey our brand.

Telegraf — Primary Font

Telegraf is the primary font for all our communications. Its font family includes eight weights ranging from UltraLight to Black.

EB Garamond— Secondary Font

EB Garamond is a serif typeface with five weights. It is used only for longer form text such as body copy paragraphs. We never use EB Garamond for display text.

Human

the water.

Unmatched pace of new product development and launch driven by advanced design, technology and innovation provide distinct performance features and marketplace advantages. Partnerships with leading universities give us access to research and talent to address and solve business problems. Strategic investments and ventures open doors to new technologies.

Unique opportunities for consumer insight that influences our design and investment. The ability to seamlessly integrate technology to deliver the best boating experiences.

Titillium — Alternative Webfont

Titillium is a free open source alternative for Telegraf. As with Telegraf, this family can be used as the primary font when an open-source font is needed and Telegraf is not available.

Note:
EB Garamond is designed for web viewing and is open source, so it does not need an alternative for web.

Titillium Semibold + Titillium Light

The People Community Efforts

Titillium Light

Brunswick is defining, creating and innovating the future of recreational boating. With advanced design, technology and innovation.

Titillium Semibold

Brunswick is committed to social responsibility through its efforts in sustainability, community involvement and governance.

Em Dash Use

The em dash (a long dash the length of the letter “M”) is used after a title/headline when it is followed by a subtitle/subhead of the same type size. The subtitle/subhead may be a different color or font weight and is on a new line of text. Add a space between the title and the em dash for breathing room.

This is a carefully considered text style. No other punctuation is used in headlines, unless needed to avoid ambiguity or confusion. As a general rule, we do not use periods at the end of headlines.

Type Styles

Hierarchy is established across different levels of information through contrasting type sizes, weights, styles and colors, creating a look that’s eye-catching and aesthetically pleasing. The proper typographic treatment and controlled usage of styles will guide users to read content and understand the hierarchy of information. The following pages contain some examples. Basic usage follows these guidelines:

Title Case

Used for titles/headers and subtitles/subheads with three words or fewer.

Sentence Case

Can be used for any text with three words or more but limited to one sentence and for call outs.

Upper Case

Can be used for second level call outs.

EB Garamond

Used for body text not for display text.

Title Case

Delivering Solutions to Define and Transform the Marine Experience

Body Text

Unmatched pace of new product development and launch driven by advanced design, technology and innovation provide distinct performance features and marketplace advantages. Partnerships with leading universities give us access to research and talent to address and solve business problems. Strategic investments and ventures open doors to new technologies.

2.4 – Energy Current

Brunswick

Energy Currents

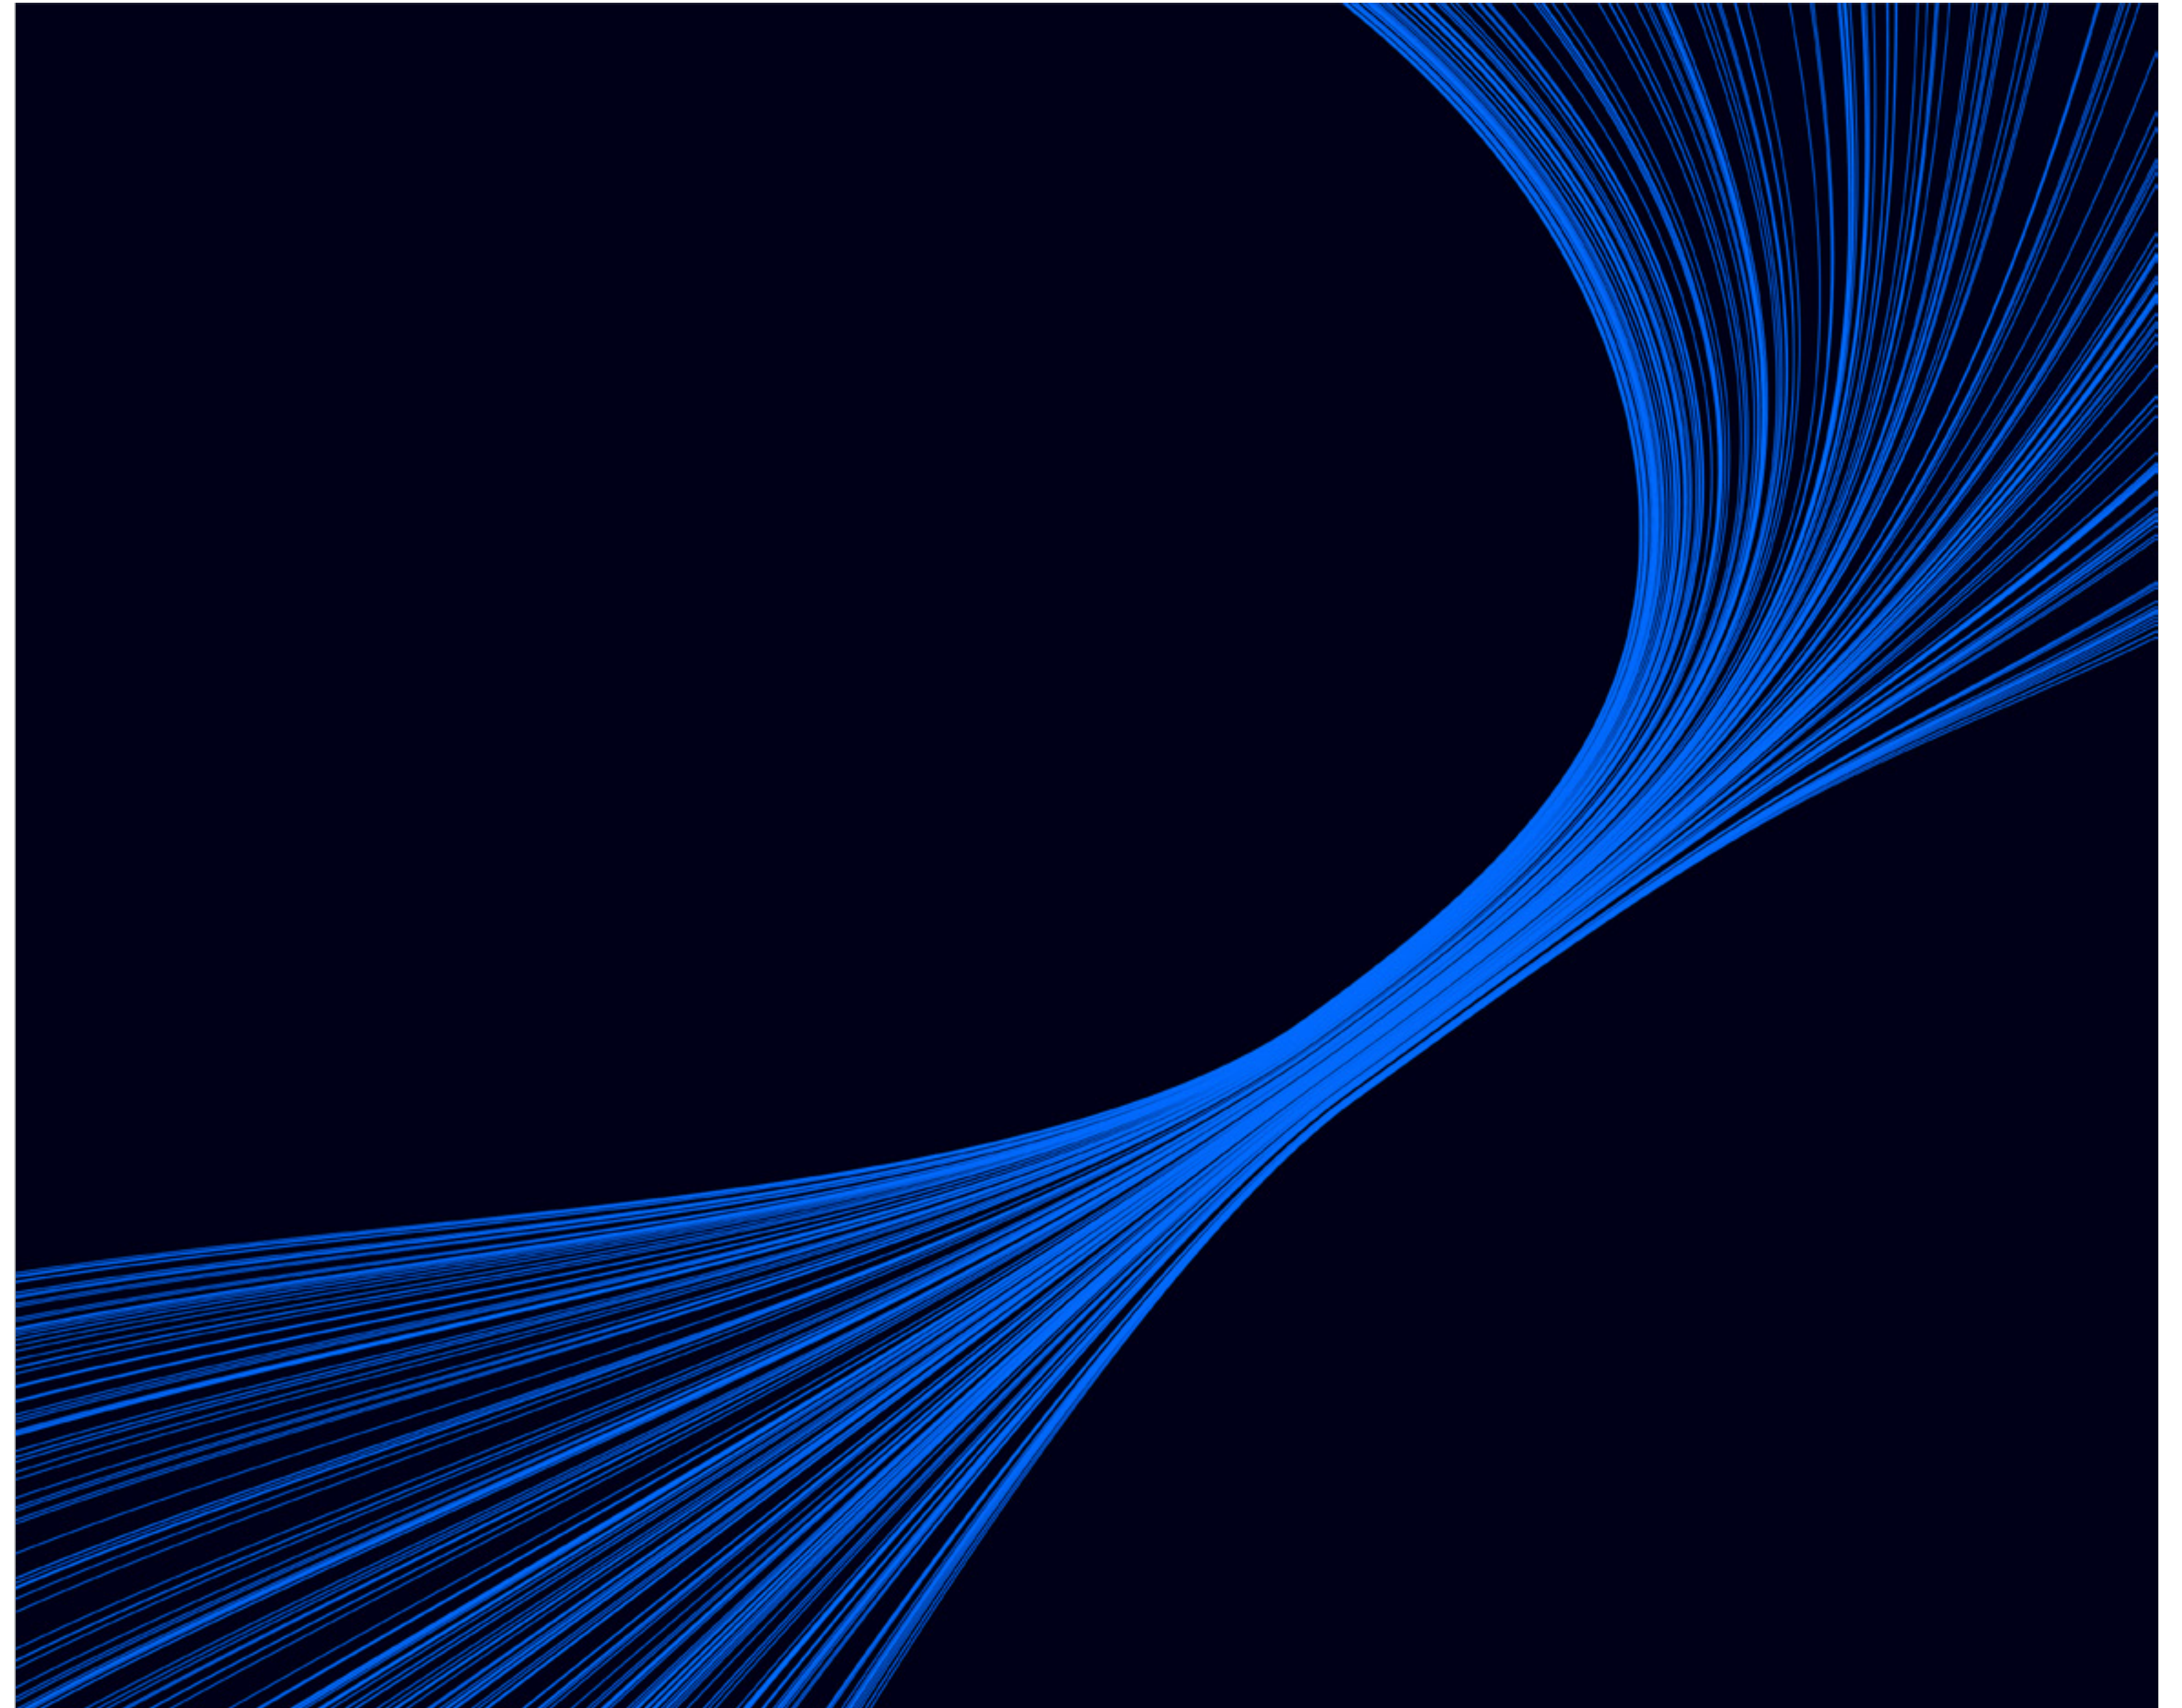

Energy Currents, our graphic elements, are flows of lines alive with dynamic energy. They are a visual representation of our brand driver, “Innovation Untethered,” and its aspects of energy, power, transformation, momentum and its expressions as unbound while unified.

Our Energy Current graphic elements artwork is available as a library of files in Adobe Illustrator vector format. Available variations are shown in the following pages. It is important for consistent brand expression to never modify or alter the artwork or create your own Energy Currents except as described in these guidelines.

Use the current sparingly* to ensure that it feels special and important as part of the brand. Over-using the current can cause it to feel less meaningful.

Note:

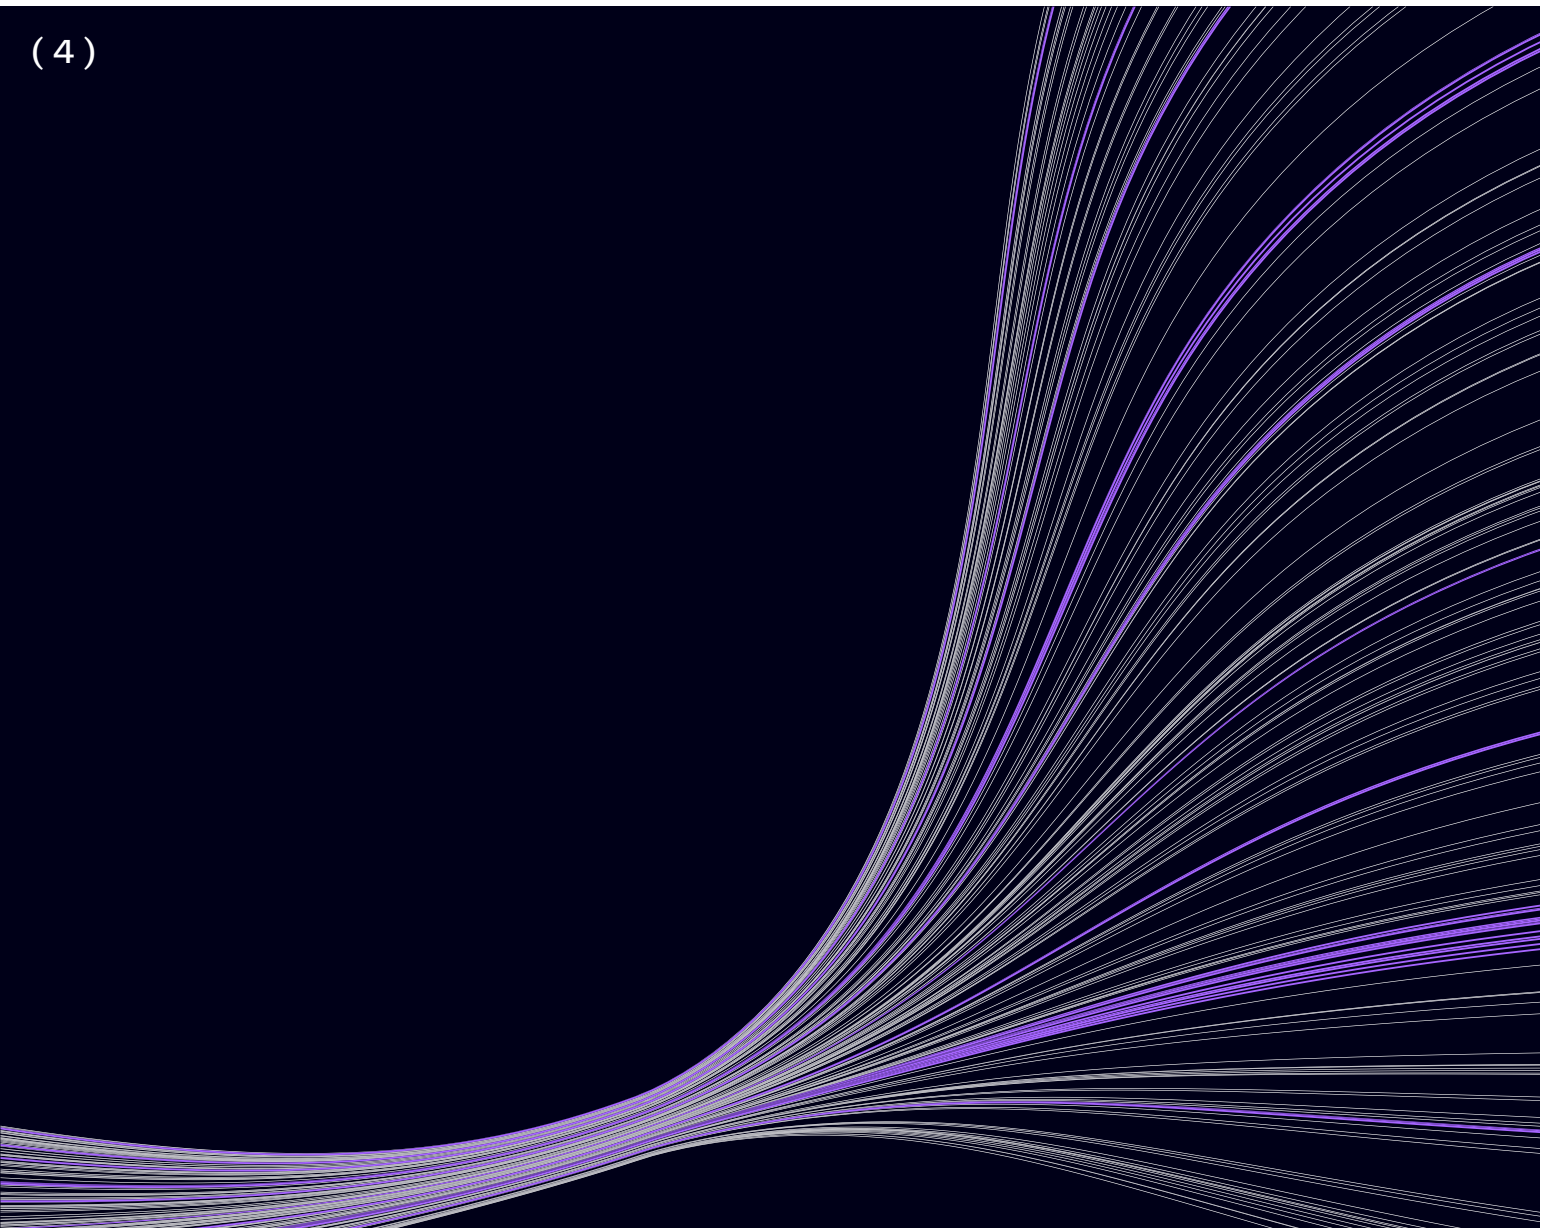

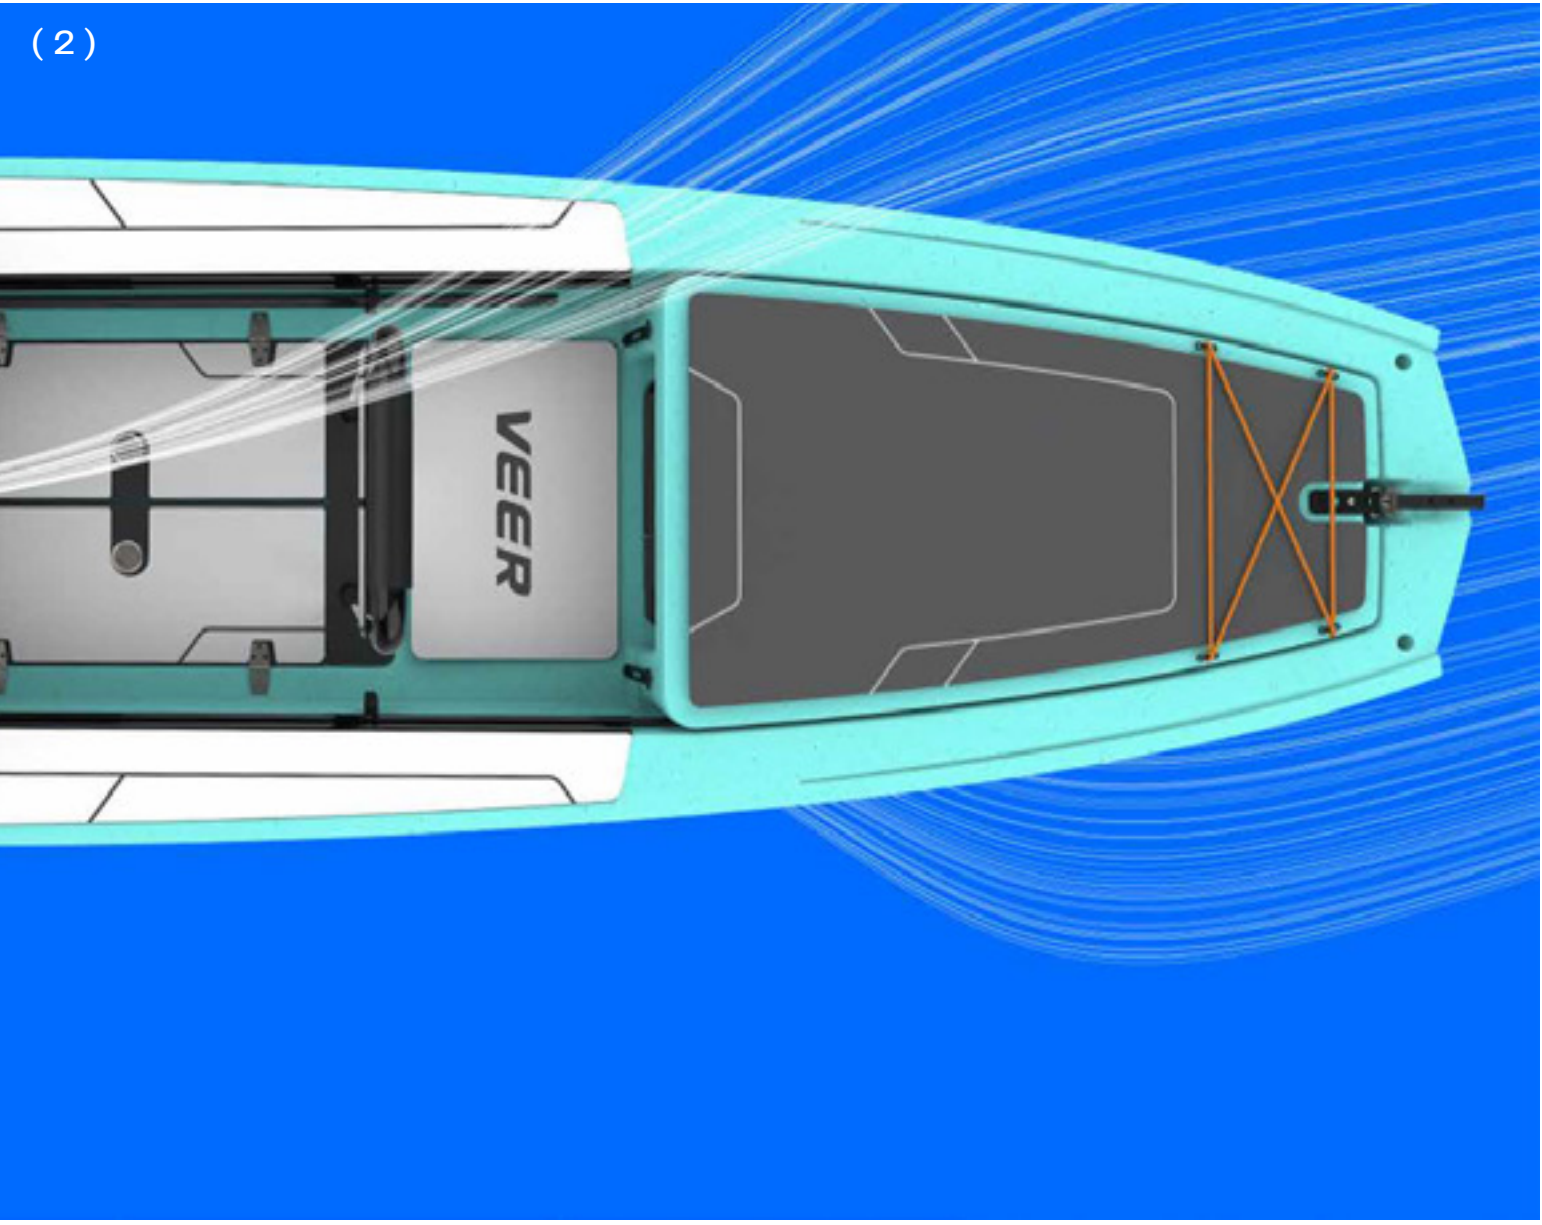

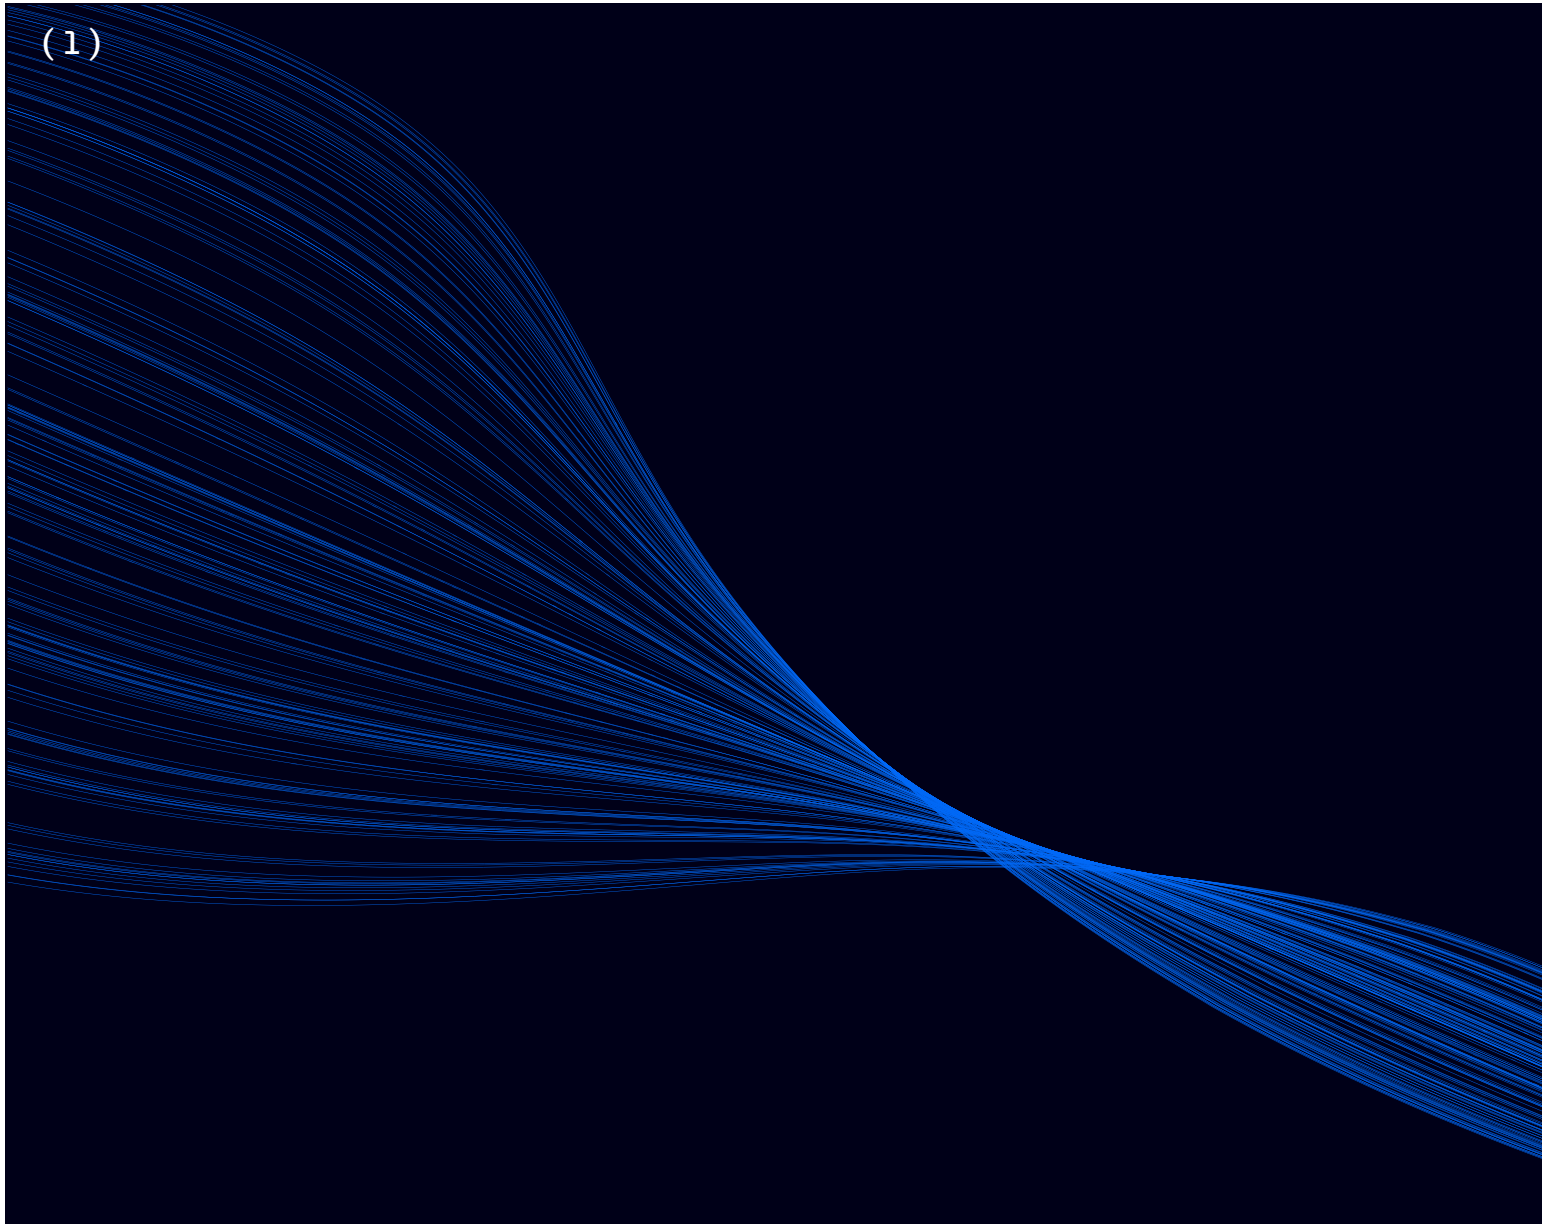

*A good rule of thumb should be to use the current no more than once every five pages. Limiting the current use to title pages, breaker pages, or any other page that has a very limited amount of content.

Usage Overview

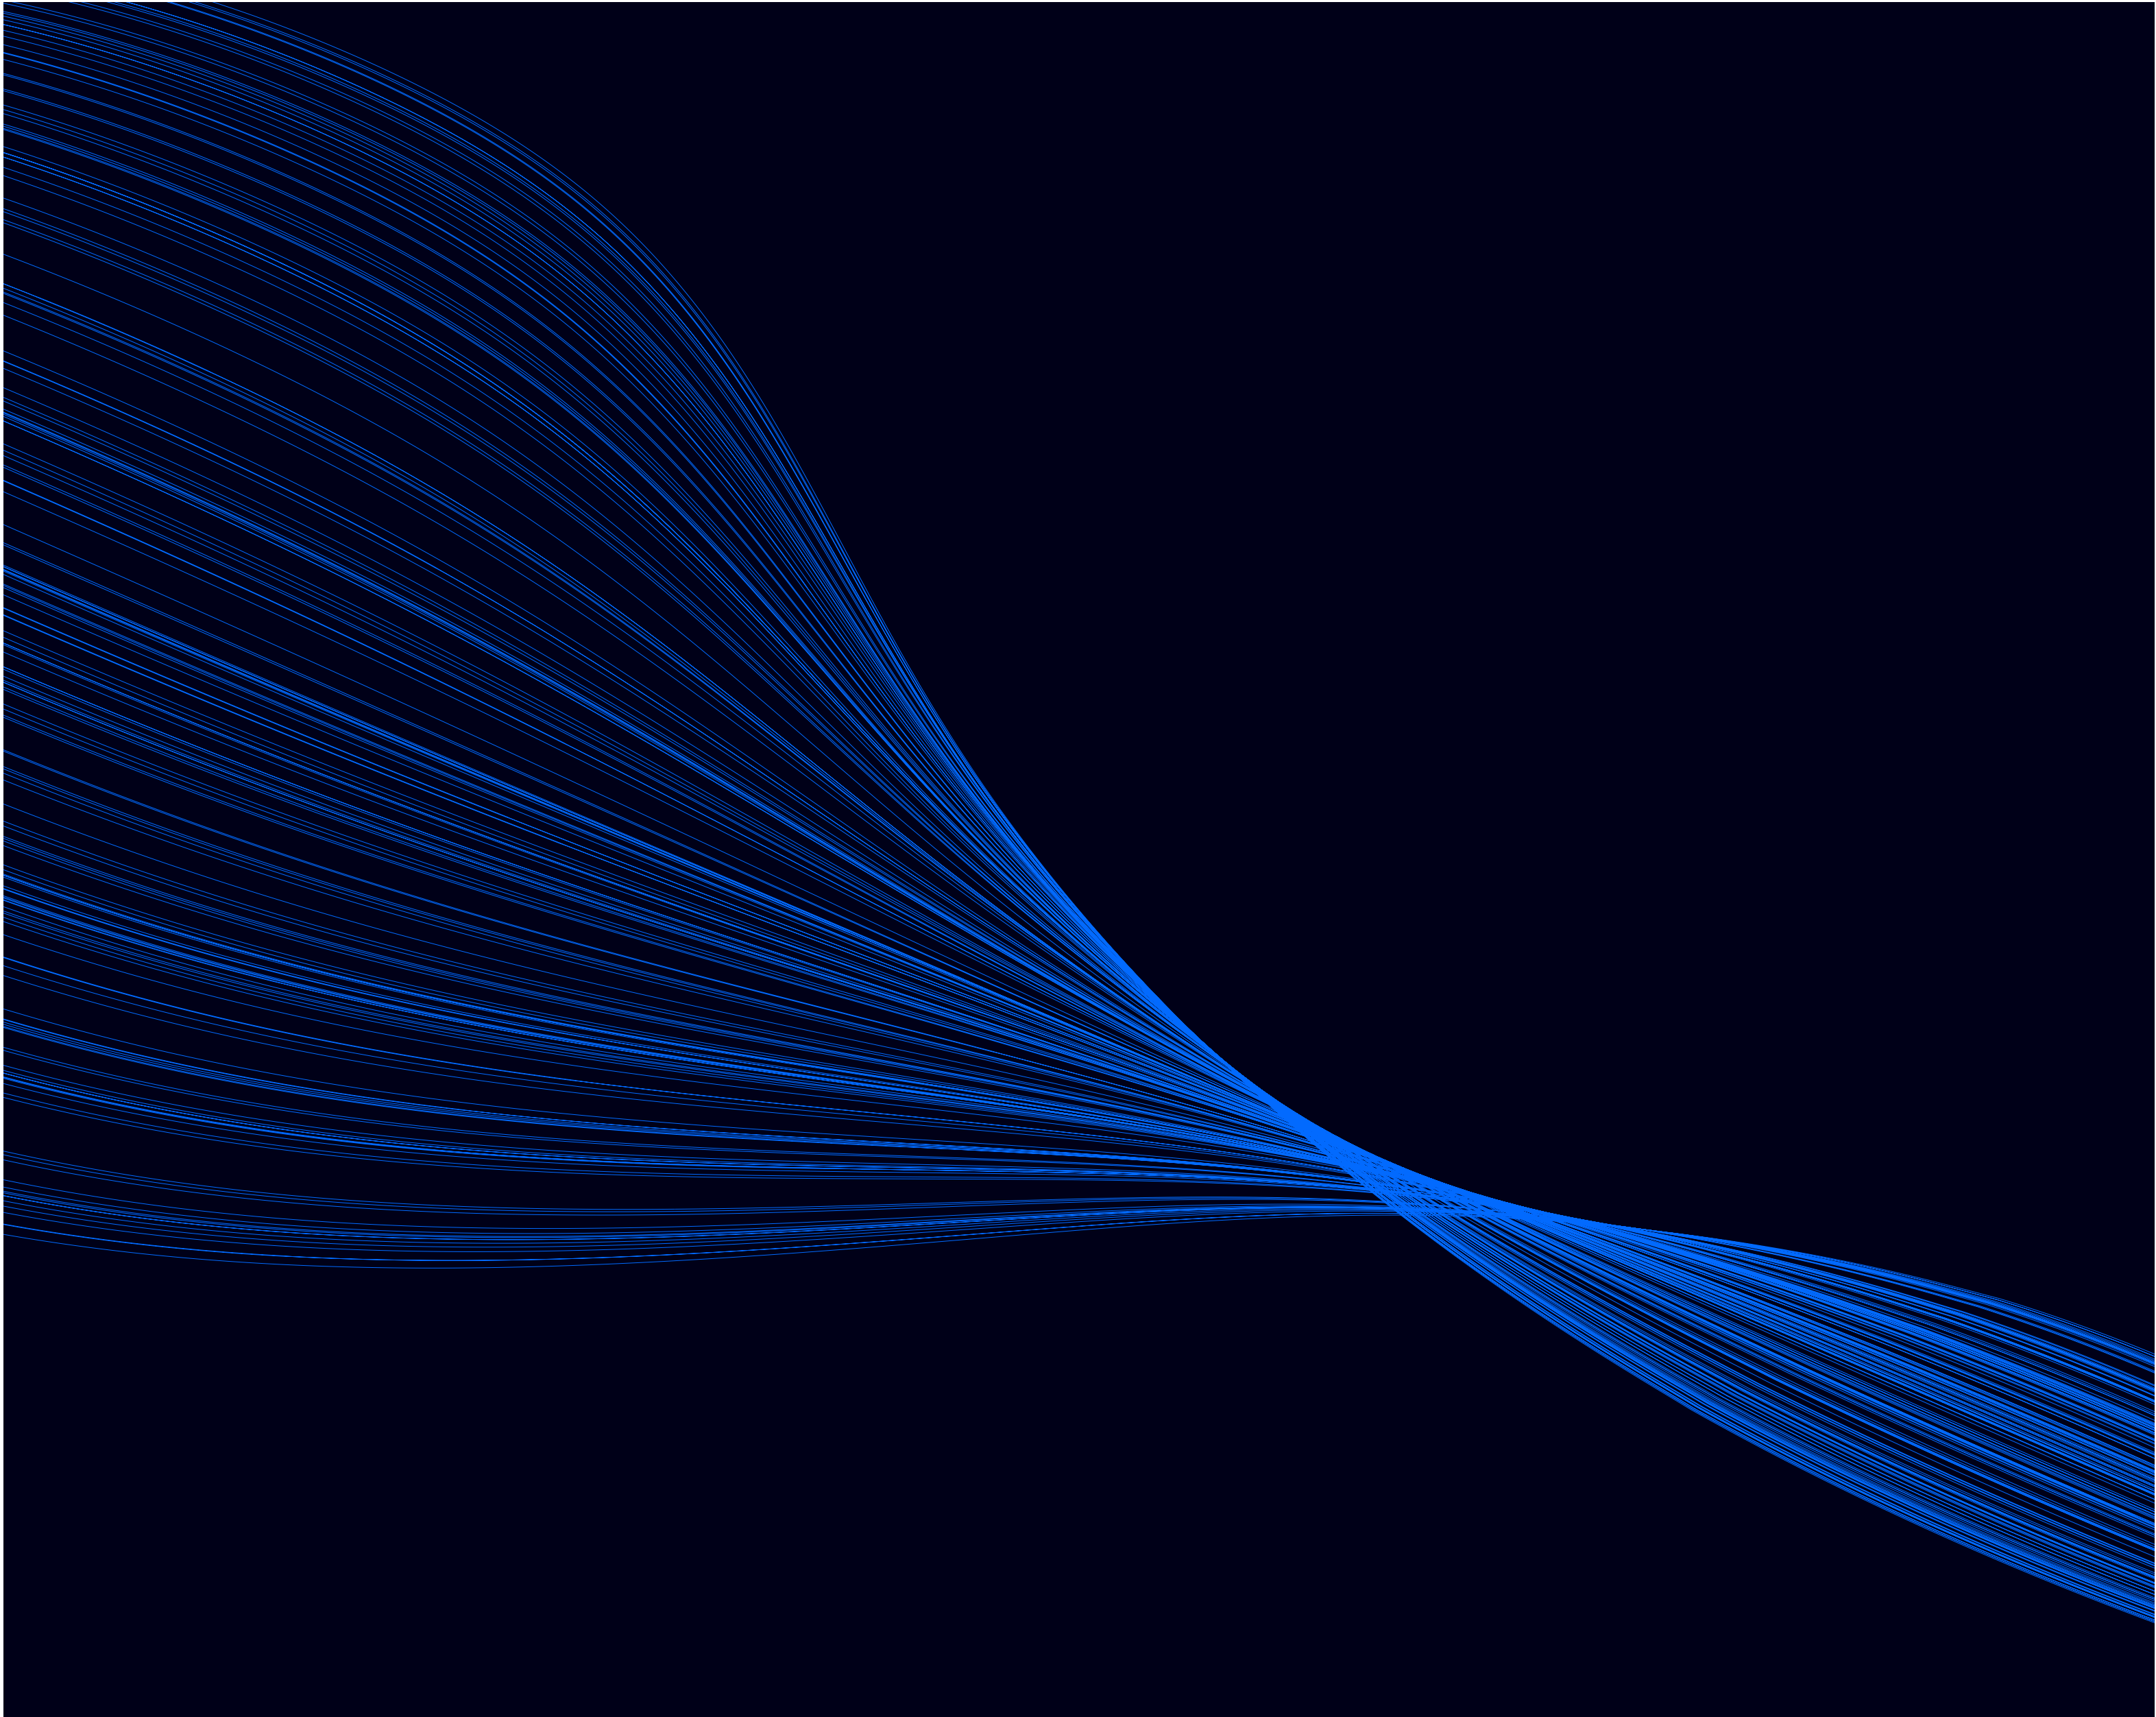

Our graphic elements construction and design rationale provides a flexible and dynamic range of compositions that help further our brand story. Energy Current usage is versatile and can be used as follows:

- (1) Energy Current on solid branded colors.
- (2) Energy Current interacting with (simple) images.
- (3) Energy Current interacting with headlines.
- (4) Energy Current using pops of color.

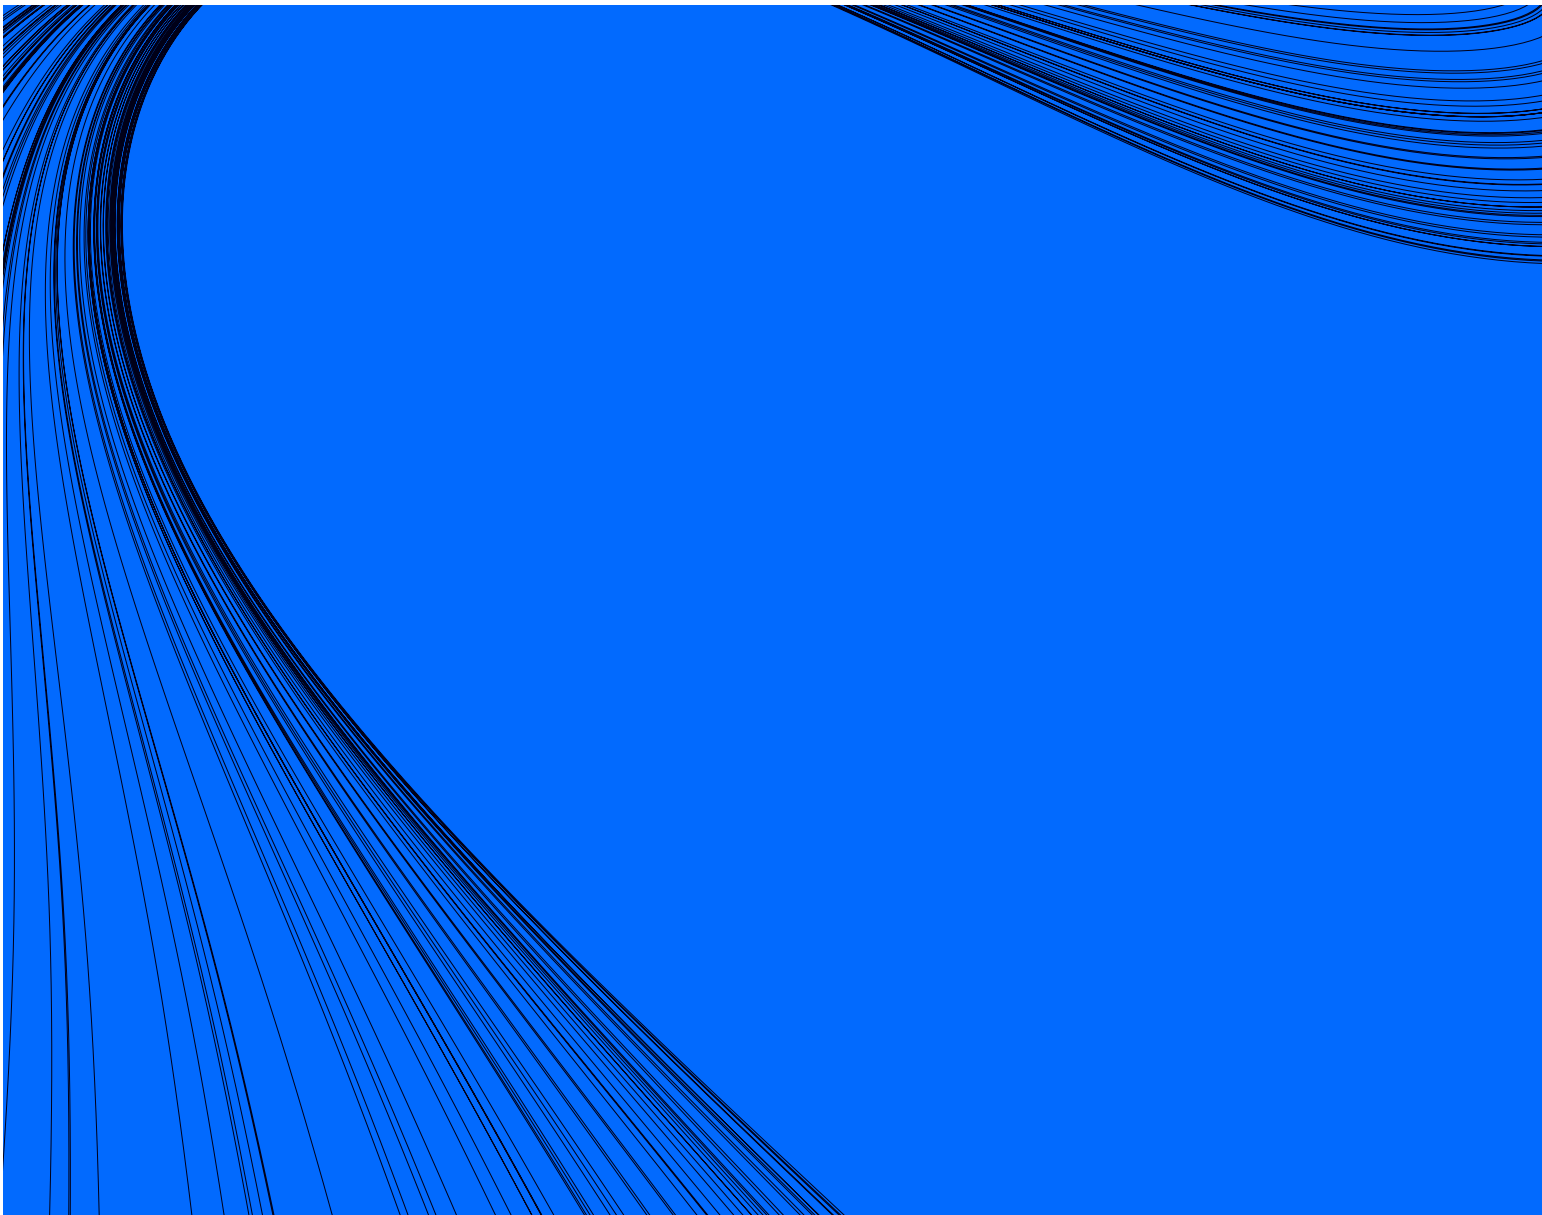

Energy Current on Solid Branded Colors

For a cohesive branded visual identity, the background used for all Energy Current variations and treatments should be a solid field of one of our primary brand colors: Brunswick Blue, Brunswick Midnight, Brunswick Sky, White, Gray A or Gray B.

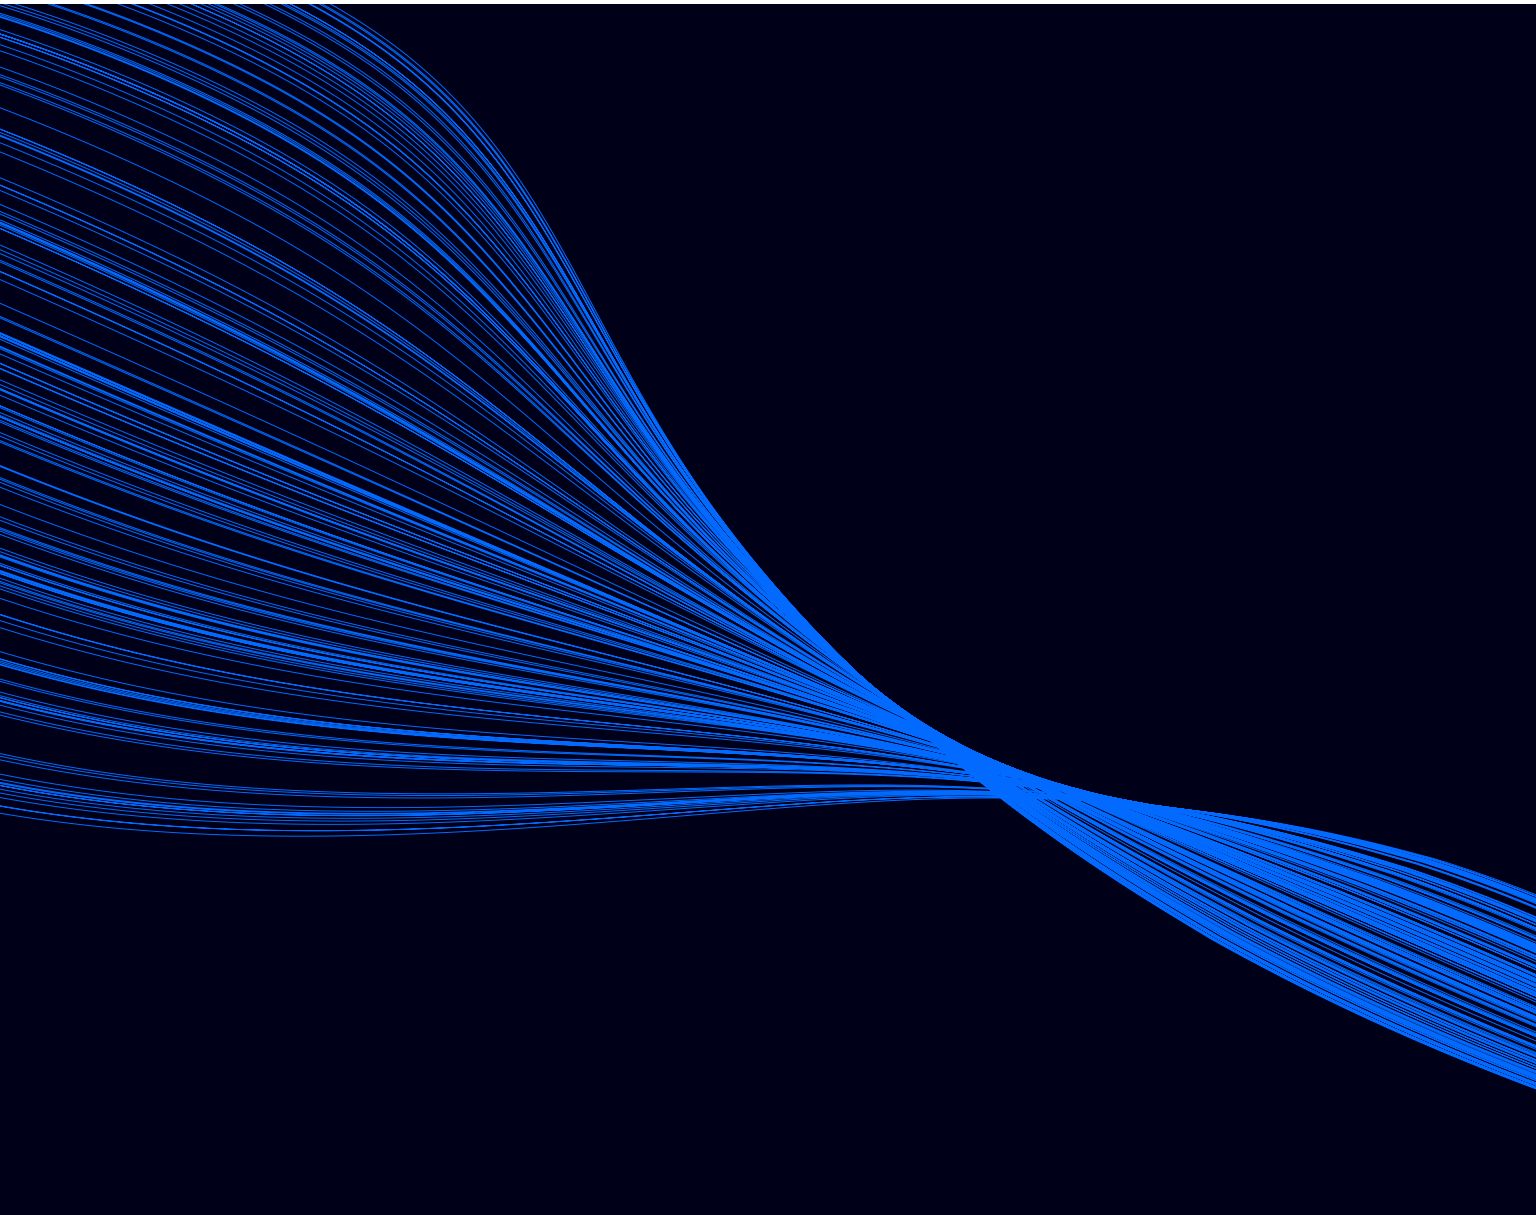

Energy Current on Solid Branded Colors — Usage

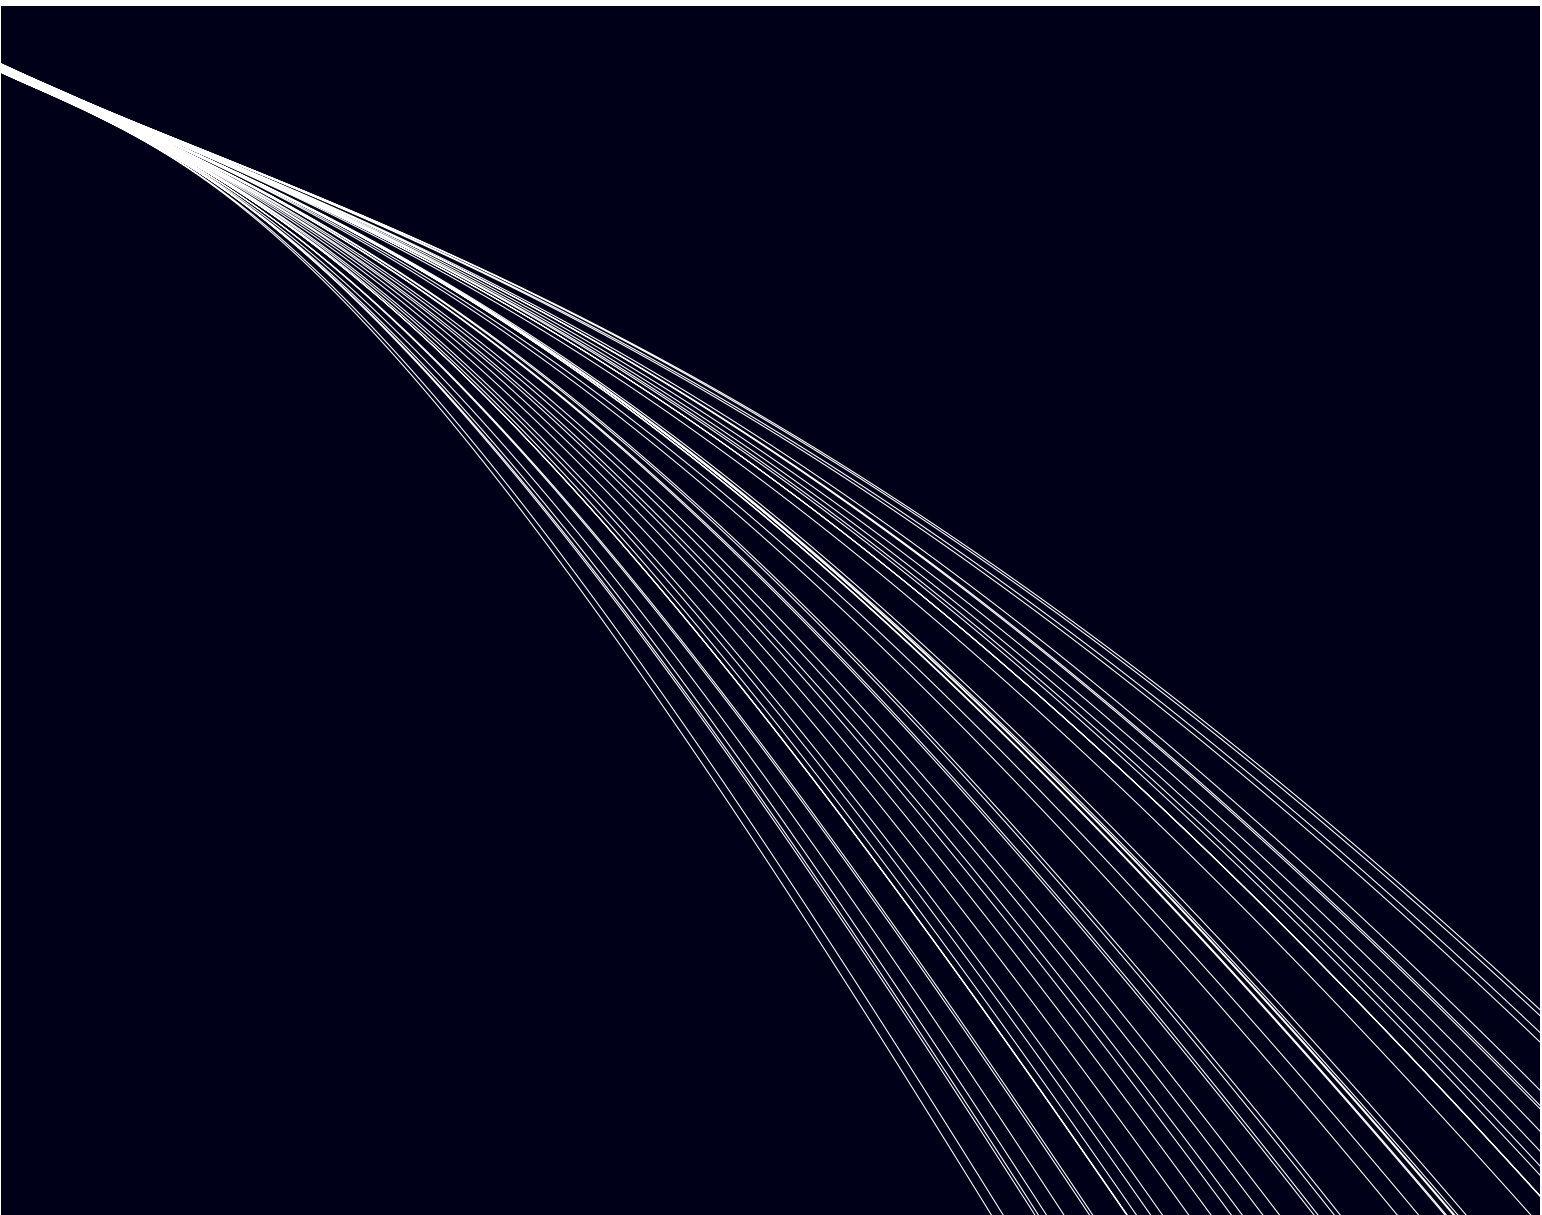

(1) Midnight on Blue

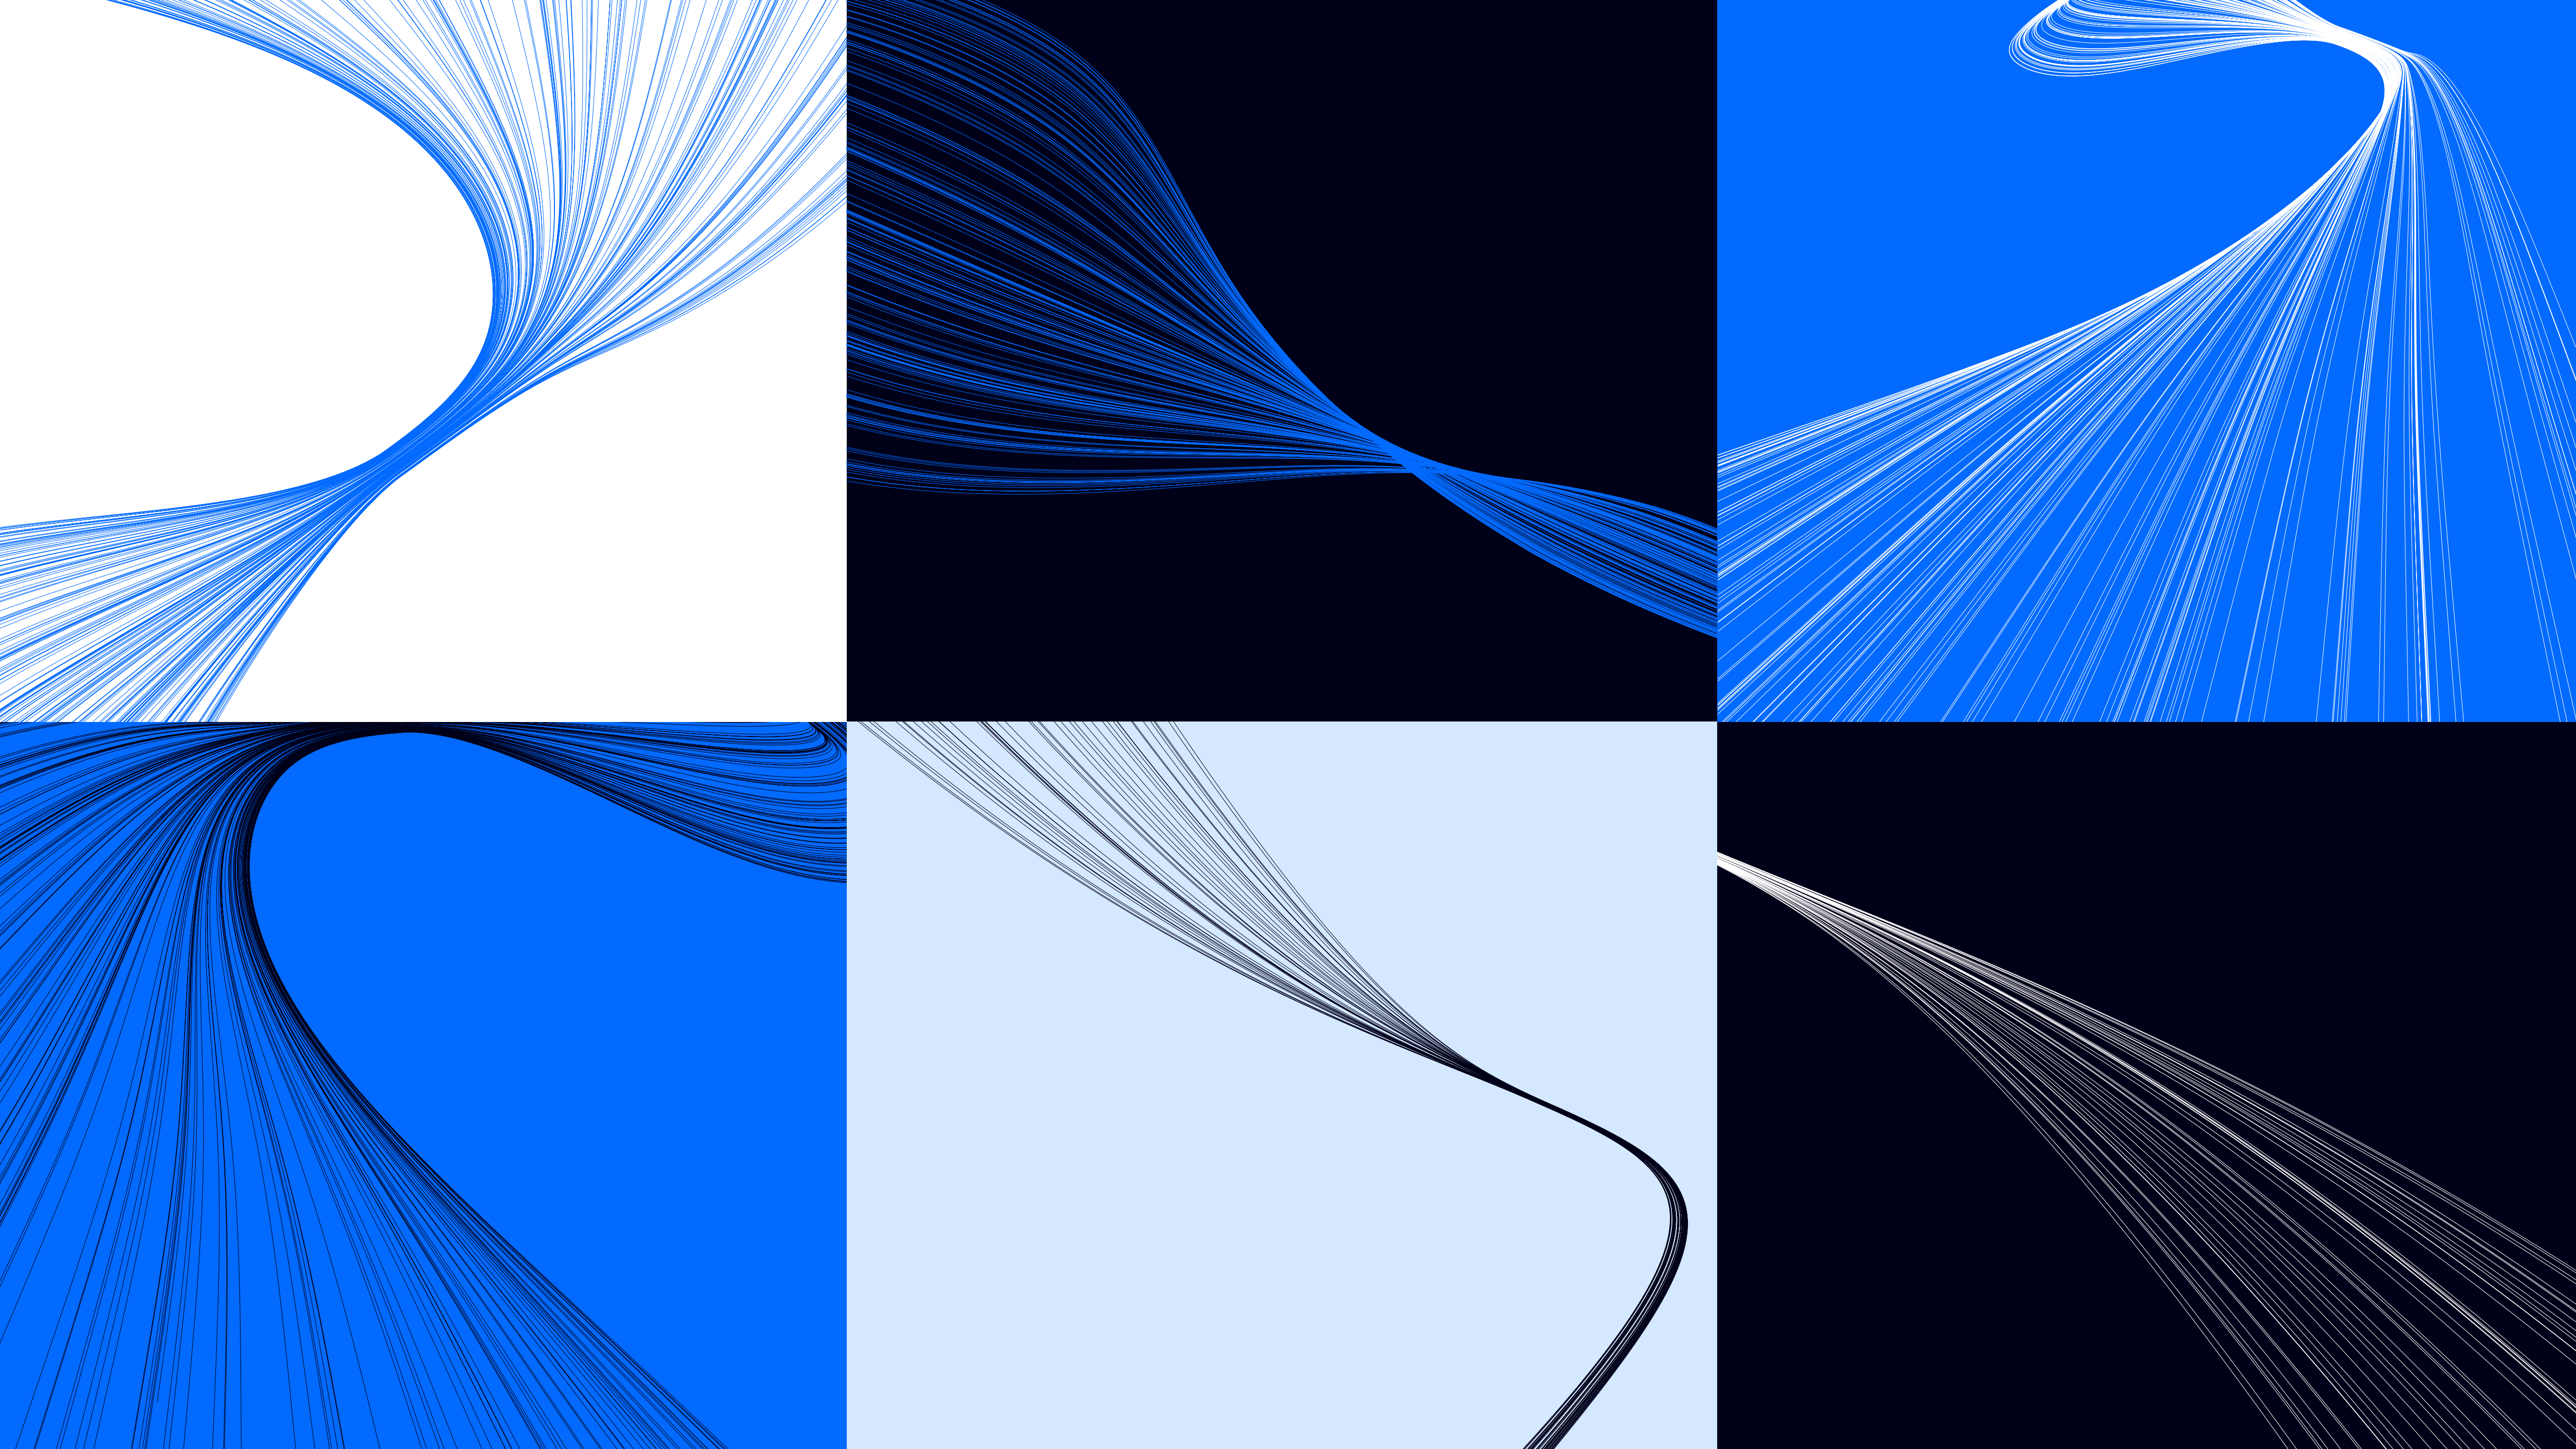

(2) Blue on Midnight

(3) White on Midnight

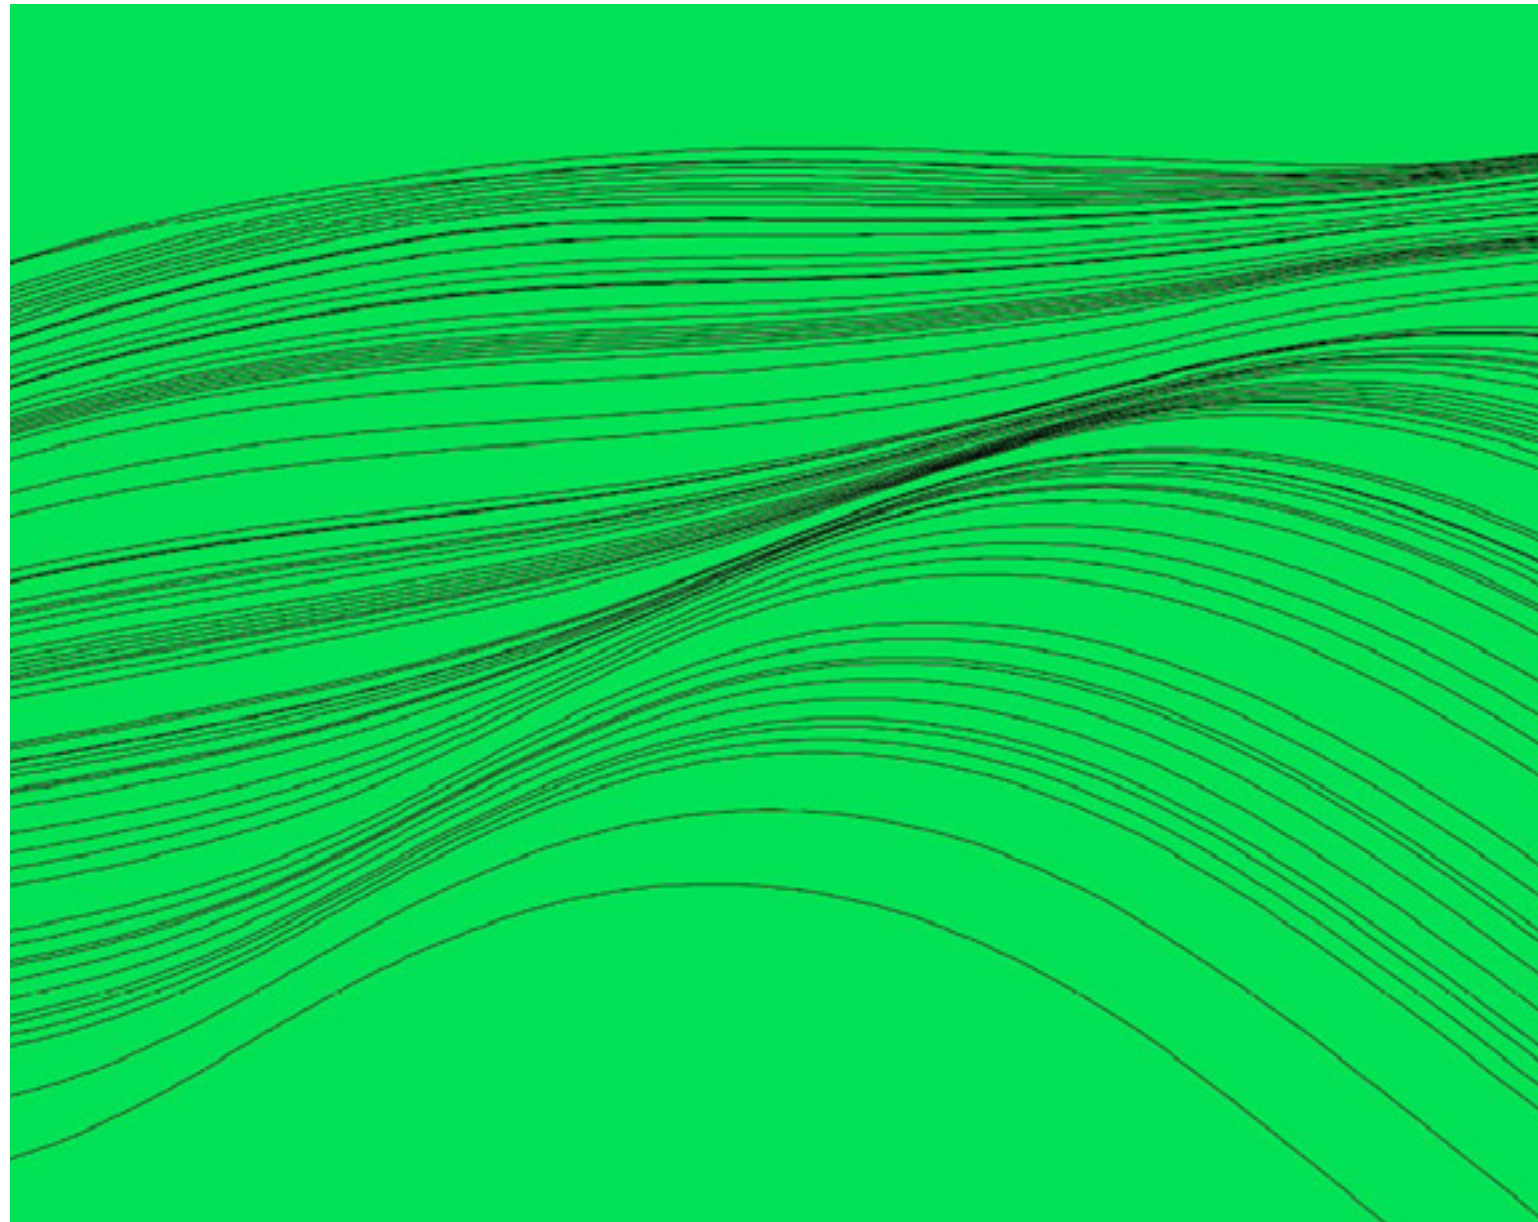

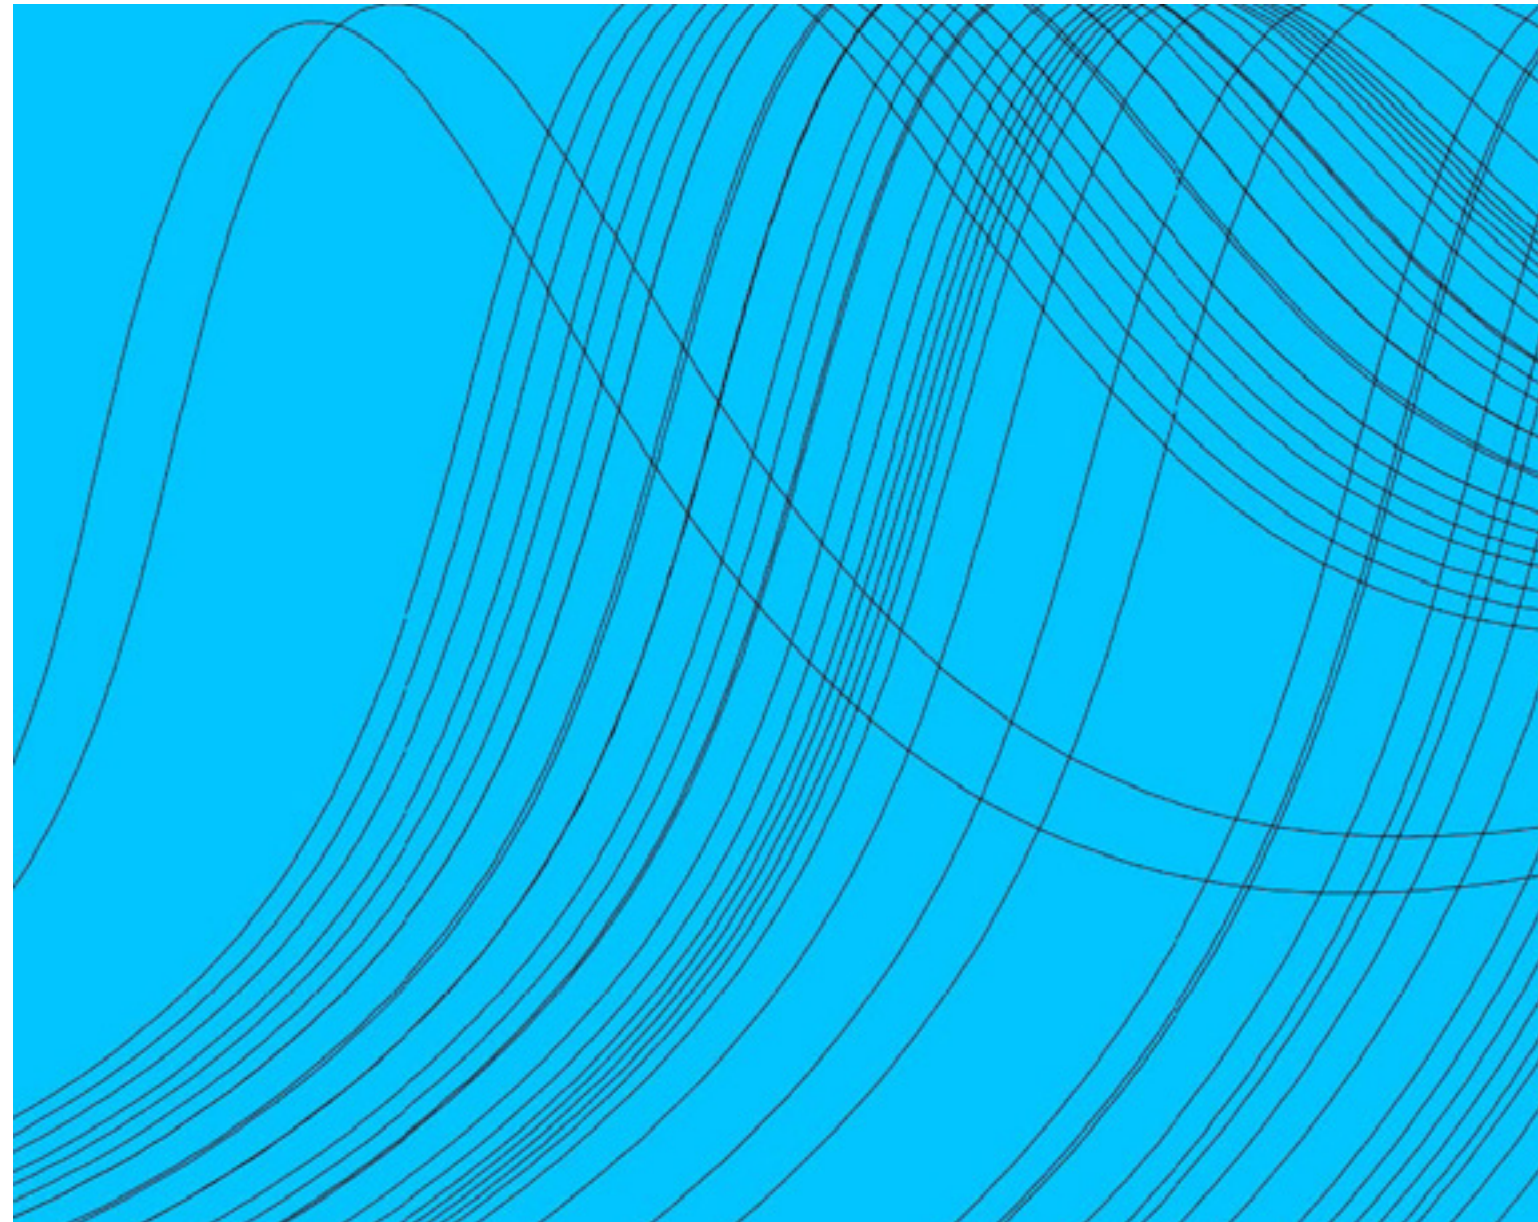

Misuse

Energy Currents may not be placed on our accent-only colors or on colors outside the Brunswick palette.

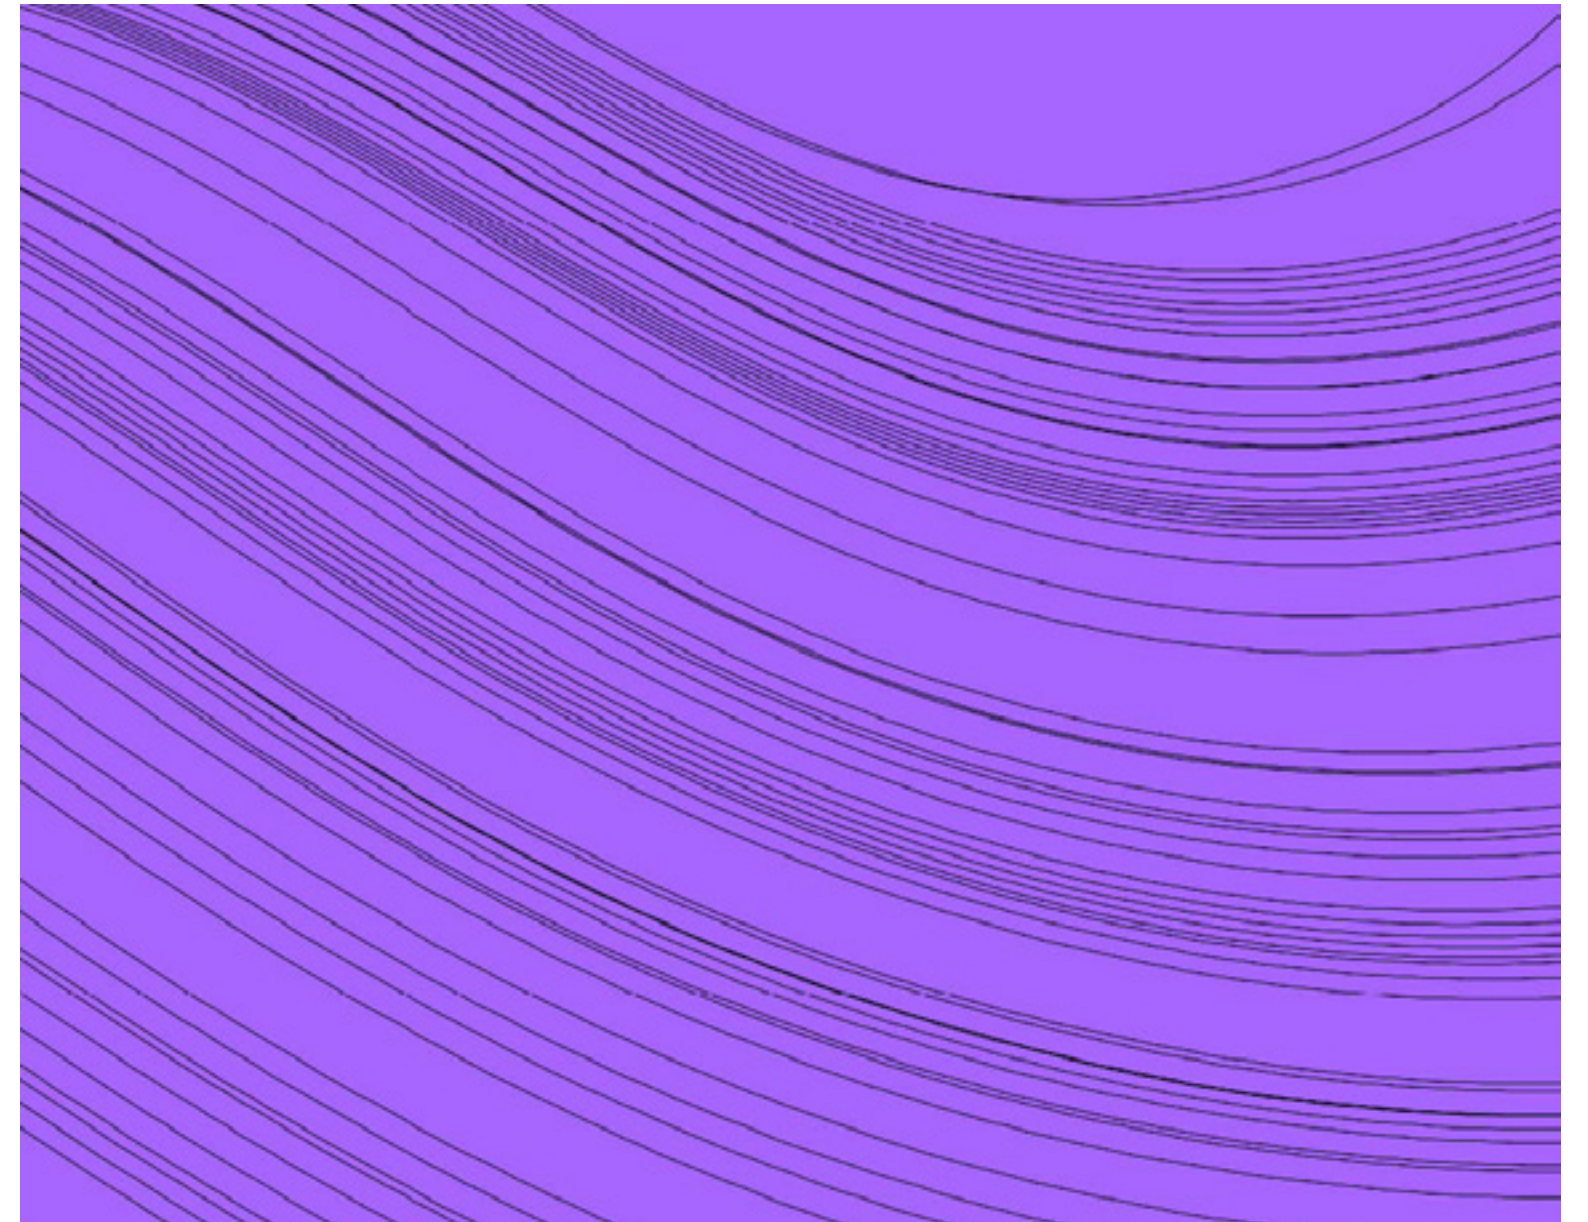

✖ The Energy Current should not be placed on Accent Green

✖ The Energy Current should not be placed on Accent Blue

✖ The Energy Current should not be placed on Accent Purple

Energy Current + Images

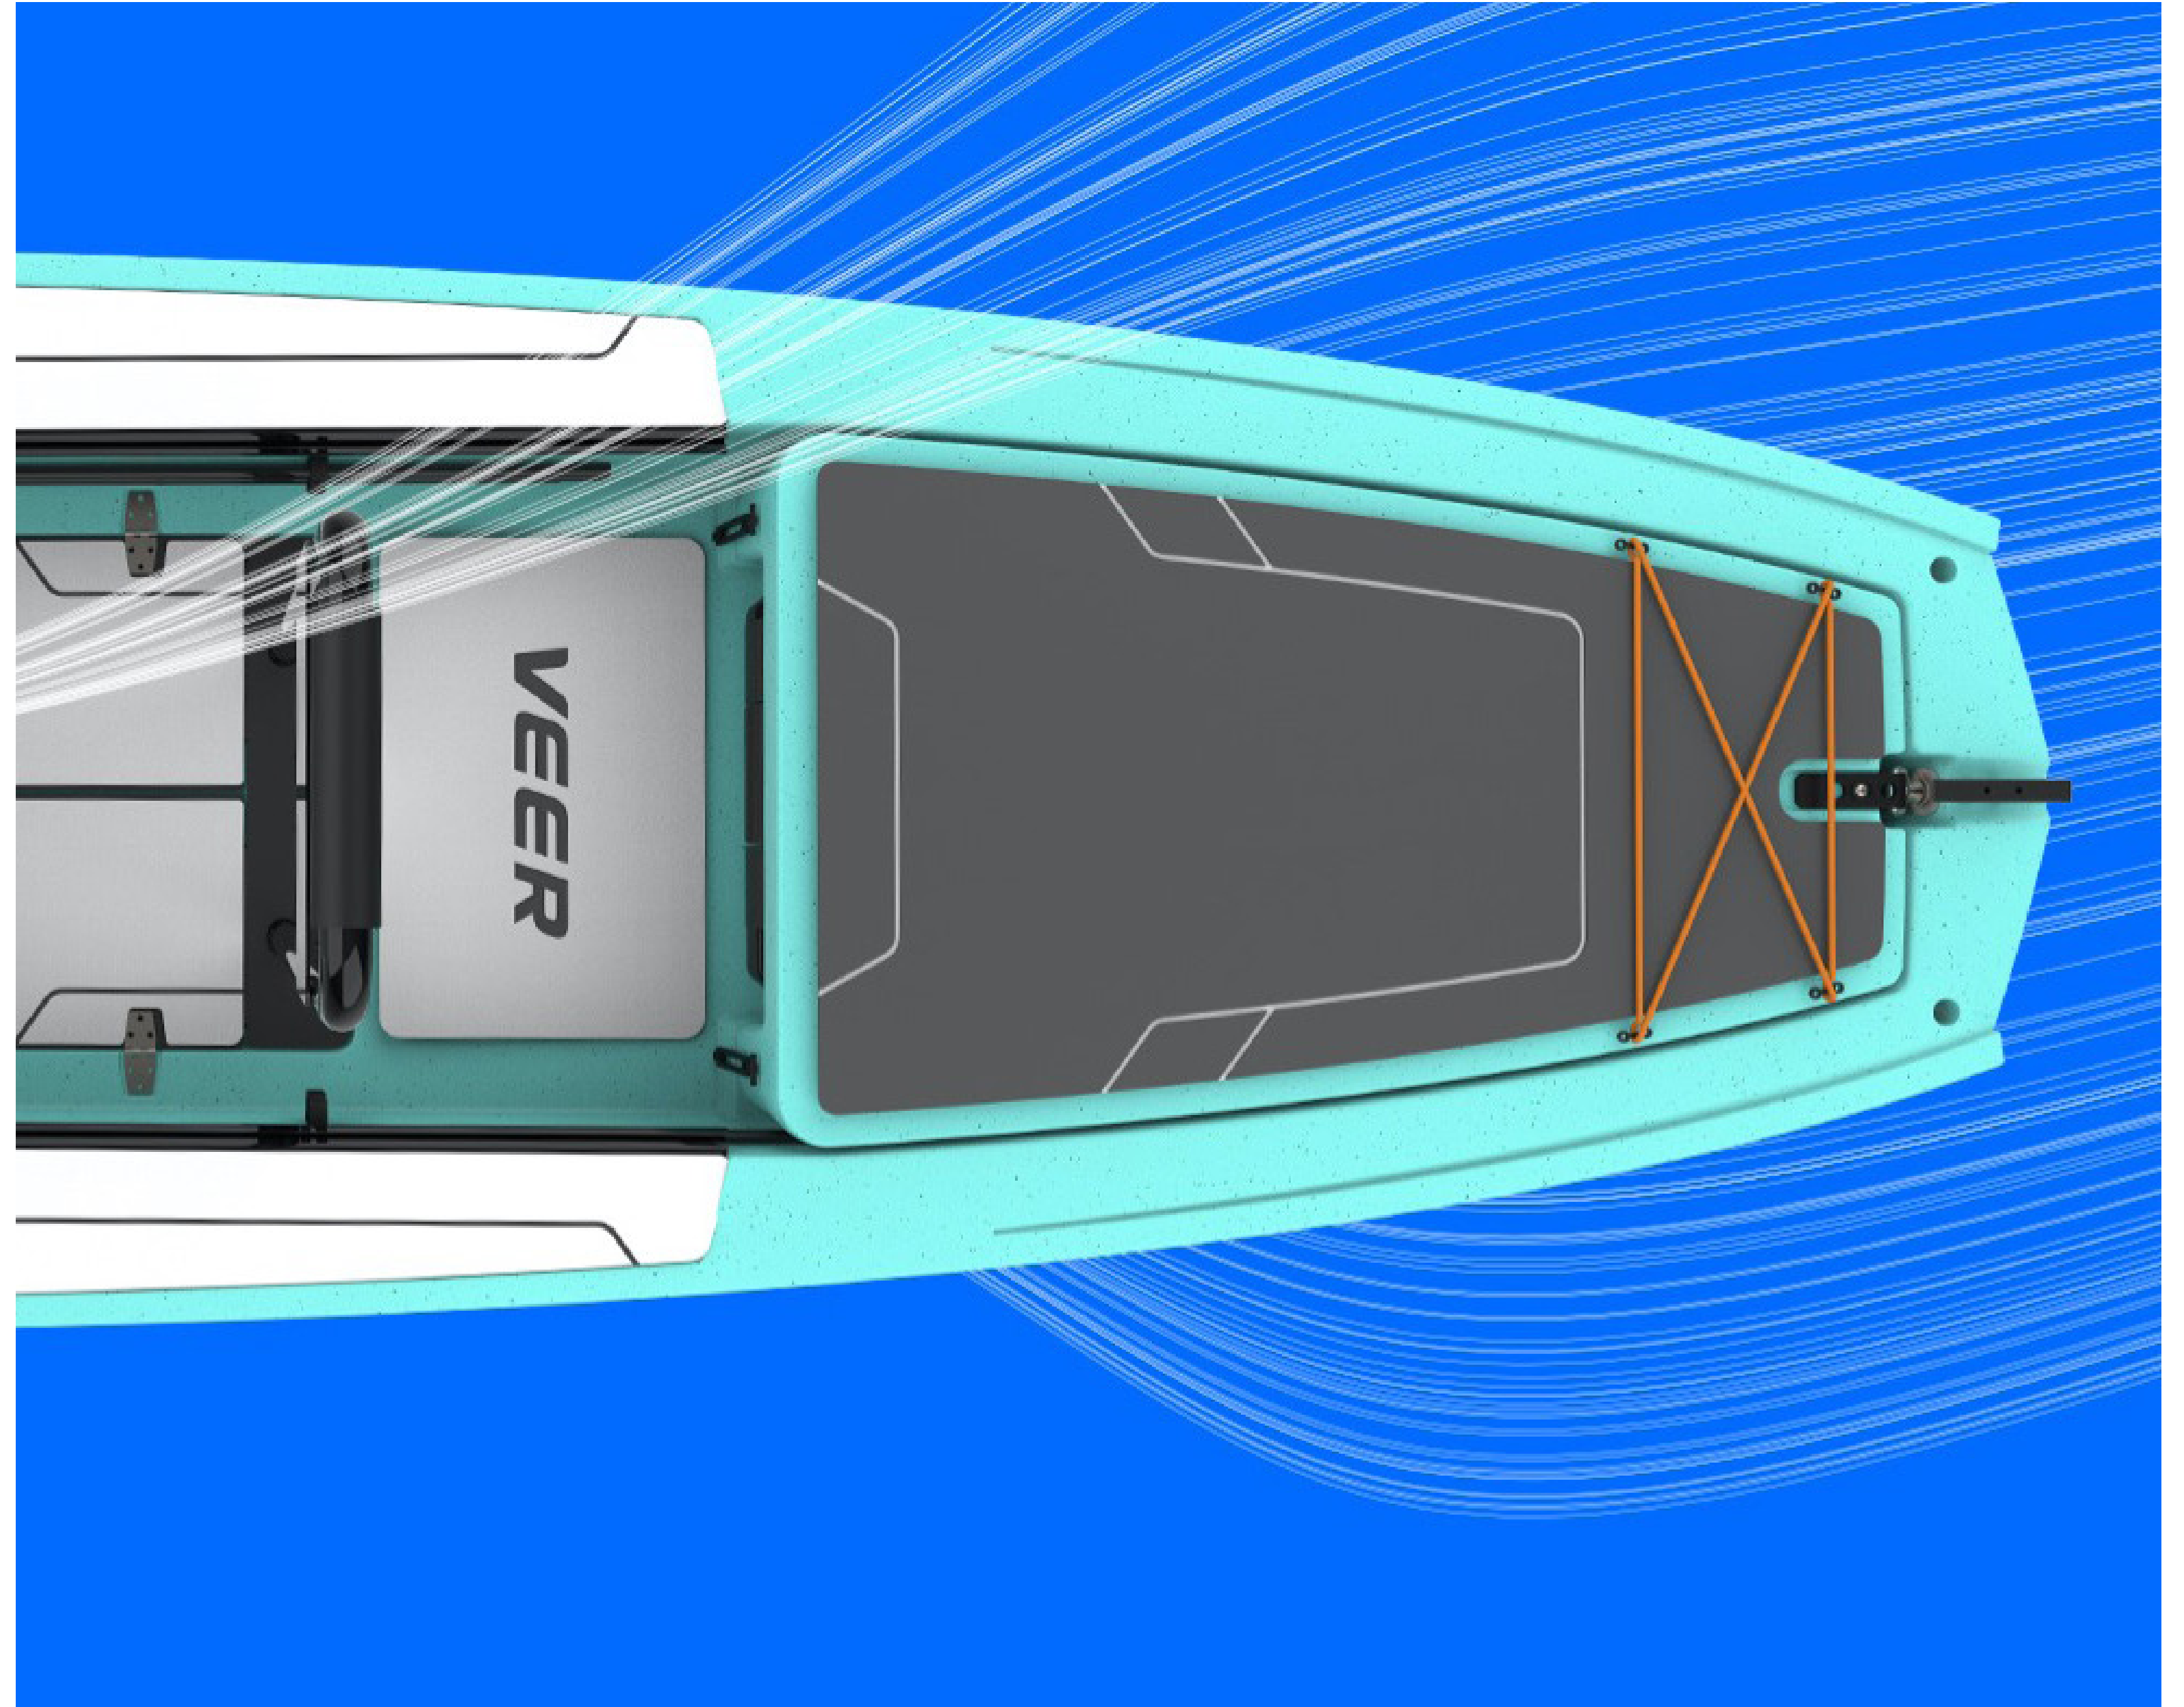

An Energy Current may be used with an image to create compelling moments and visual stories.

There are various ways to combine imagery and Energy Currents, shown on the following pages:

- (1) Cut out image in front of Energy Current
- (2) Image cropped by Energy Current
- (3) Cut out image interwoven with Energy Current

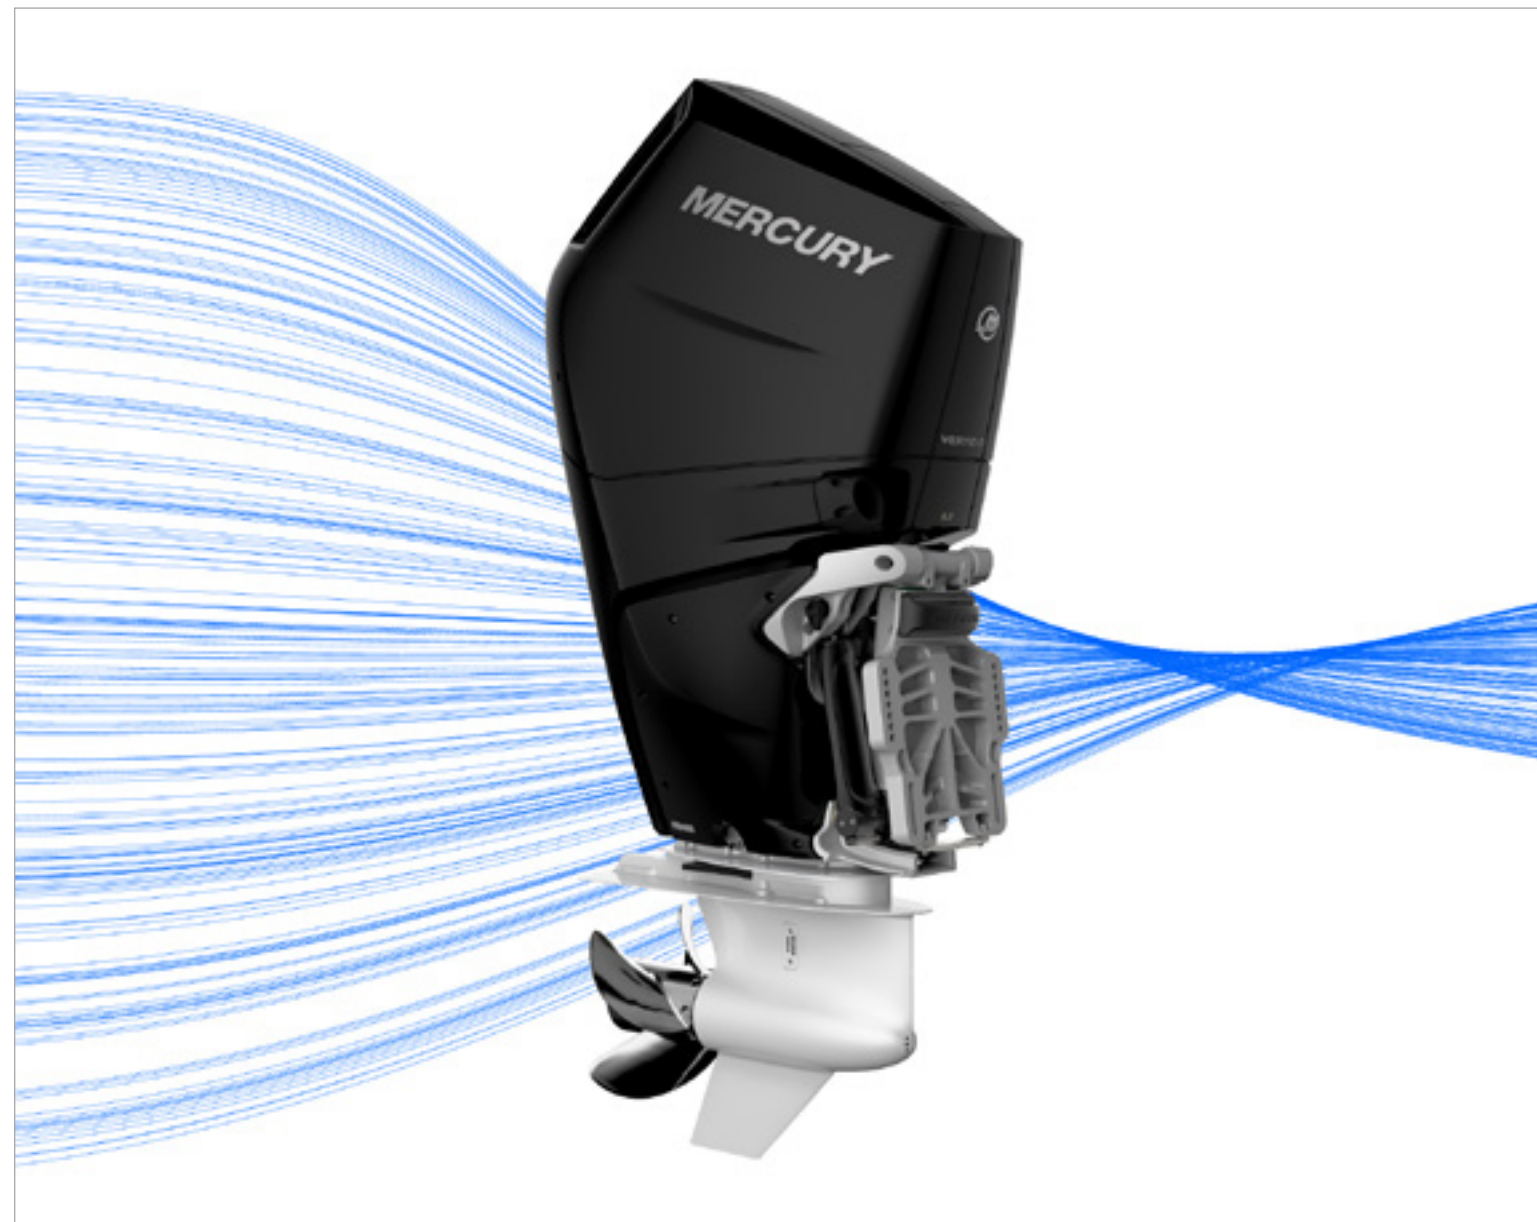

Note:

For use with an image of a person, the person must be placed completely in front of the Energy Currents, never interwoven, in order to avoid awkward or uncomfortable appearance of entanglement.

Energy Current + Images — Usage

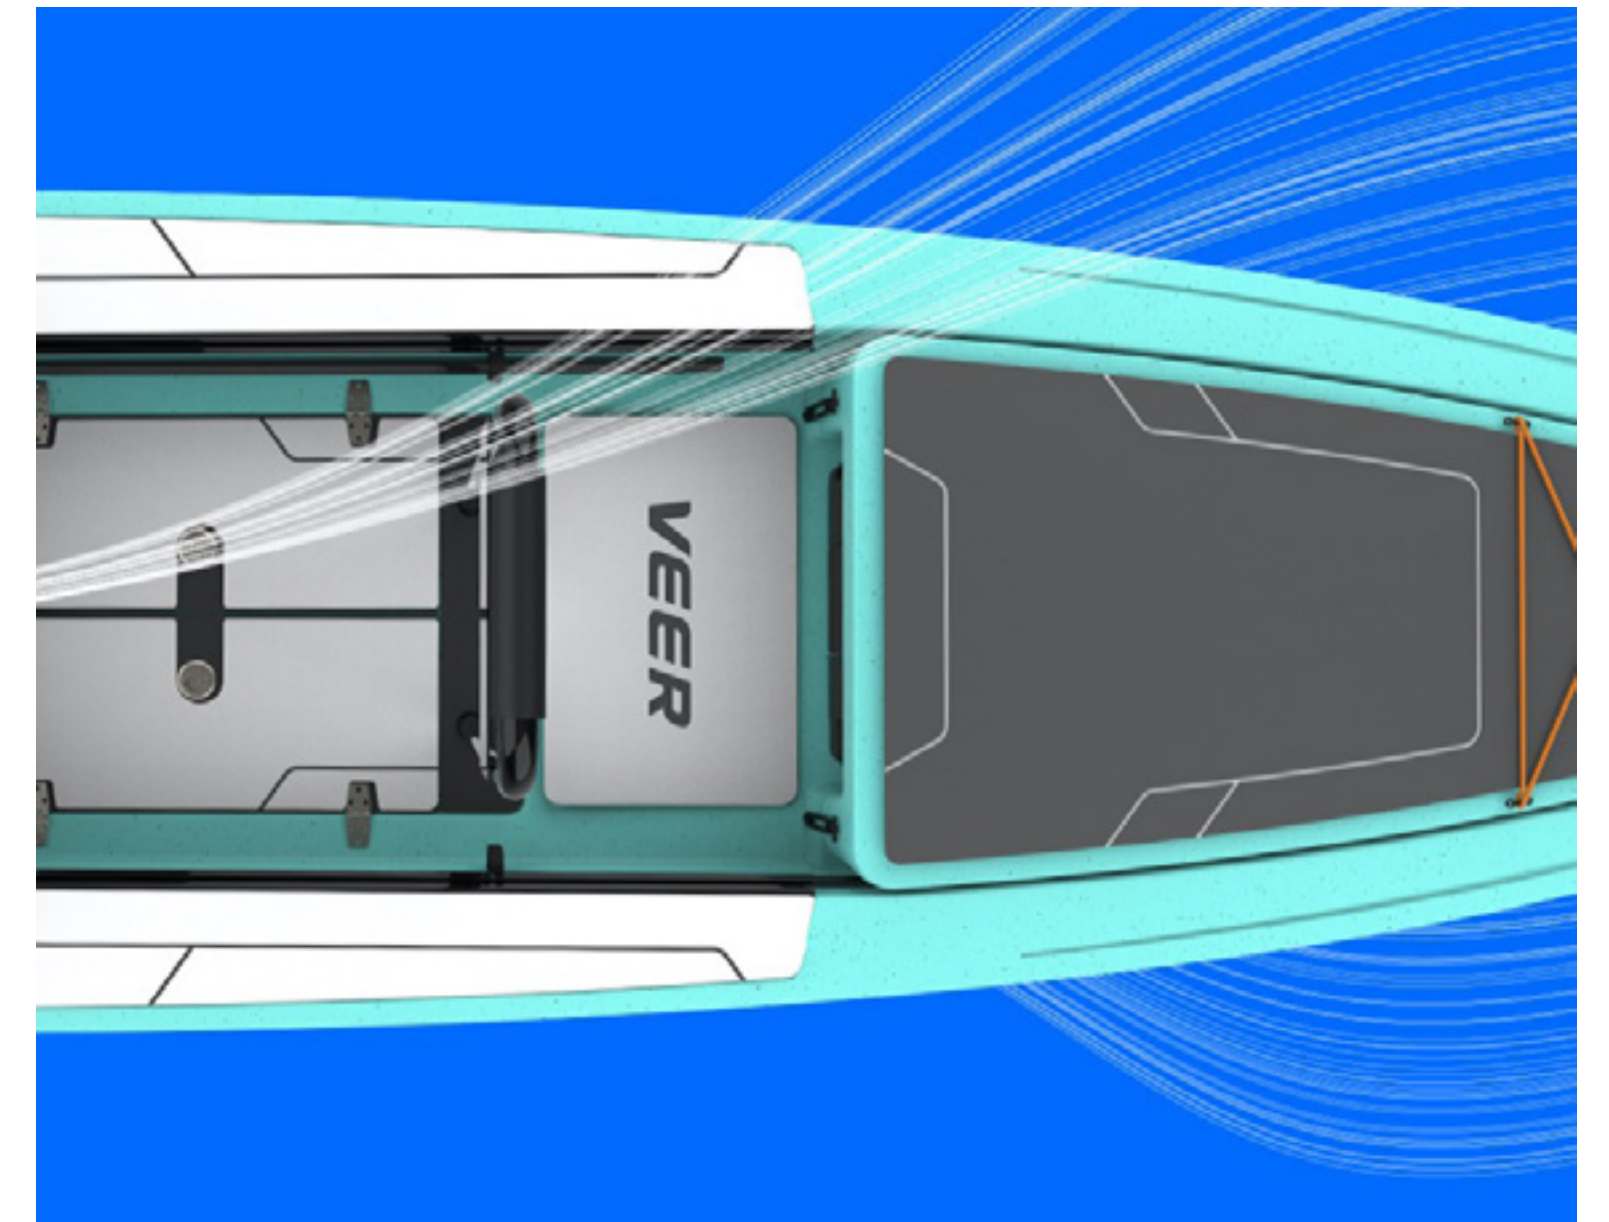

(1) Cut out image in front of Energy Current

(2) Image cropped by Energy Current

(3) Cut out image interwoven with Energy Current

Energy Current + Headlines

Our Energy Current graphic elements can be used to highlight and add emphasis to a title, headline or display text. This conveys the effect of type in motion within an expansive 3D space.

There are several treatment options, shown on the following pages:

- (1) Text in front of Energy Current
- (2) Text cropped by Energy Current
- (3) Text interwoven with Energy Current

Energy Current

+ Headlines — Usage

(1) Text in front of Energy Current

(2) Text cropped by Energy Current

(3) Text interwoven with Energy Current

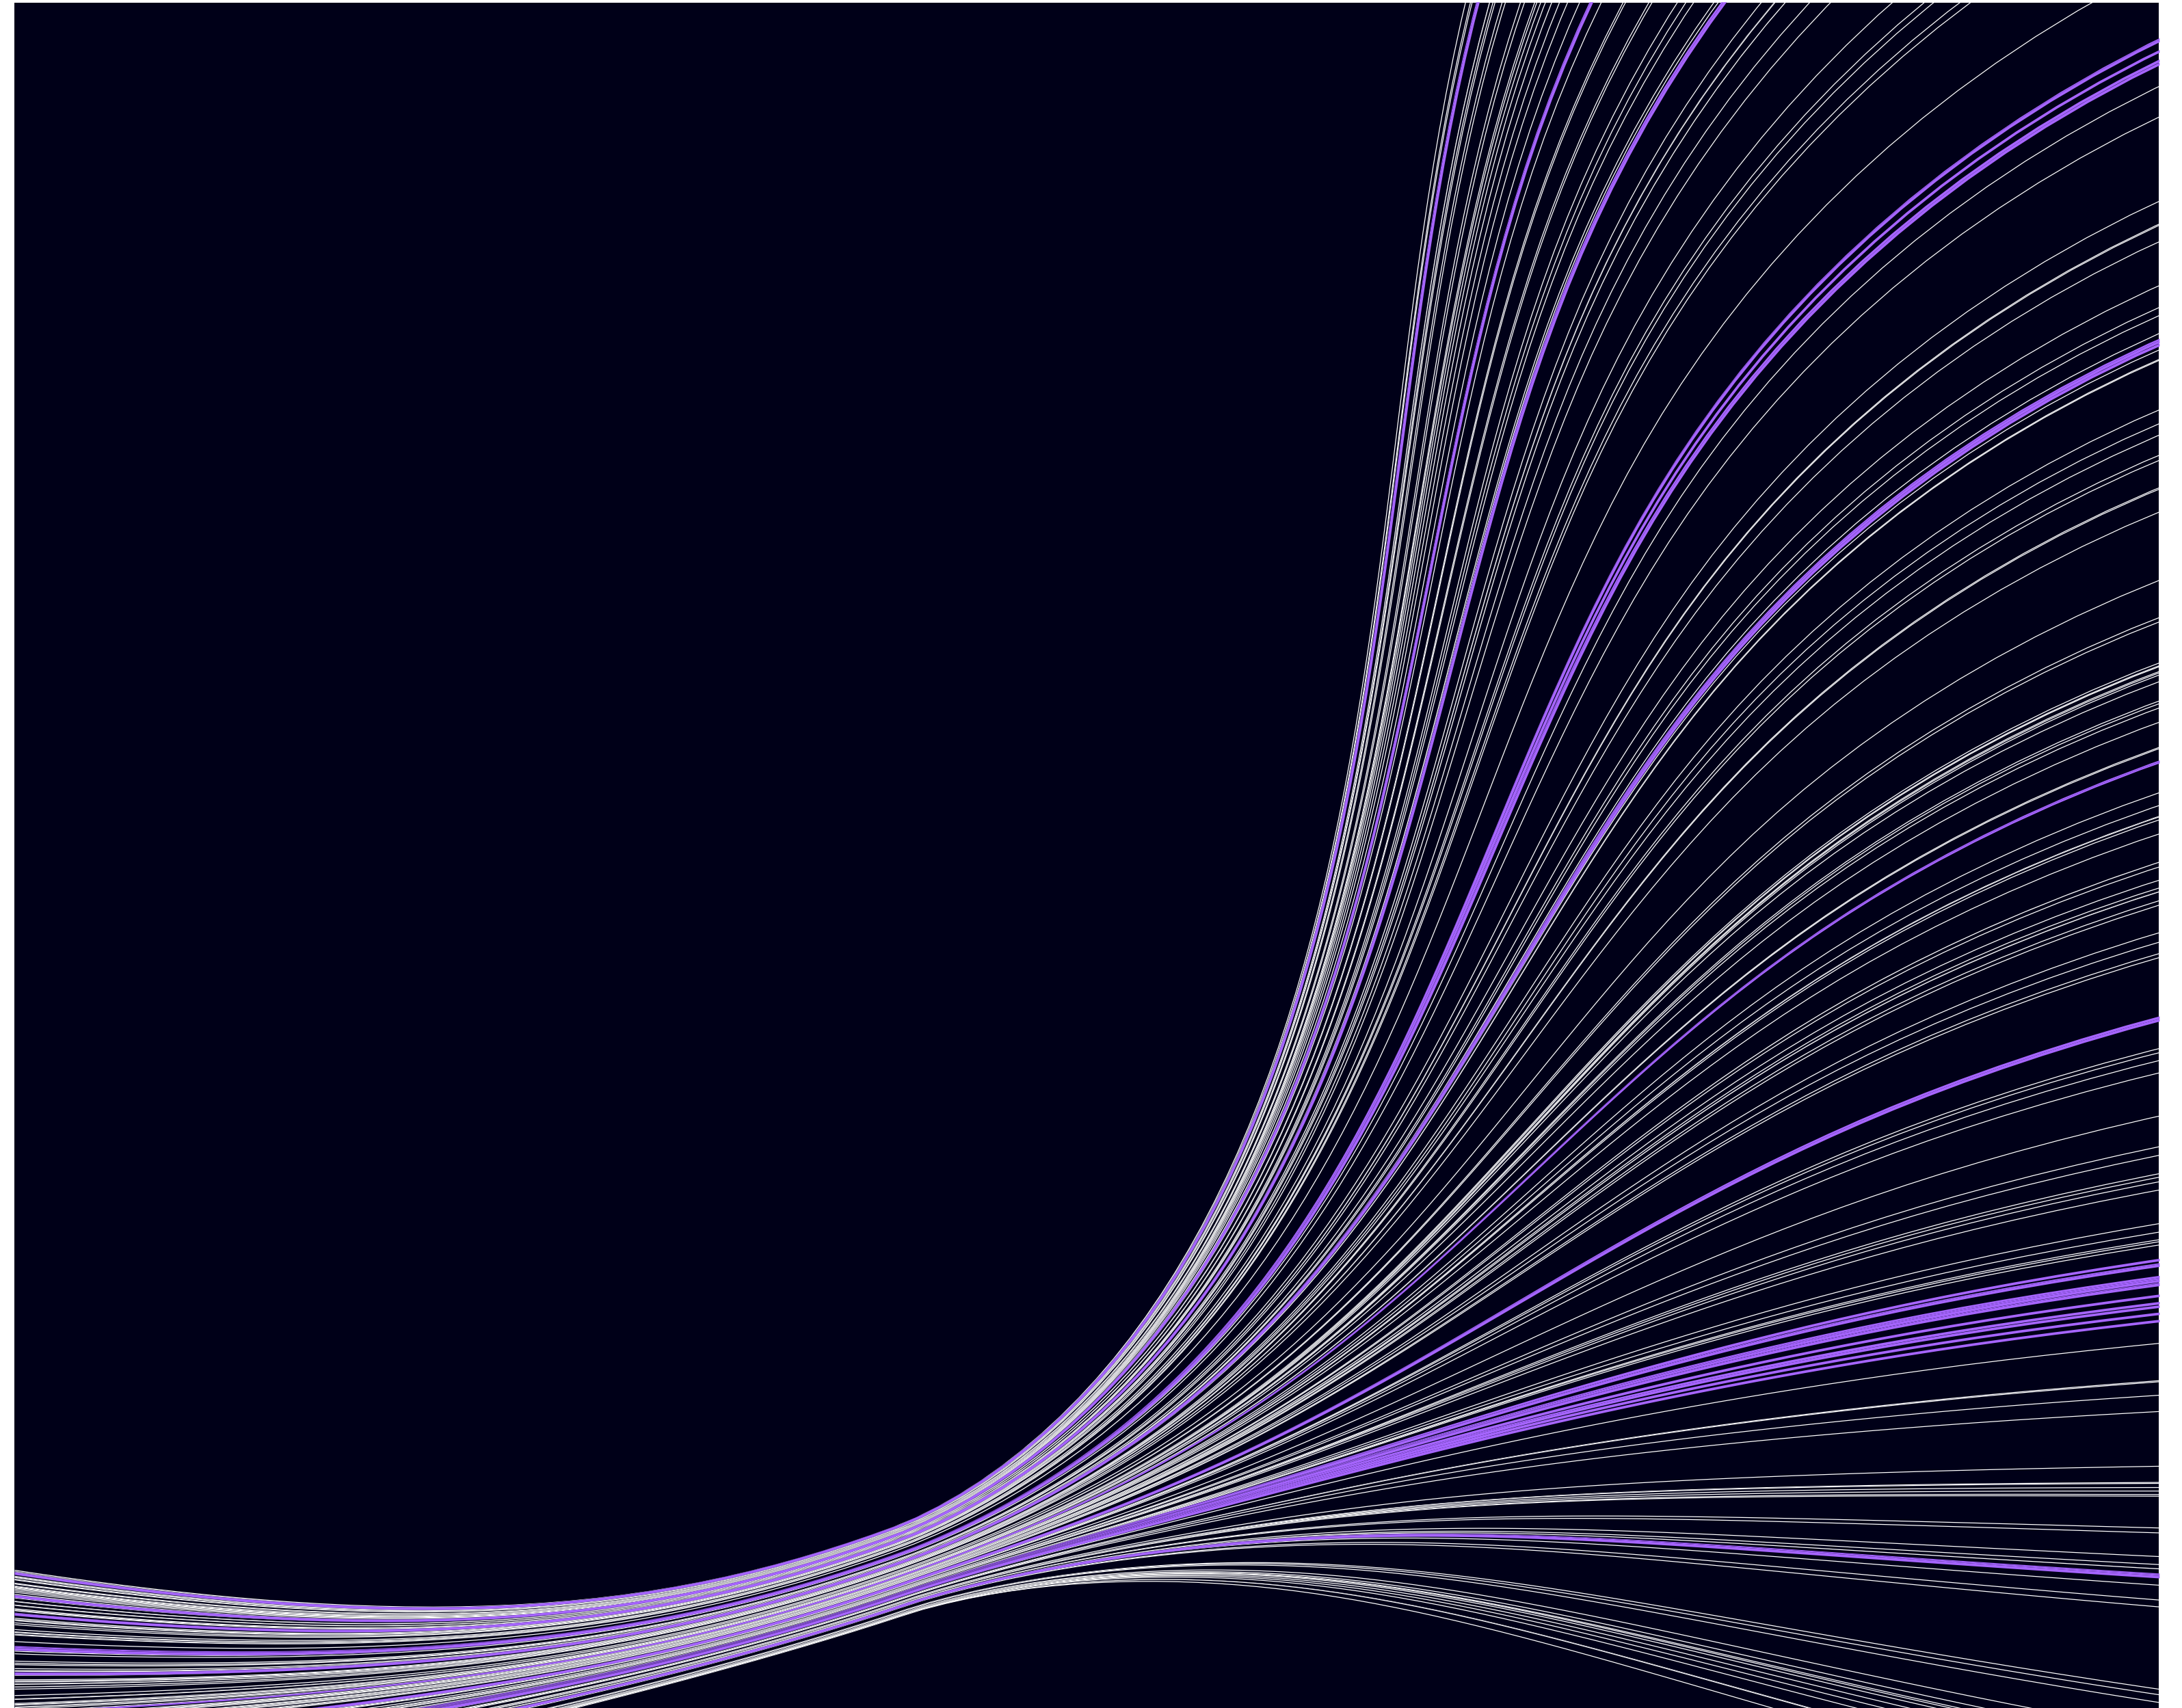

Energy Current + Pop of Color

Our brand identity is a dynamic, flexible system that allows for expressive use of its graphic elements. To symbolize and emphasize energy moving through the Energy Current a pop of color can be used.

Only the Accent colors can be used for the Pop of Color treatment: Accent Blue, Accent Green or Accent Purple. Use only one accent color at a time; never use multiple colors in an Energy Current.

There are several options, shown on the following pages and for Pop of Color treatments:

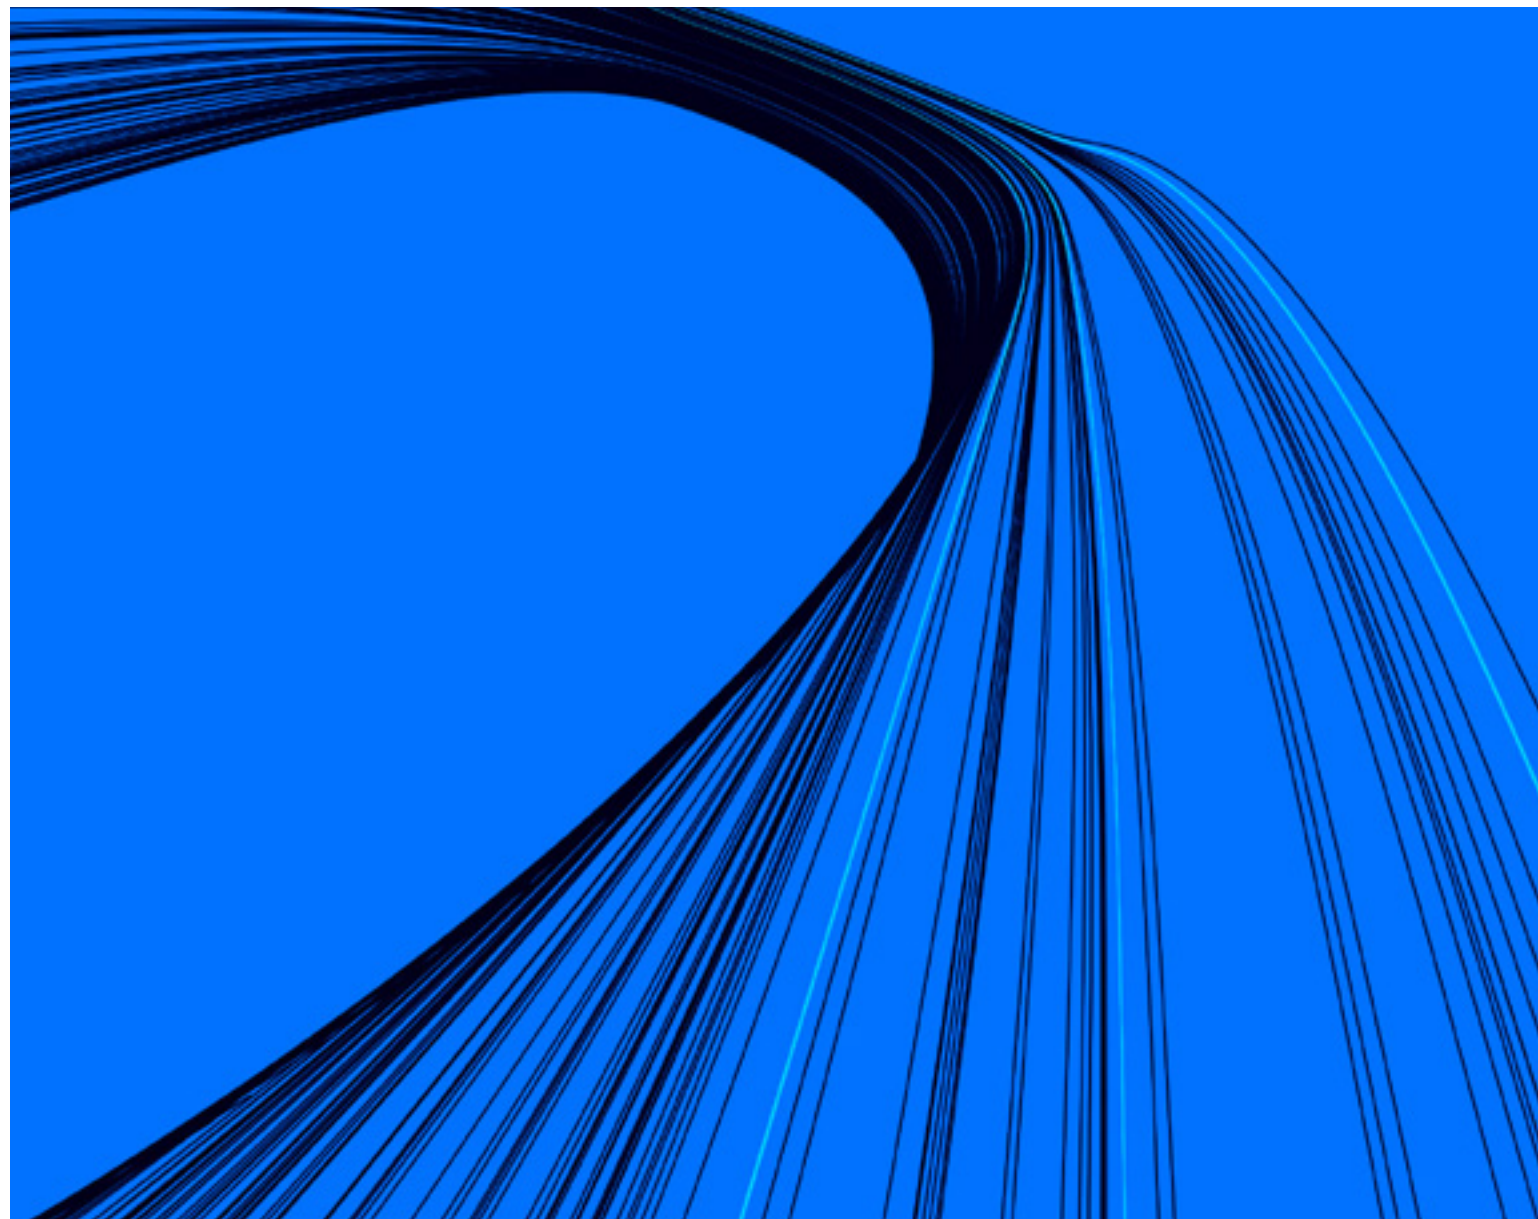

- (1) Several small color sections
- (2) Medium color section(s)
- (3) One thick color line

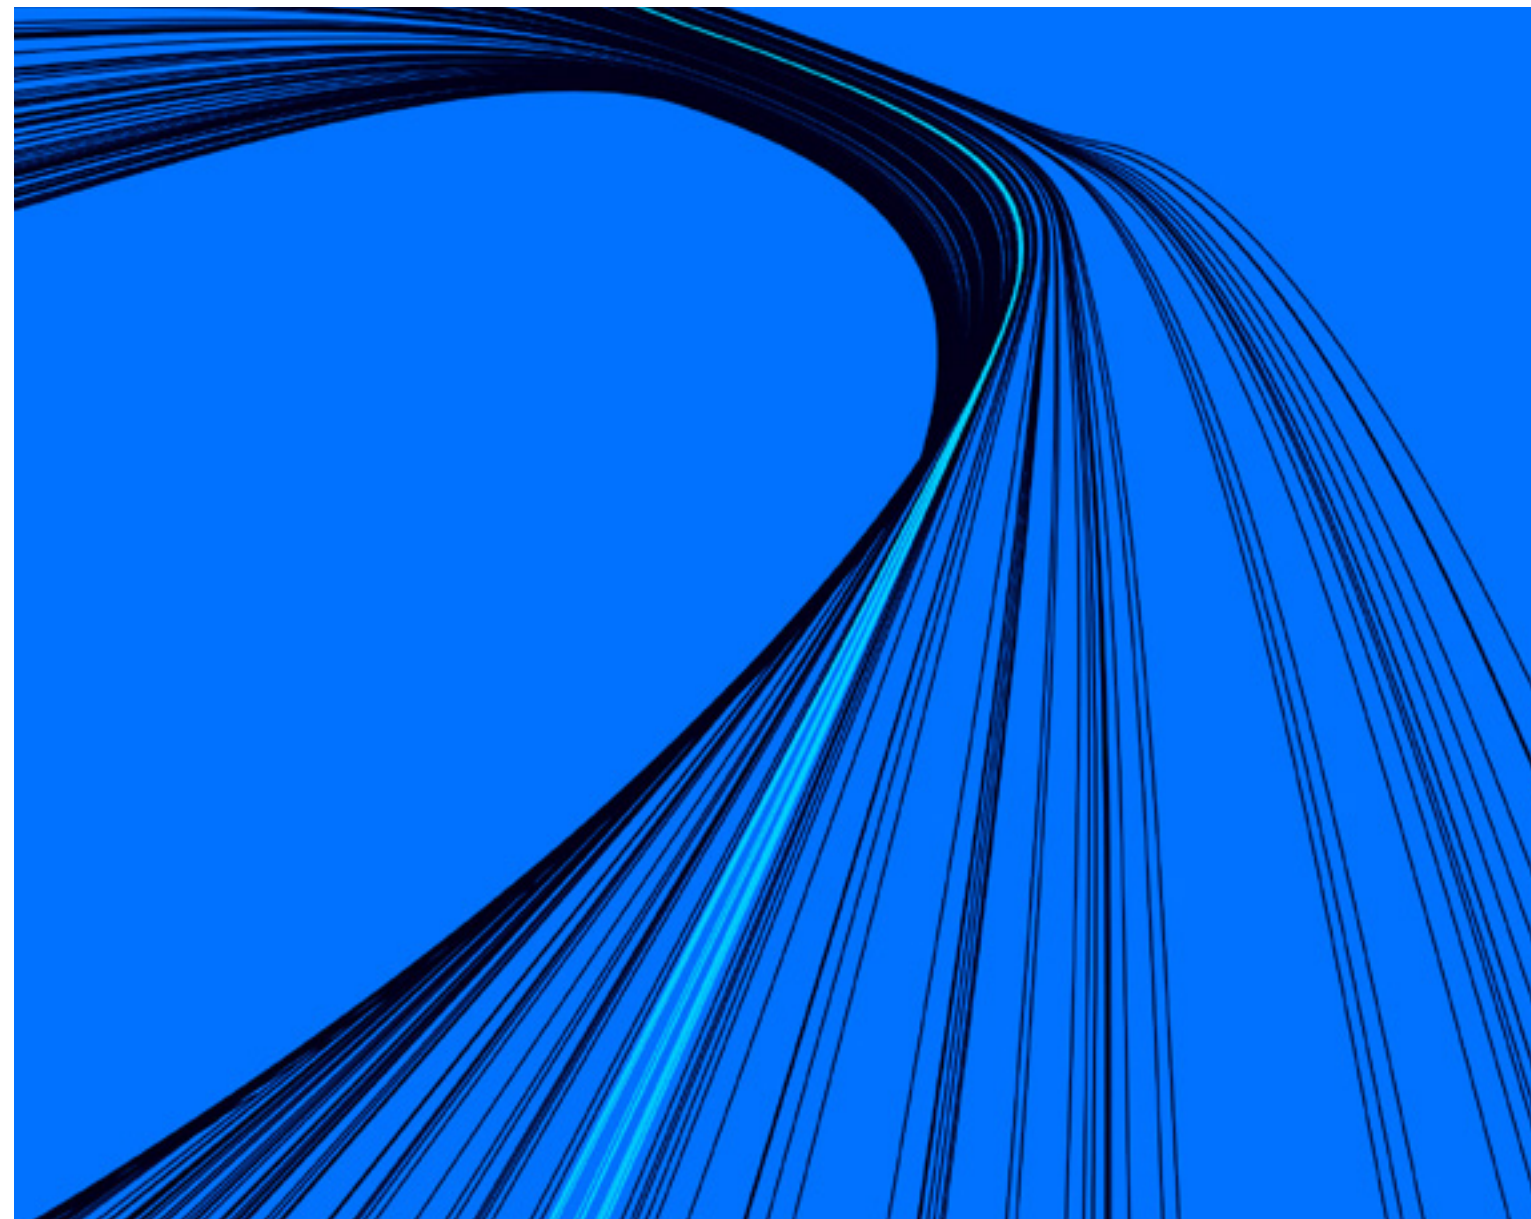

Energy Current

+ Pop of Color — Usage

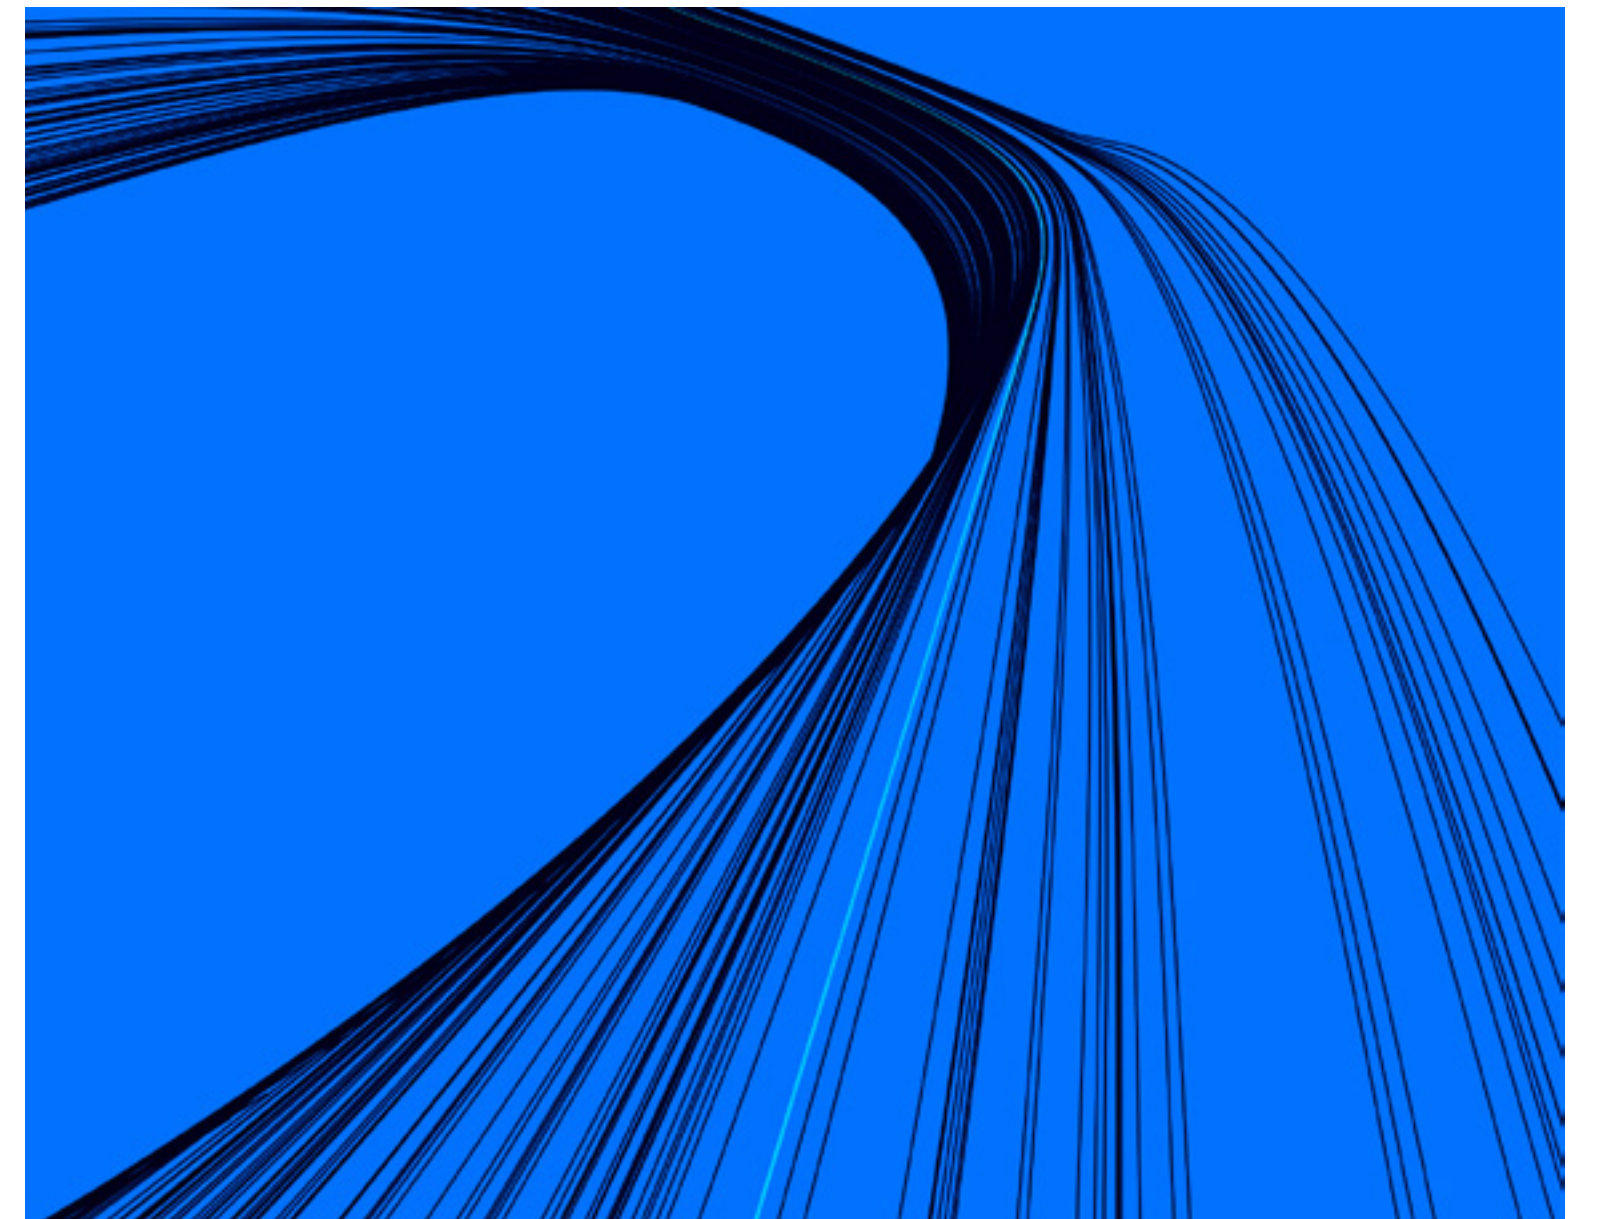

(1) Several small color sections

(2) Medium color section(s)

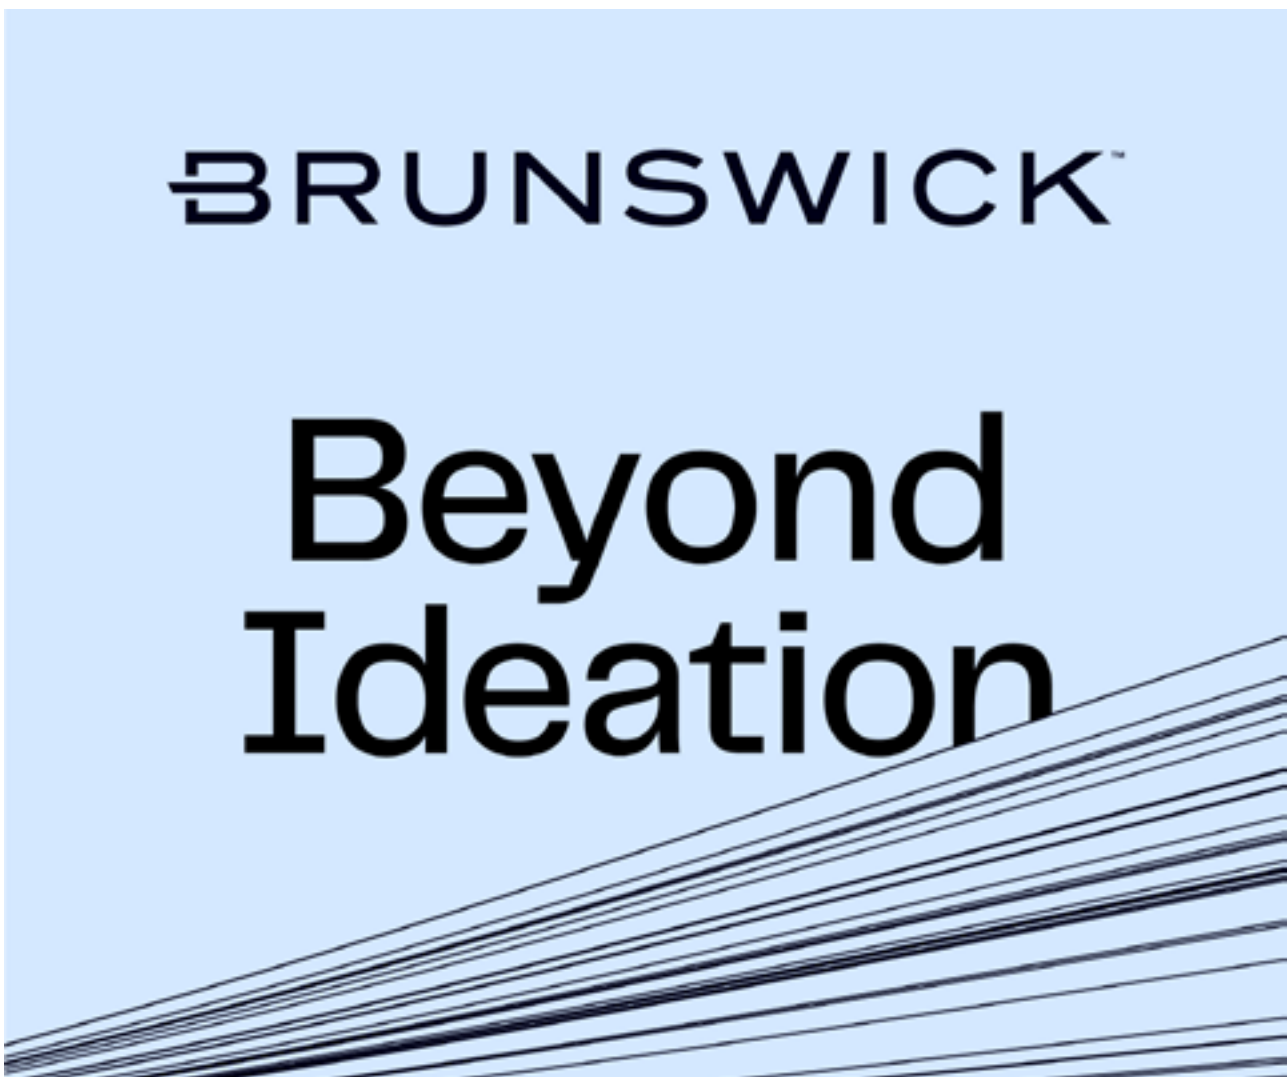

(3) One thick color line

Energy Current Small Application

In smaller applications, the current should be larger and zoomed in and used in a way that draws your attention toward the message or content.

Energy Current + People

For use with an image of a person, the person must be placed completely in front of the Energy Currents, never interwoven, in order to avoid awkward or uncomfortable appearance of entanglement. Images used should have a very simple background or a solid color.

There are several options, shown on the following pages:

- (1) Headshot
- (2) Lifestyle
- (3) Full Body, Branded

Energy Current + People — Usage

(1) Headshot

(2) Lifestyle

(3) Full Body, Branded

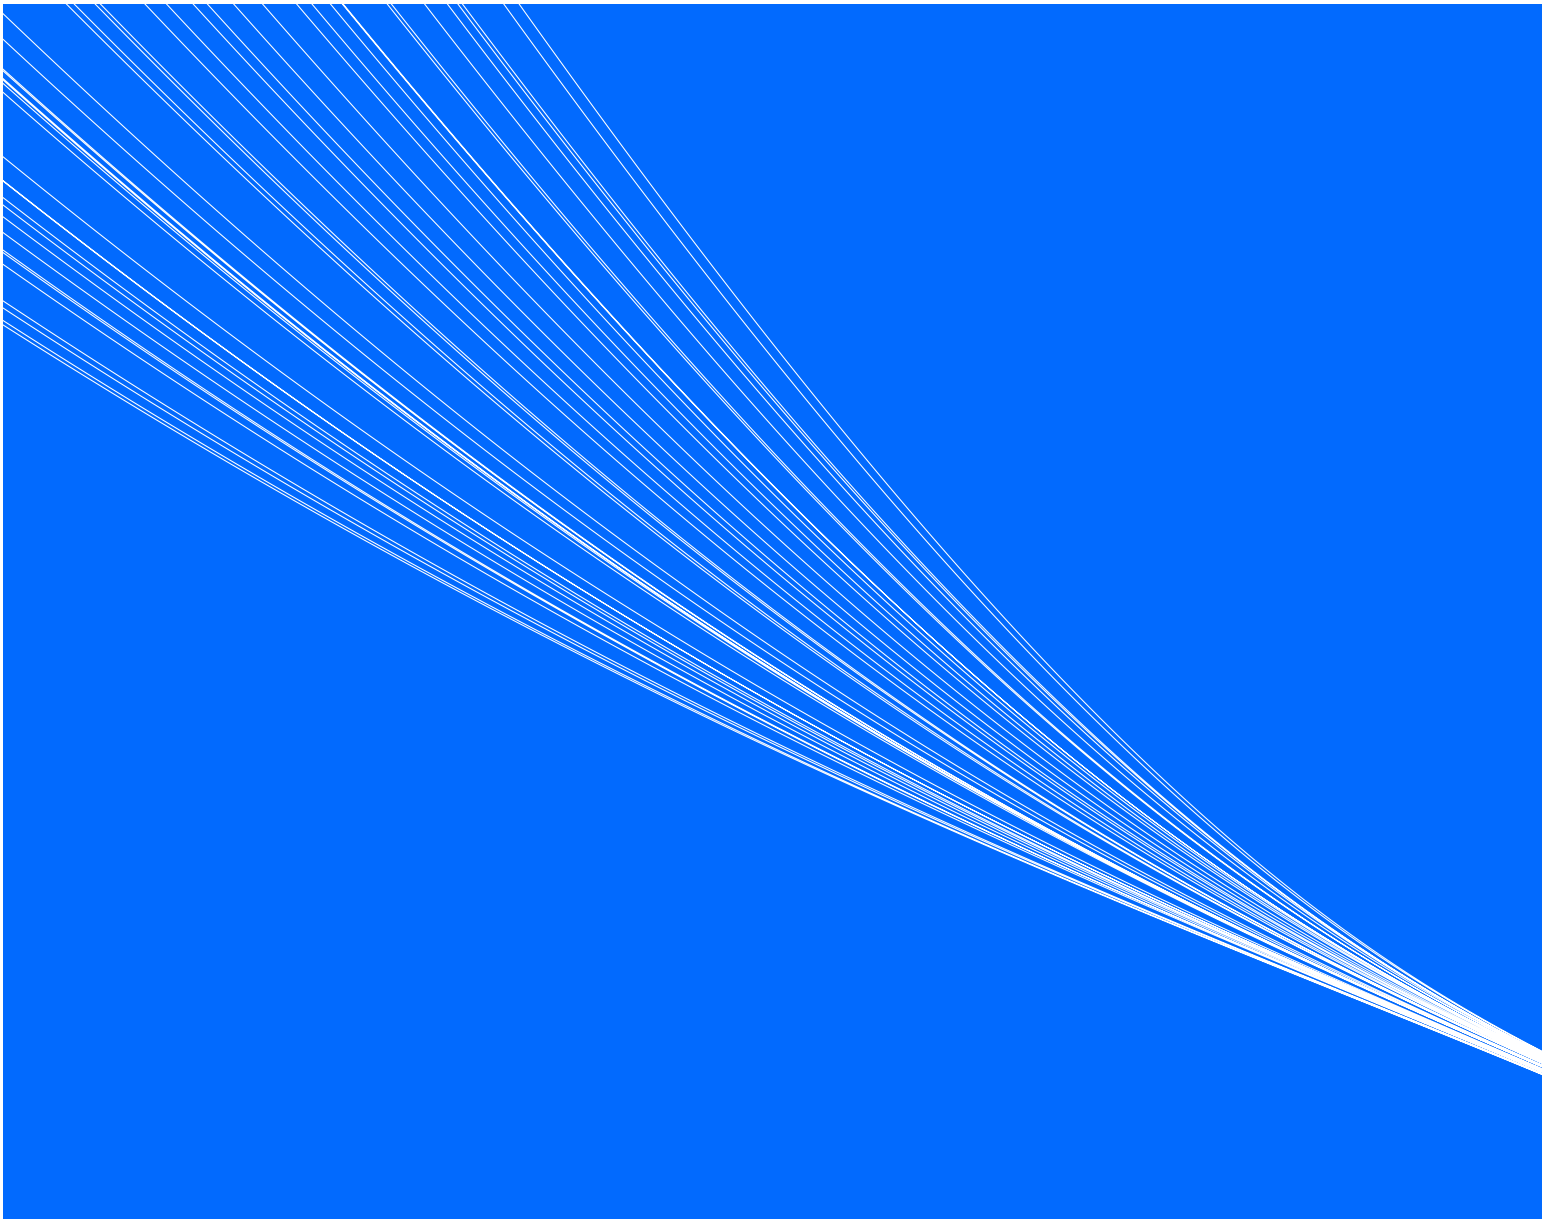

Energy Current

Live Line Usage

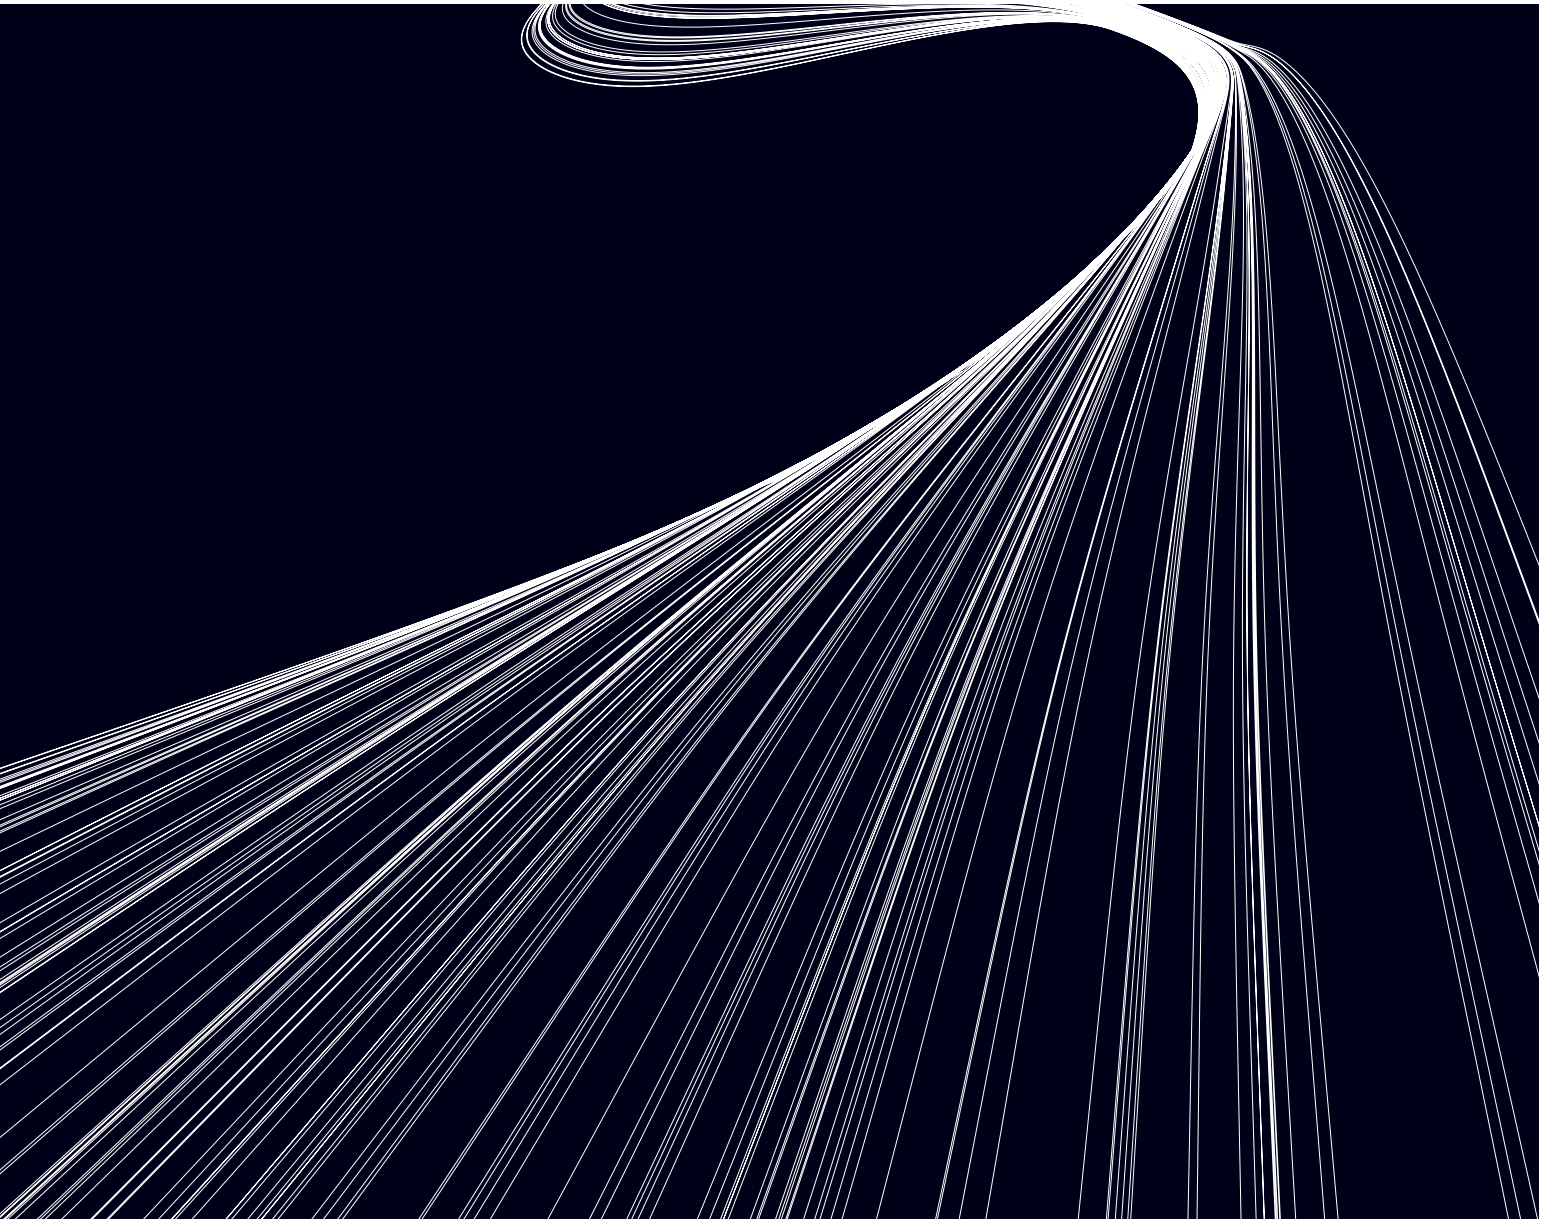

Line Weight

The Energy Currents are live stroke line art and the line weight can be adjusted. We always maintain the appearance of an elegant, sophisticated line weight, keeping the stroke thin while still readable and printable.

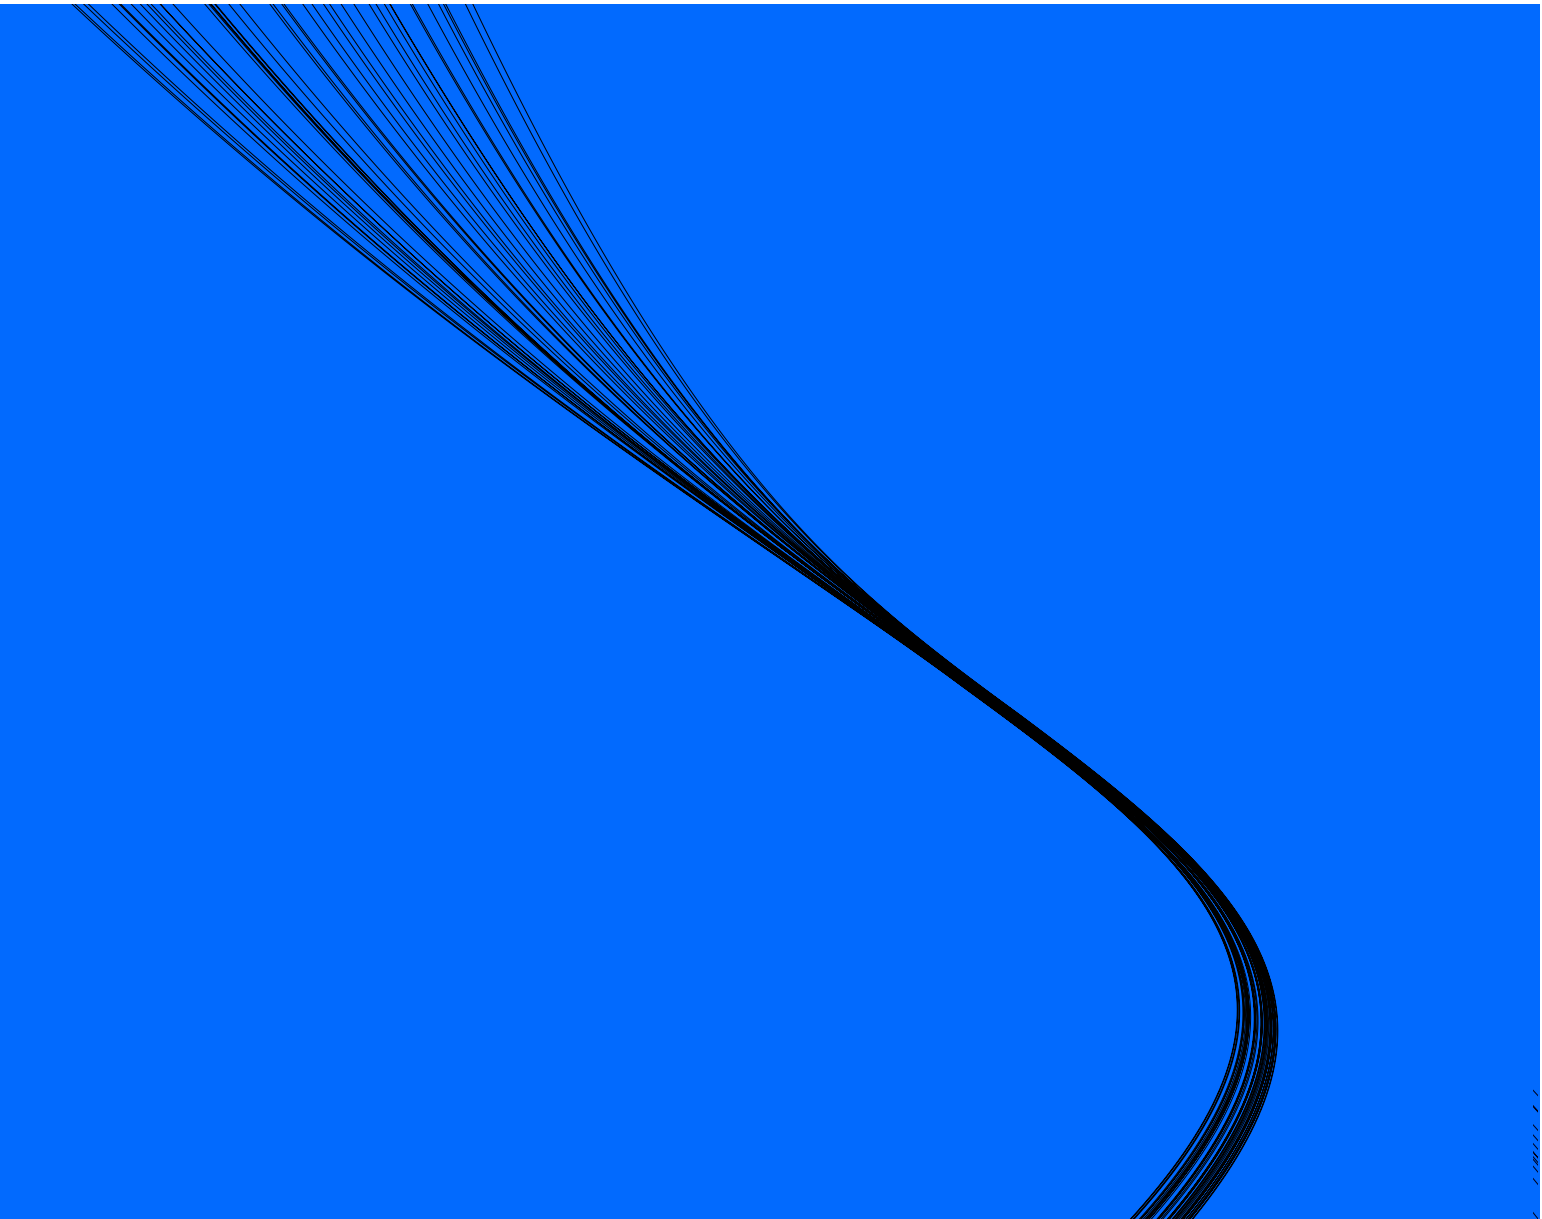

Scaling

When Energy Currents are scaled up or down, the line weight may be adjusted to maintain a thin, sophisticated look. Avoid scaling down so much that the Energy Current is difficult to see or print. When enlarged as a large hero graphic, use a fine line weight.

Cropping

Energy currents can be cropped any way that is sophisticated and elegant. They can be cropped to show a macro view of an interesting portion. Avoid awkward crops such as cropping at the complicated junctures. Avoid cropping out too little or too much.

2.5 – Iconography

Iconography – Overview

Solid constructions provide a consistent and dynamic foundation for the extensive system of iconography. These icons are built off a uniform line weight and basic geometry. Joints are rounded angles to create an orderly, functional and attractive visual rhythm.

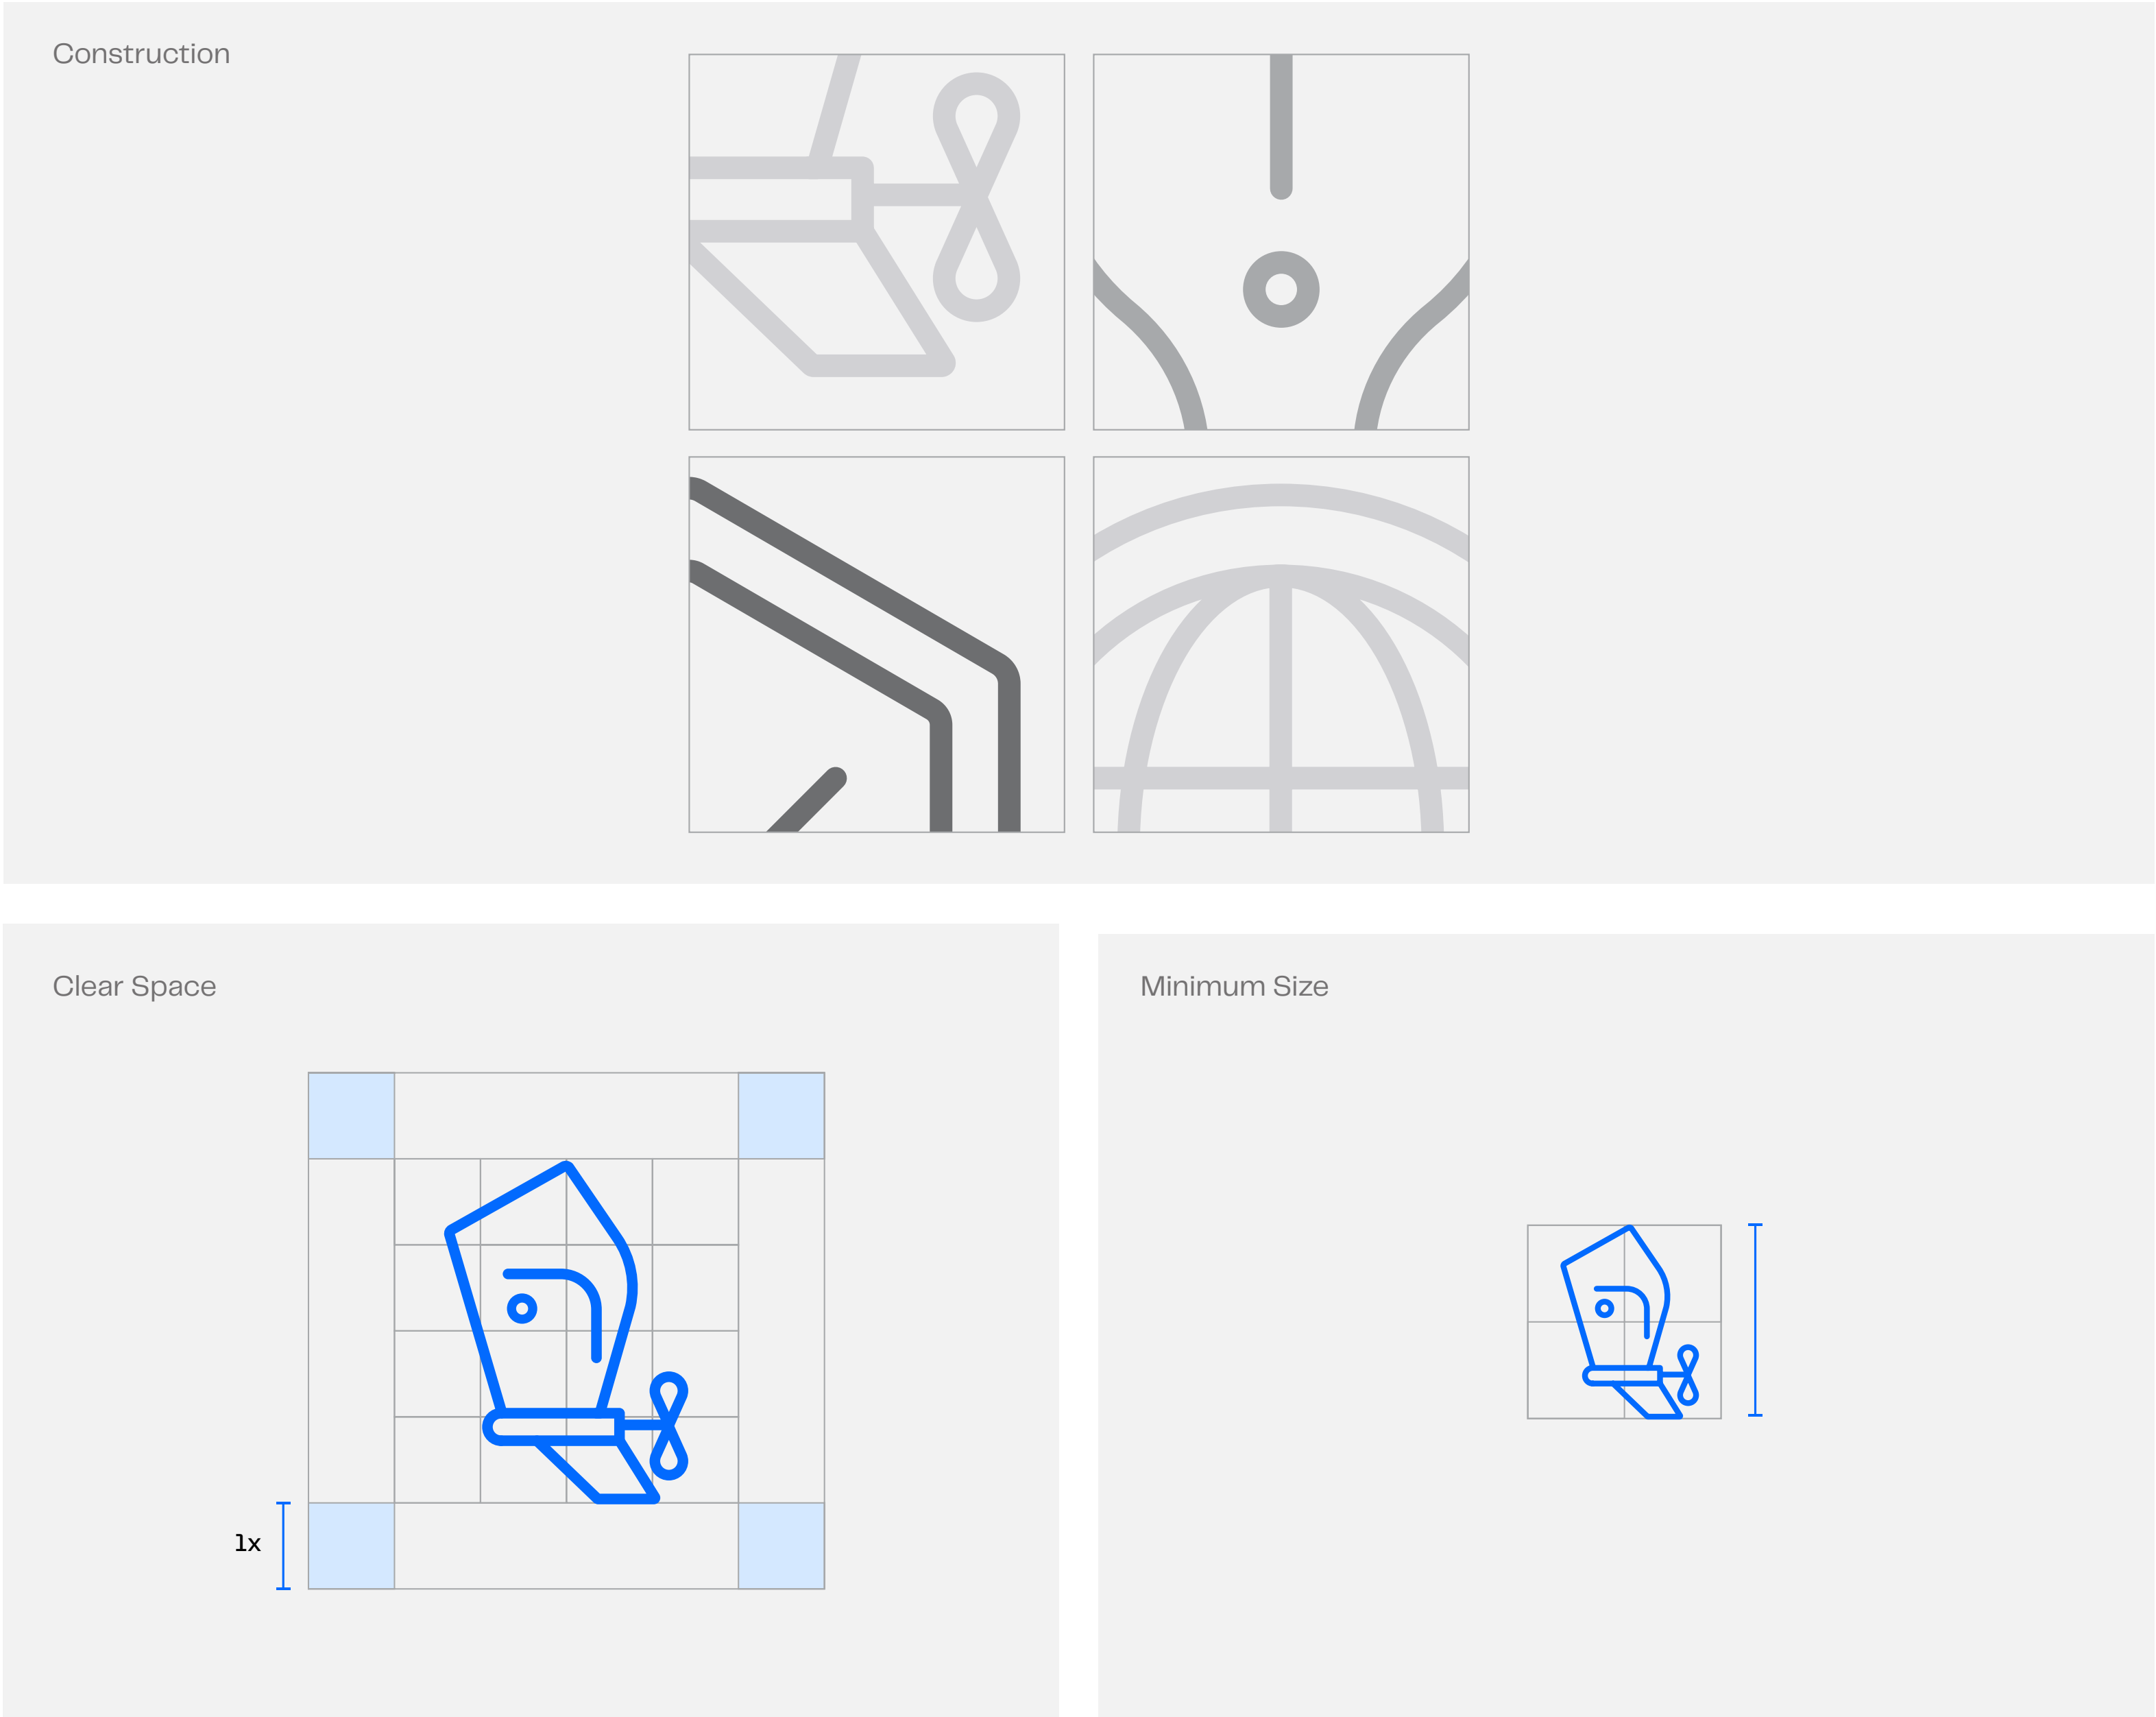

Iconography – Construction, Clear Space & Minimum Size

Minimum Size

Icons have been designed to retain high legibility across print and digital at a range of scales and distances. Visual integrity should be maintained at all times and will vary depending on the scale and resolution. Minimum size for iconography is 100 pixels.

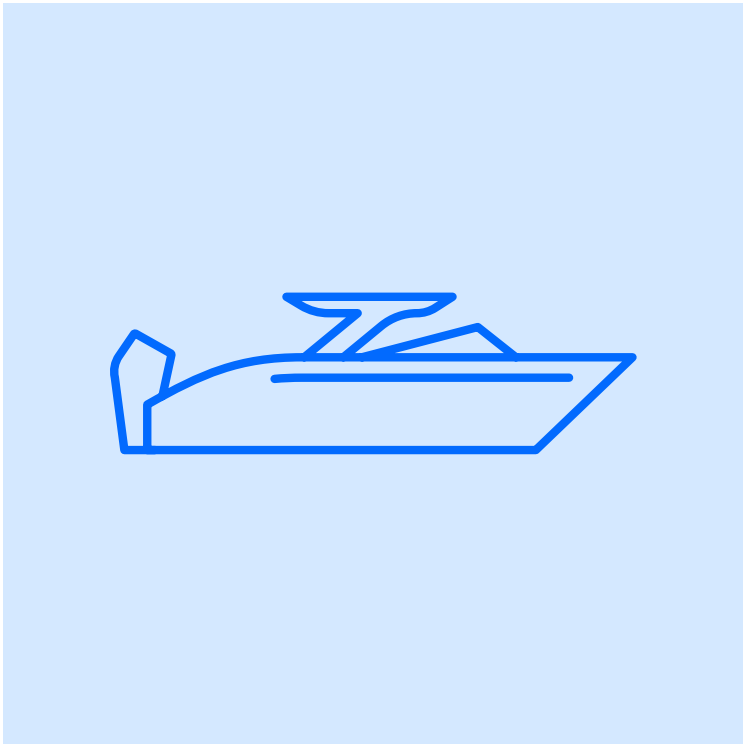

Clear Space

The clear space represents the minimum safe area around icons in application. This area should be kept free of other graphic elements, including other icons.

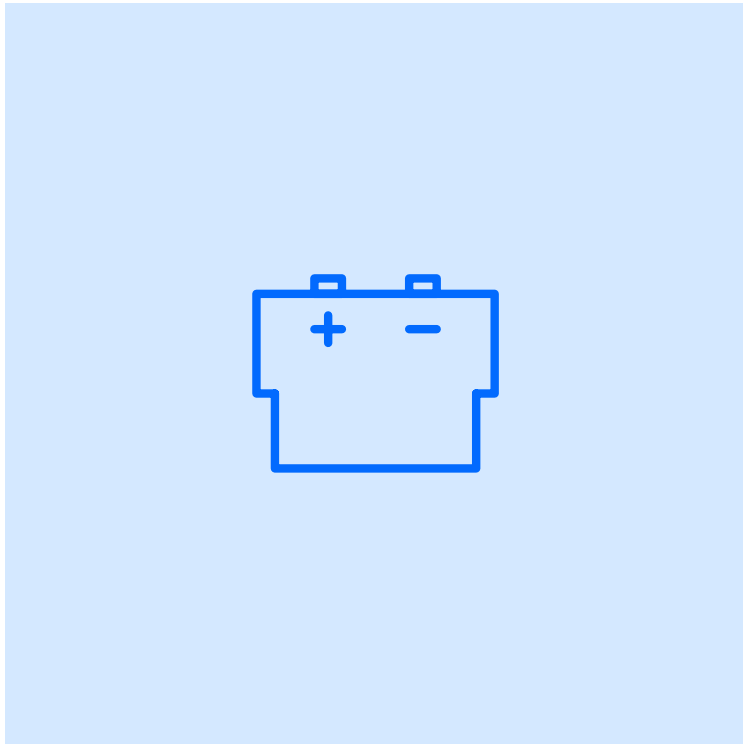

(1) Engine

(2) Boat

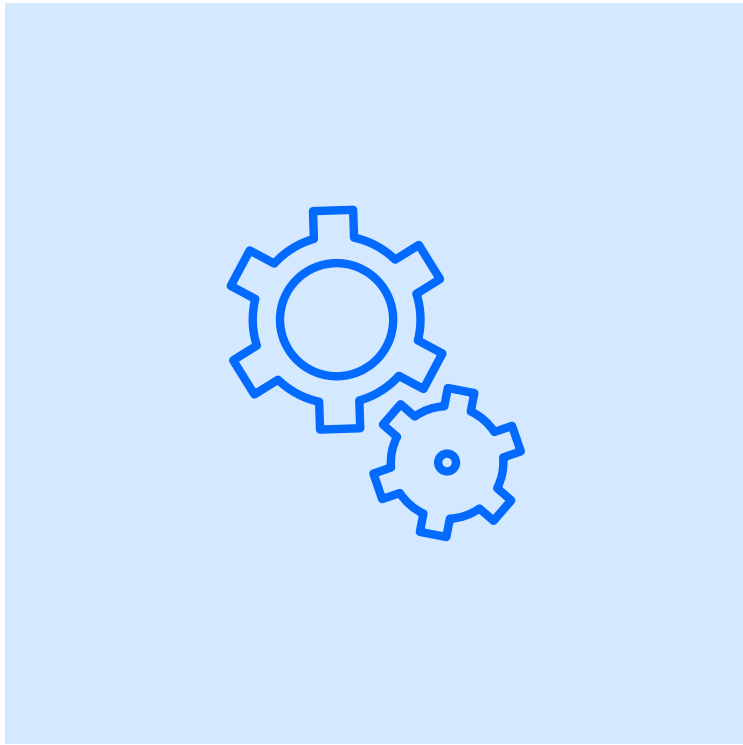

(3) Chat

(4) Lithium Battery

(5) Innovation

(6) Synergy

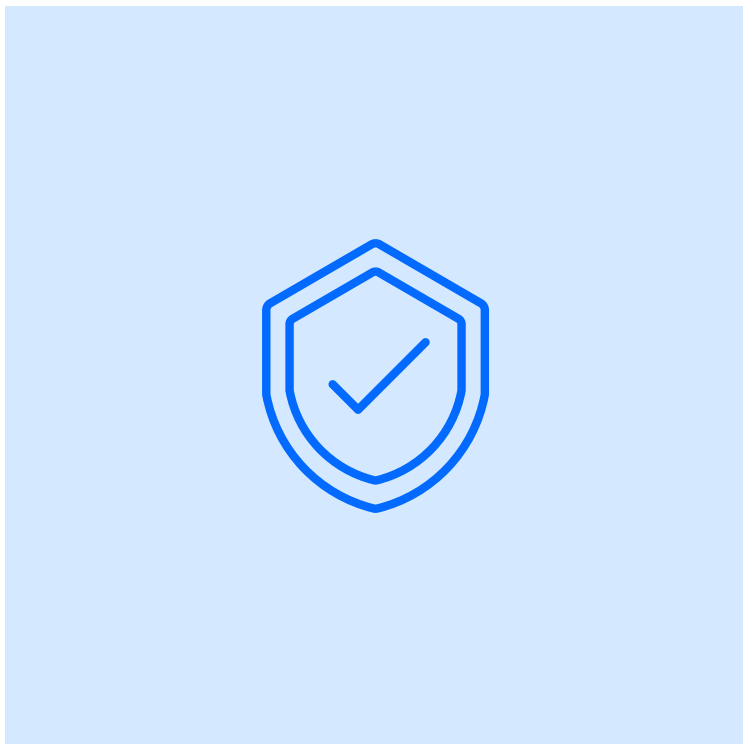

(7) Technology

(8) Sustainability

(9) Growth

(10) Policies

(11) Location

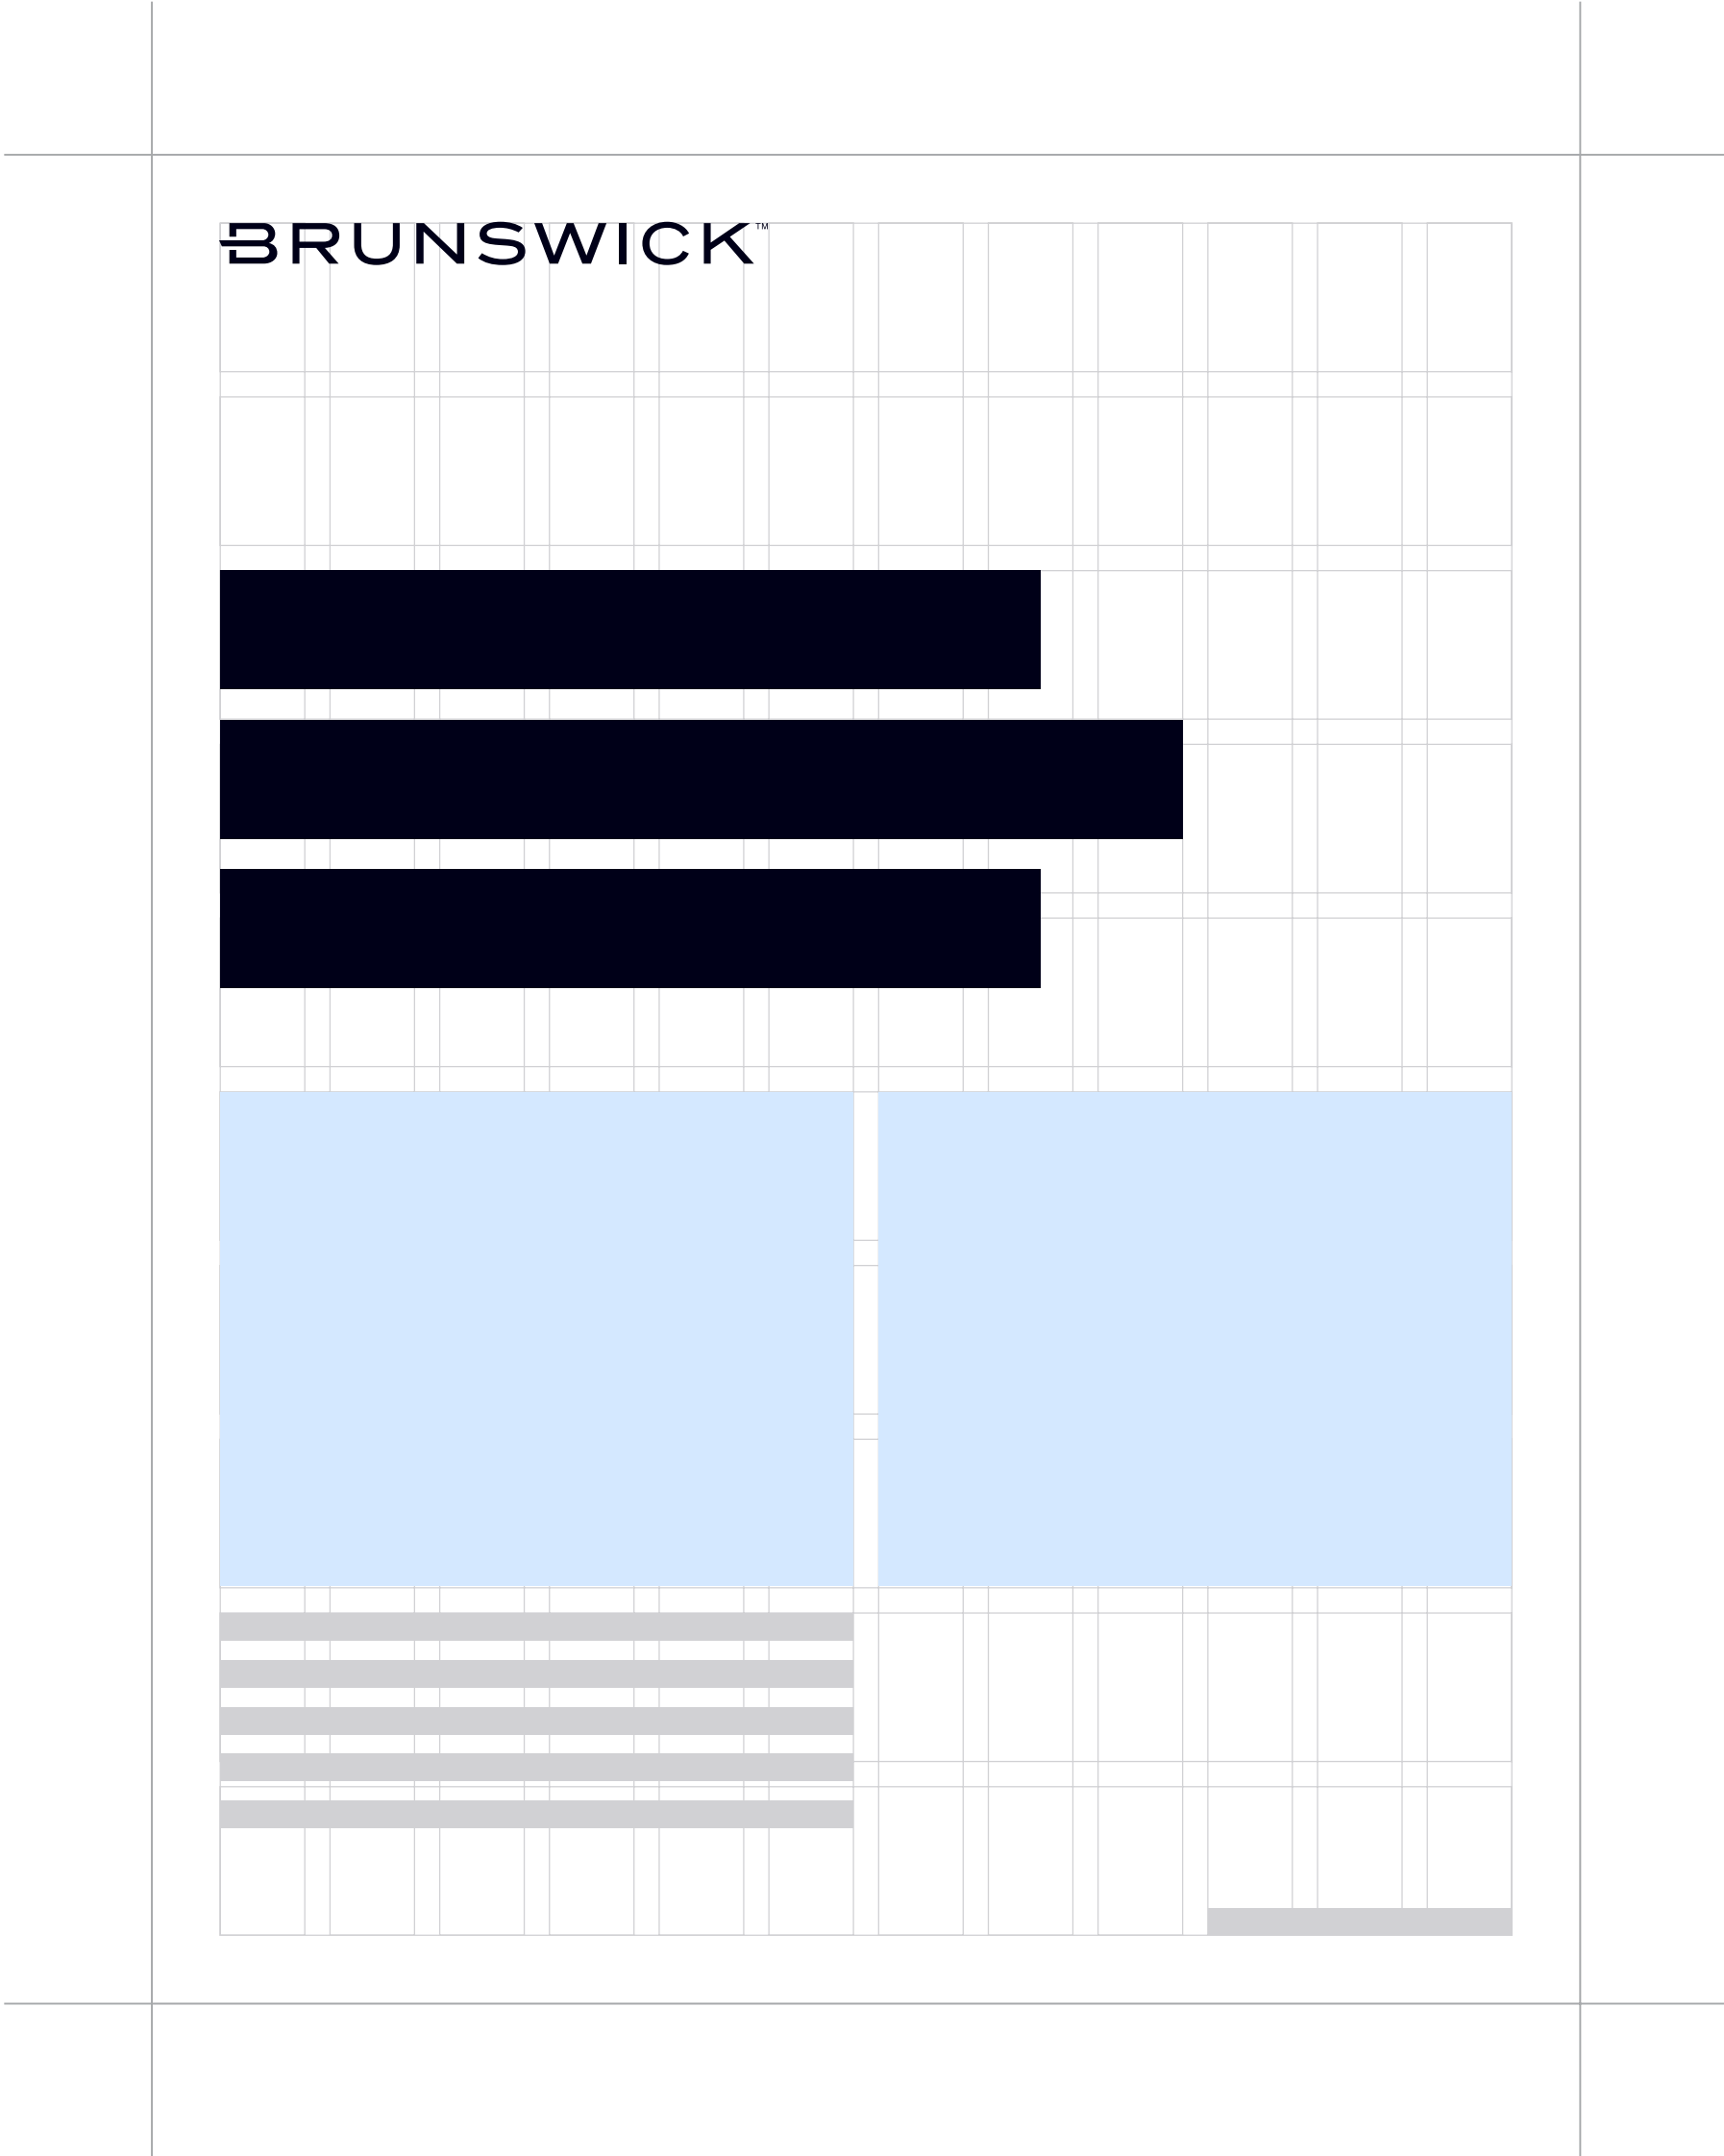

(12) Community

2.6 — Grid & Composition

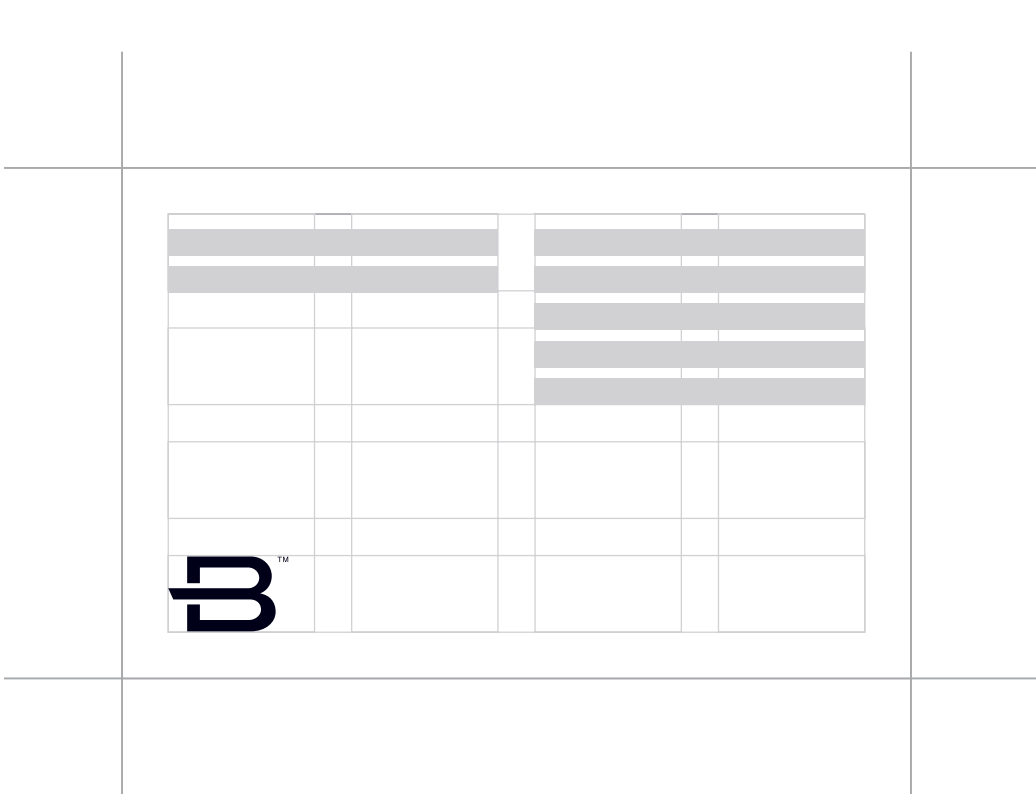

Layout Construction

When you're creating a design, a good place to start is with a twelve column grid. This column system provides structure and guidance for multiple brand applications.

Small formats, such as digital ads or business cards, will drop down to a six or four-column grid, where necessary. If it's starting to feel too complex, don't overthink it. Just give things space so they can breathe.

12 Column grid example

4 Column grid example

Layout Considerations

Achieving a successful layout starts with essential content strategy. This way it informs us how to best create an essential layout or composition. For our layouts we should provide the user only with both the most vital and digestible content in an organized fashion that helps establish hierarchy and creates a meaningful experience.

Informational and Essential

Elevates clarity of the information to achieve understanding above everything else.

Expressive and Clean

Elevates our editorial approach to design using photography, Energy Currents or negative space as a recursive narrative tool for dynamism.

Informational and Essential Example

Expressive and Clean Example

3.0 — Photography Style

Overview

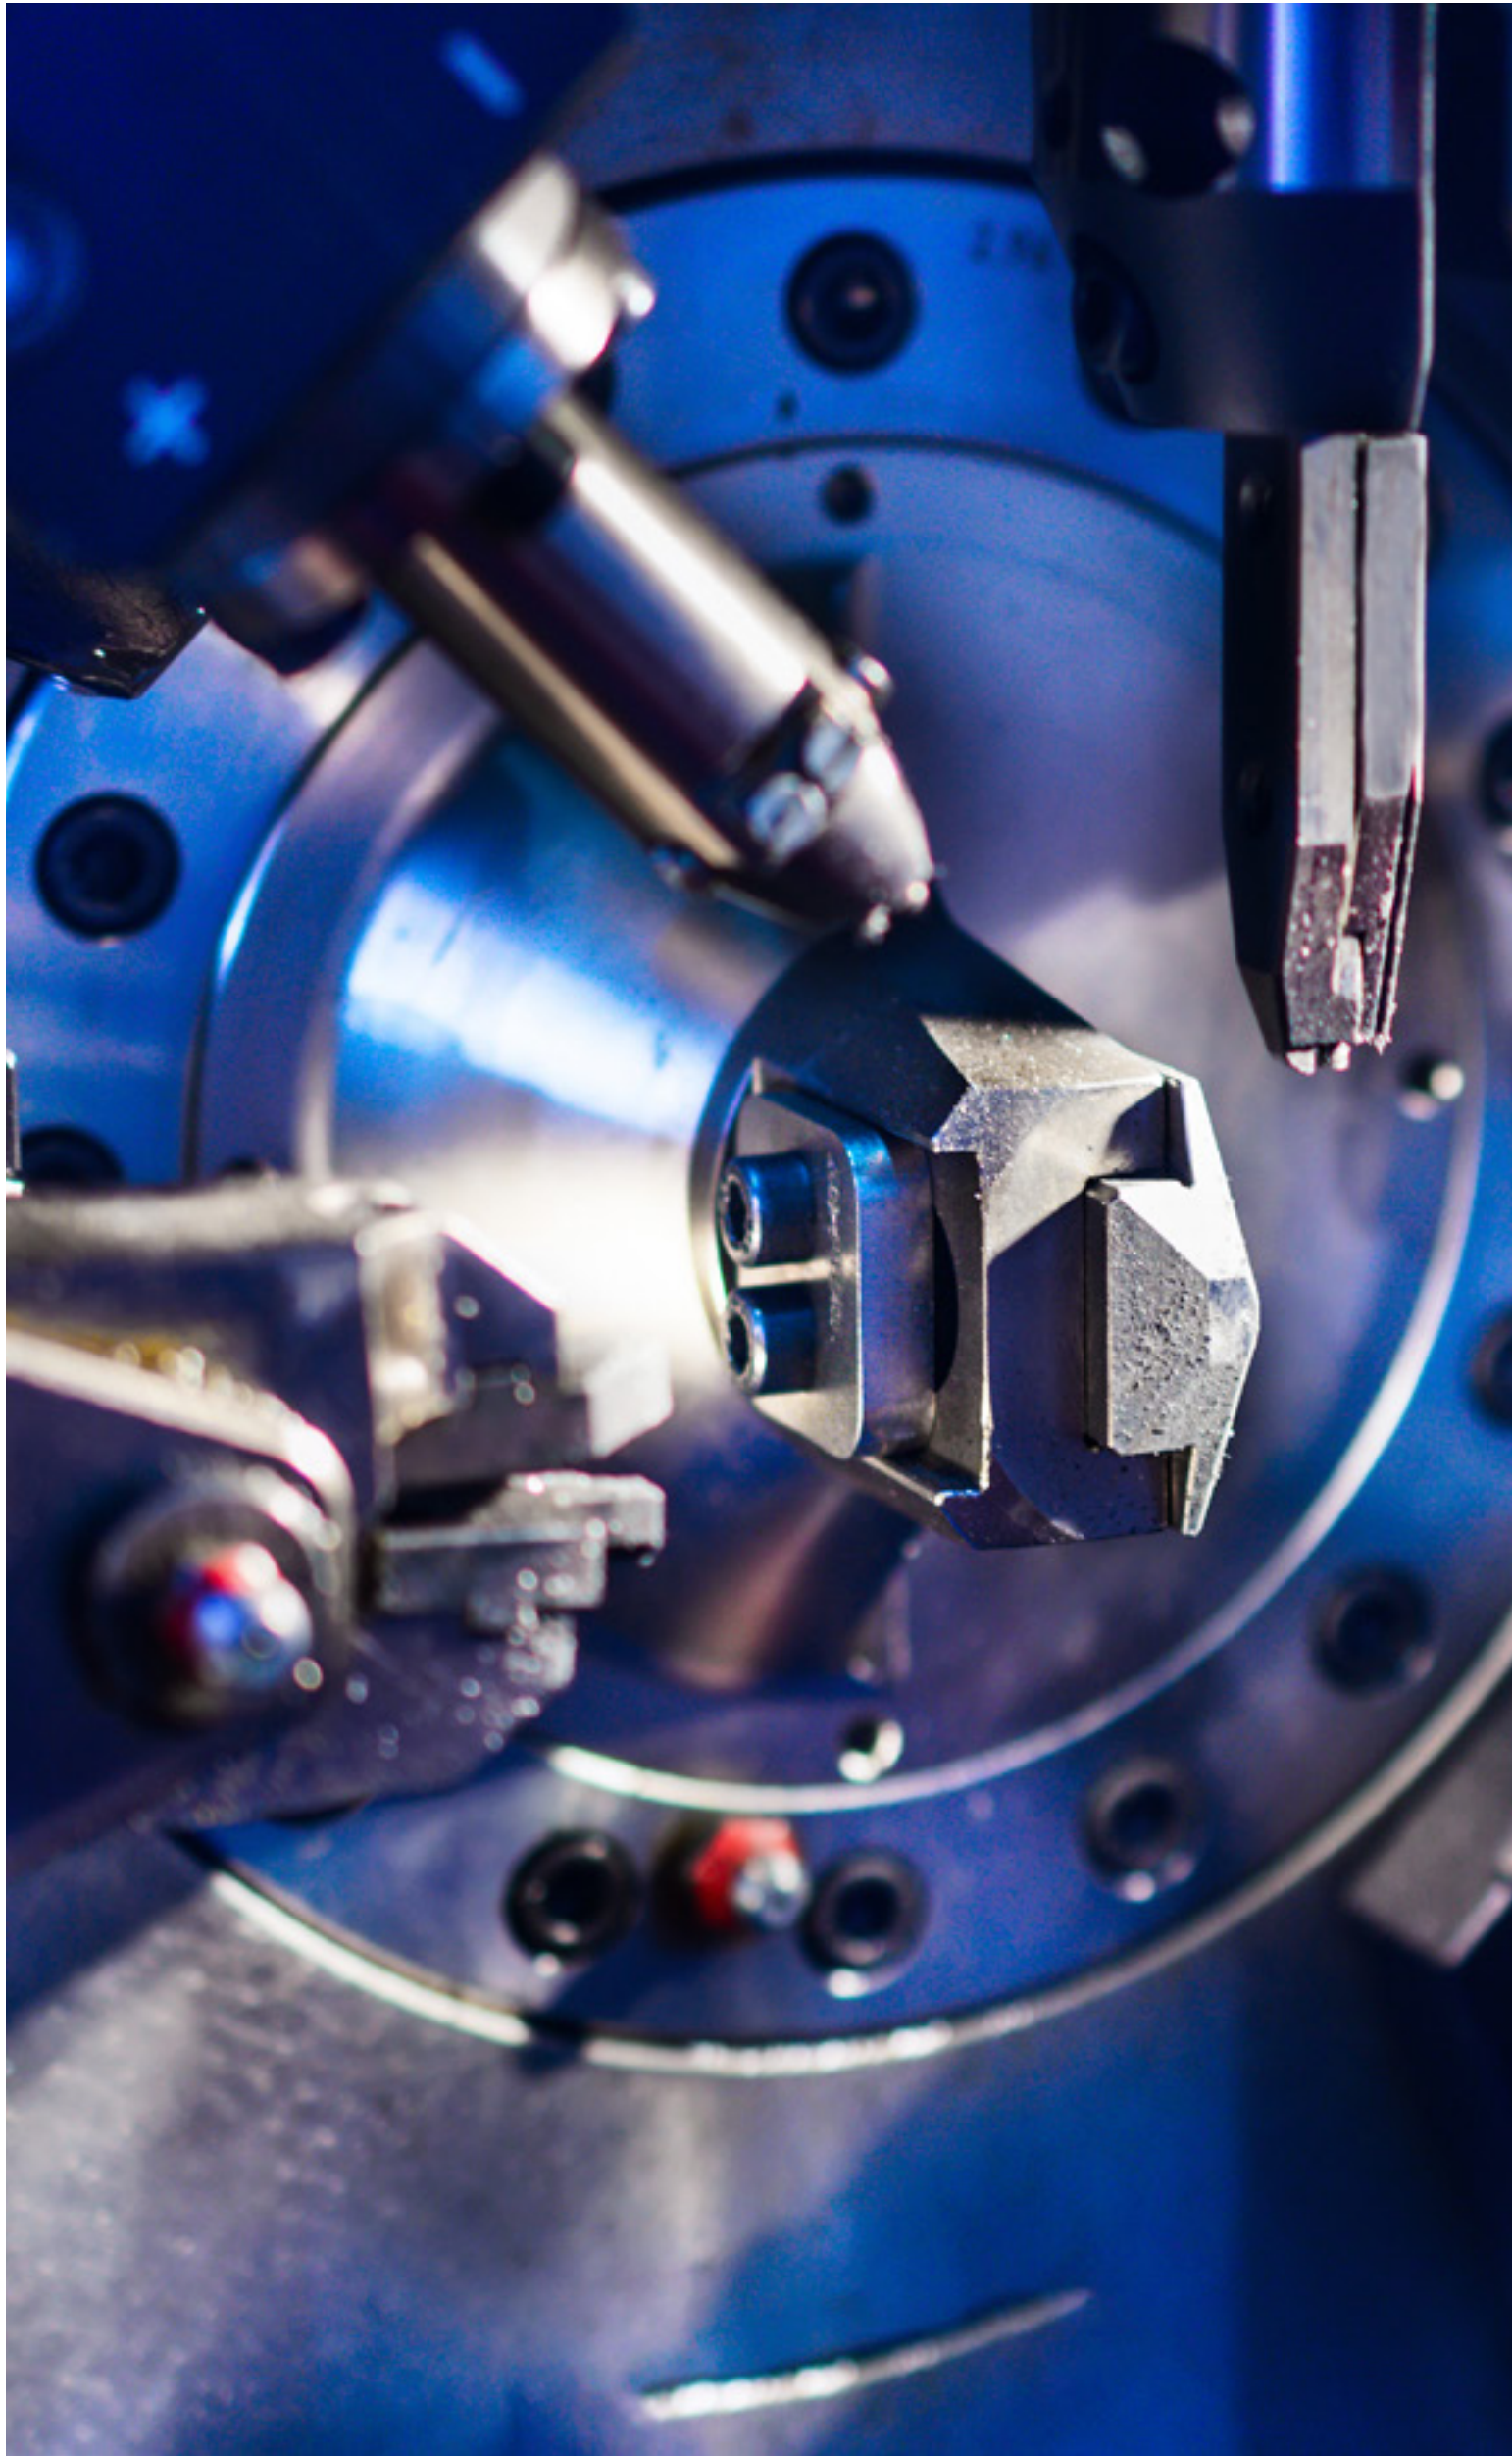

Our photography style plays a vital role in differentiating our brand and telling the Brunswick story in a genuine and compelling way. The photography covers a wide array of subject matter, representing the breadth of our brand as well as our agility and brand values.

Our photography includes focus on these areas.

- (1) Innovation Untethered
- (2) Human Centered
- (3) Forward Thinking

Note:

All photography contained in these guidelines is for reference only and may not be used outside of this document.

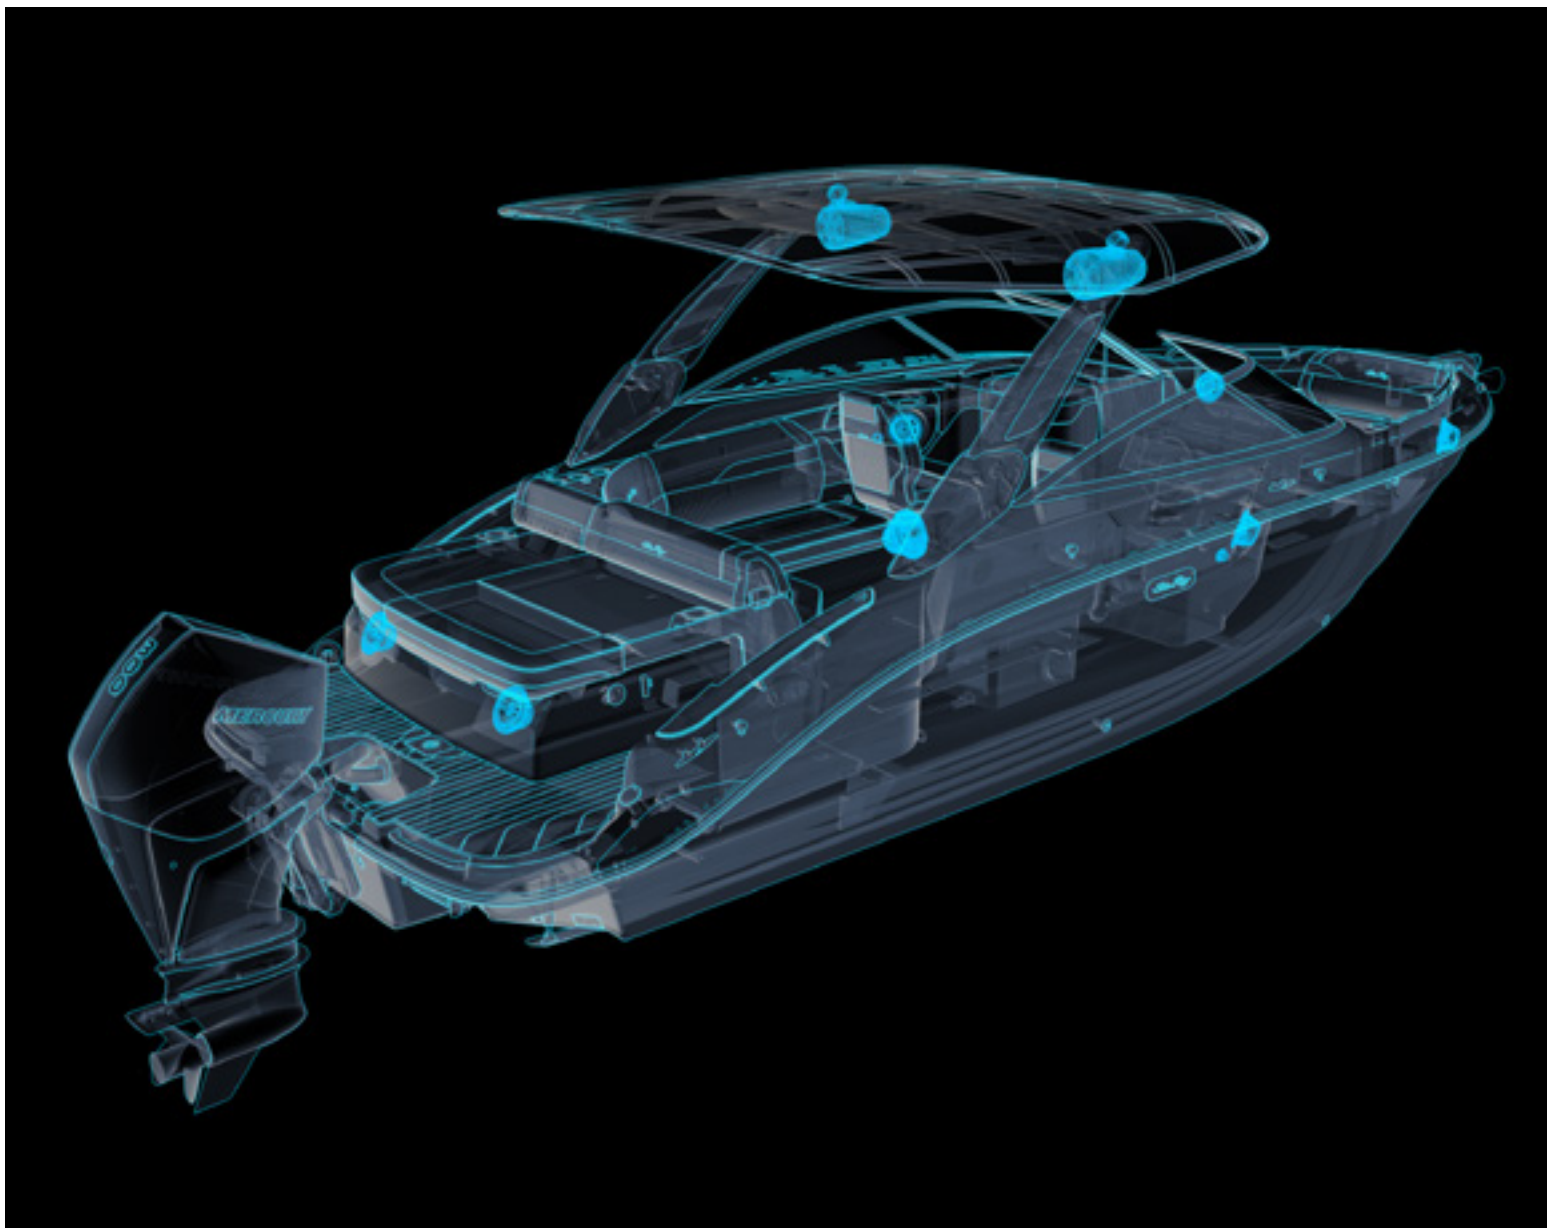

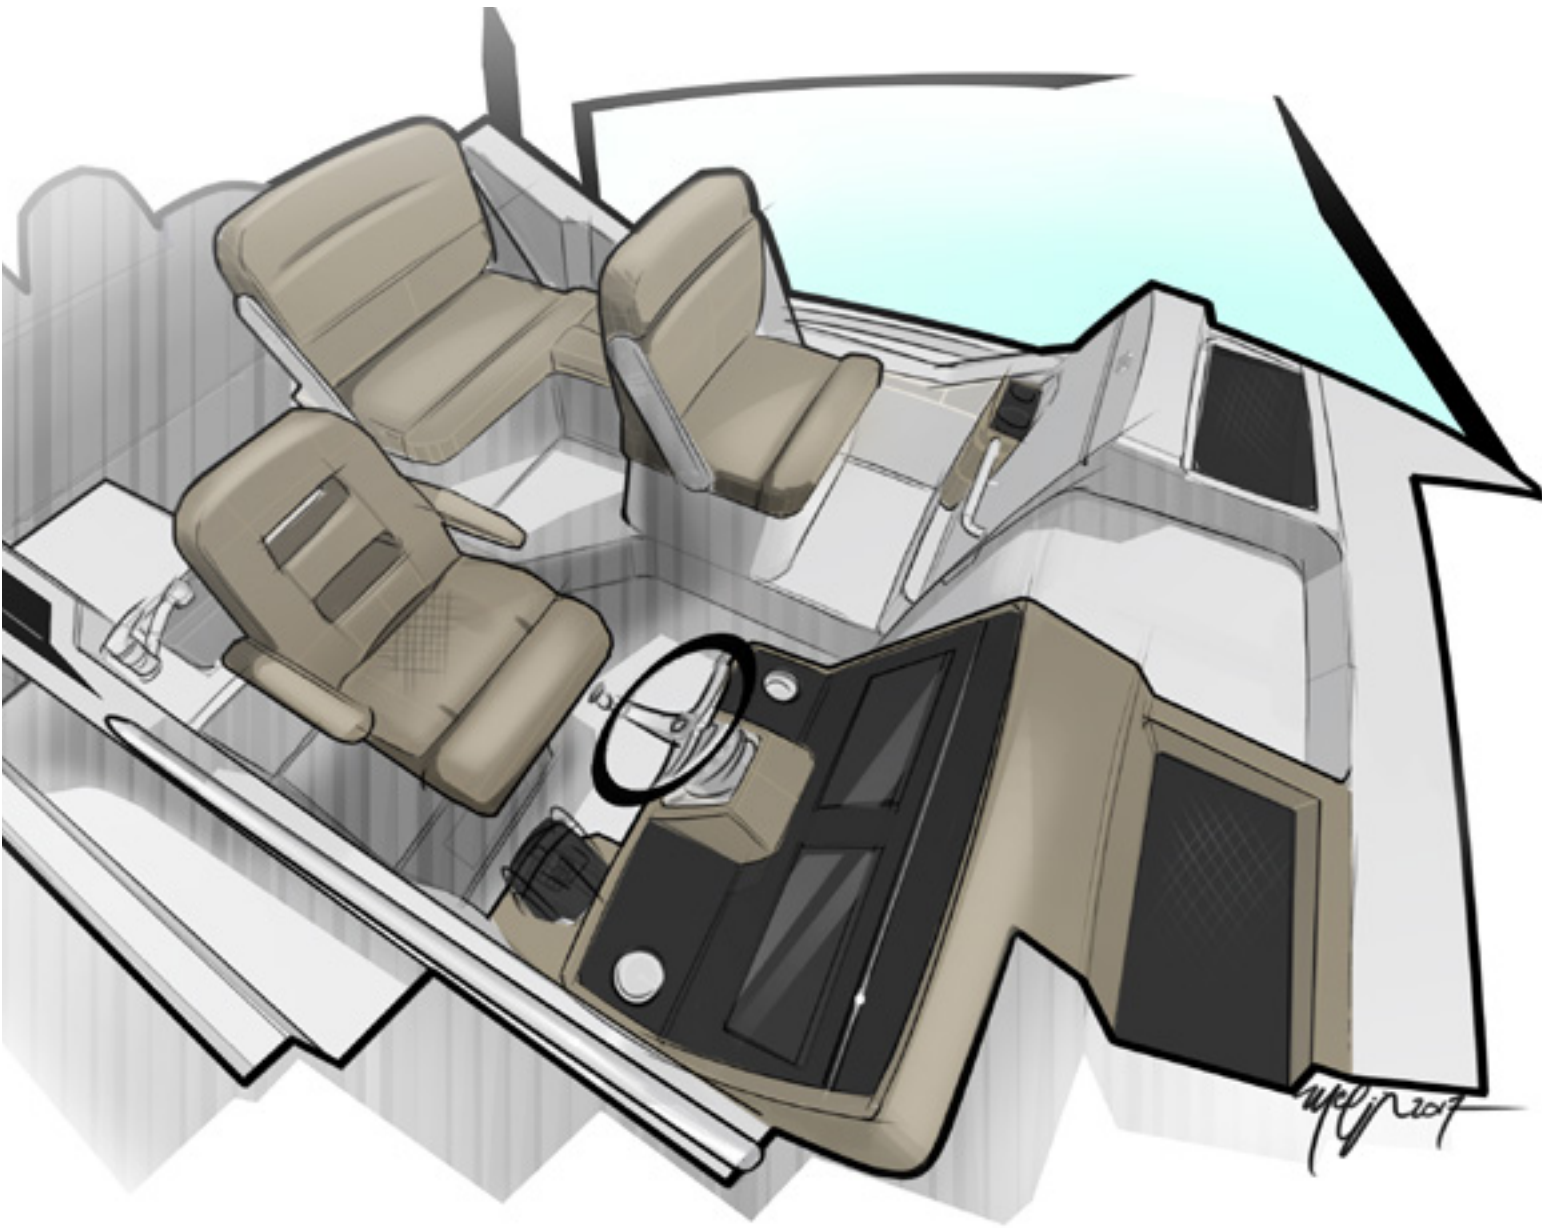

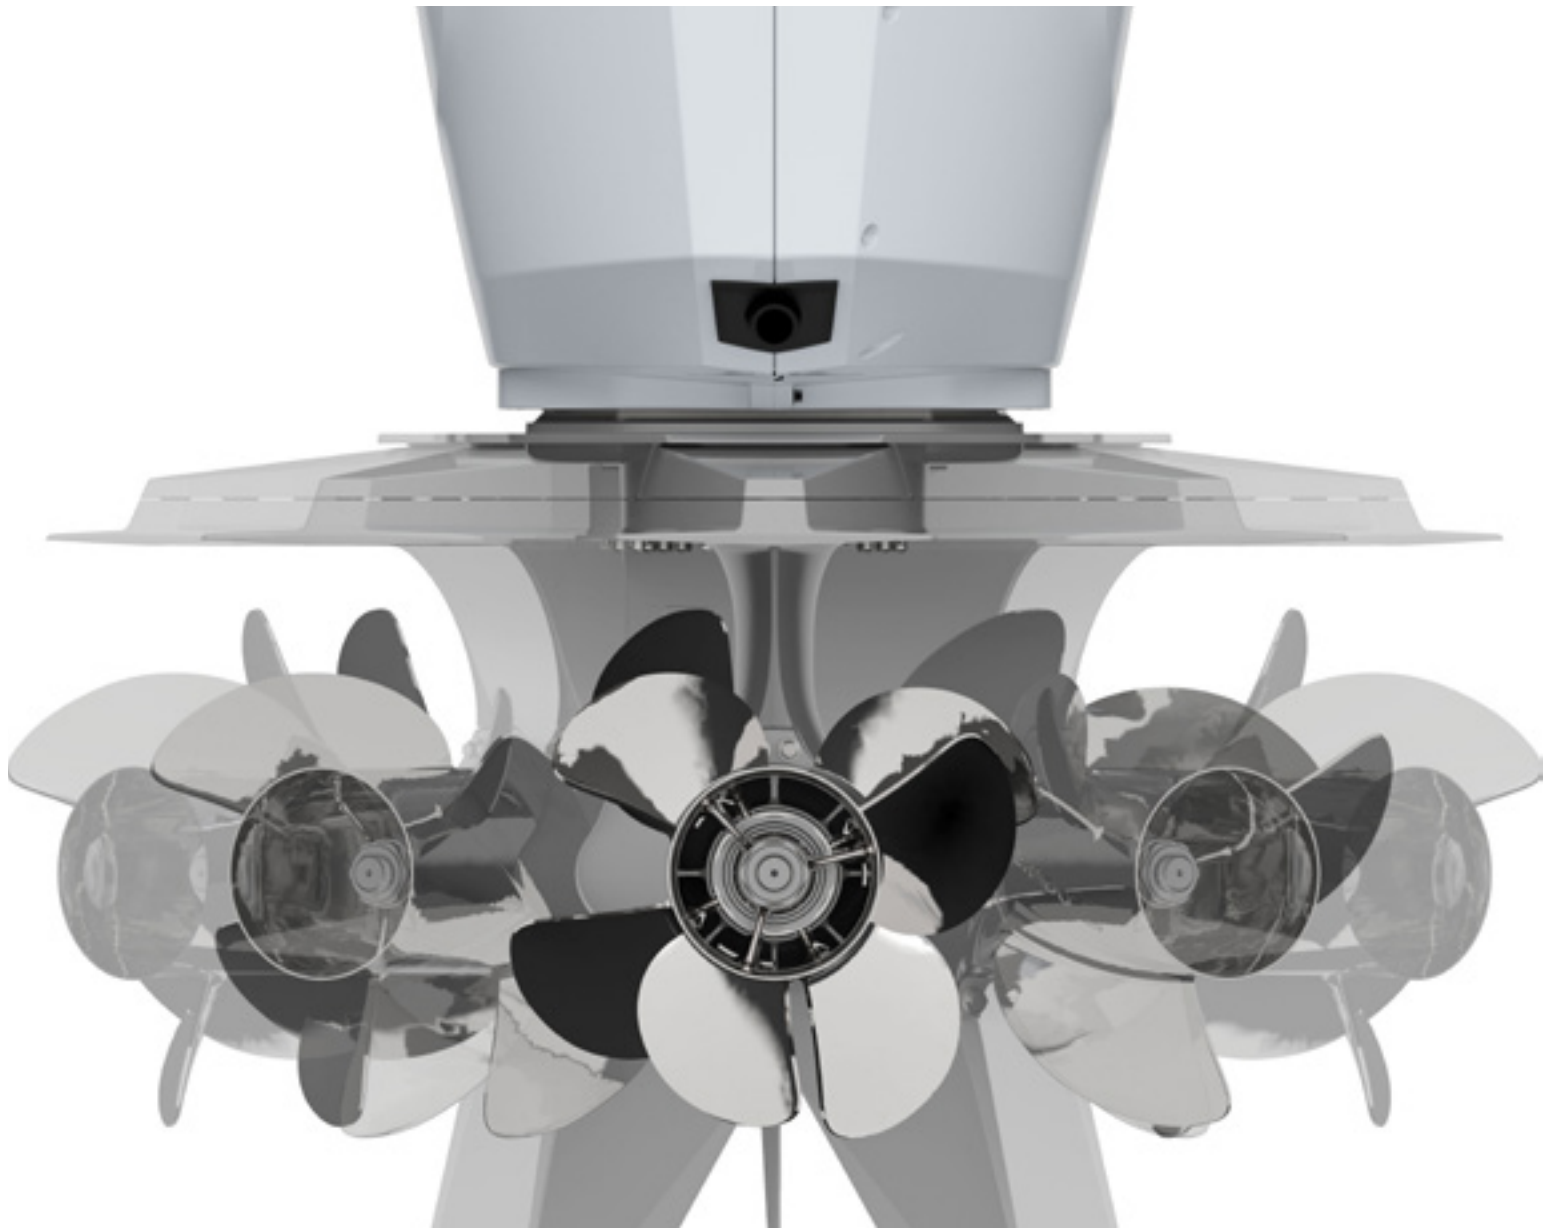

3.1— Innovation Untethered

Technology – Product Diagram for Detailed Explanation

This photography style highlights our technology and its construction with product diagrams for detailed explanation. This photo treatment reinforces Brunswick’s core by aesthetically showcasing the essence and constant innovation.

Key Points

4.0 — Video Guidelines

Content Capture Guidelines

Capturing video content that supports our storytelling objectives is an important part of bringing our brand to life. Here are some guidelines for determining whether a piece of footage meets our standards.

Boat Footage

To showcase a boat’s prowess, capture dynamic shots with unique angles that accentuate its design language. The following graphic principles should serve as guiding principles in the content capture:

- Use warm, directional lighting as a default.
- It is acceptable to experiment with cooler temperatures or gray skies for variety.
- Filming shot use:
 - Extra-wide for freedom
 - Medium for speed and precision
 - Tight for power and craftsmanship
- Mix frame rates to add drama and flexibility to the edit. Keep photography principles in mind.

Lifestyle Footage

Create cinematic and natural footage by capturing people candidly with and without humor. Capture dynamic and organic movement to maintain authenticity and fluidity. Include close-up intimate and wide cinematic shots for a variety in shot selection and to showcase the surrounding environment. This creates immersion and authenticity, engaging the viewer for a powerful final product.

In-Office & At-Factory Footage

Prioritize safety and employee privacy when capturing video in corporate offices/factories. Obtain permits/permissions and inform personnel of shoot purpose before any filming begins. Film from various angles to showcase the work being done and the working environment. Ensure sufficient lighting and clear audio quality. Wear proper PPE and adhere to all safety guidelines in factory settings. Avoid obstructing workflows and respect the workers’ time and job functions. Be mindful of confidential/sensitive information in footage and prevent it from being shared in the final product.

Corporate Interviews

Use at least two cameras to provide multiple angles and ensure opportunity for editing freedom. When setting up cameras, position one to capture a wide shot of the interviewee and their surroundings, and the other to capture a medium or close-up shot of their face. Lighting should be warm, directional and evenly distributed to avoid harsh shadows or glare. Use a high-quality microphone to ensure clear and crisp audio and be mindful of any background noise or distractions that could interfere with the recording. Whenever appropriate, prioritize capturing natural and authentic responses from the interviewee by allowing them to speak freely and asking open-ended questions.

Visual and Audio Guidelines

Setting the right tone in pre- or post-production is a key part of producing quality content. Here are some guidelines for both staging and editing brand-appropriate video selects.

Lighting

For outdoor, shoot video is when the sun is low in the sky. The soft and warm light in the morning or late afternoon is perfect for creating beautiful imagery. The harsh midday light, however, can be useful for shooting underwater footage, as it provides bright illumination. For indoor, light with warm colors avoiding studio-like lighting.

When shooting boats on the water, Brunswick uses these guidelines to define when specific shots are taken:

- Soft, warm morning or late afternoon lighting: ideal for capturing beautiful imagery of the boat and environment
- Harsher midday light: useful when shooting underwater as the light permeates deeper

When shooting indoors, use a subtle, cool blue lighting.

Image Stabilization

Capture smooth footage while filming on a moving boat by utilizing a gimbal stabilizer to steady the camera and eliminate unwanted movement.

Video Length

Consider your audience and the platform where the video will be posted when deciding on its duration. Take into account the average attention span of your viewers and aim to keep your content focused and captivating.

Color

The aesthetic approach to color and lighting we use for photography should be replicated in video.

Music

When selecting music for the finished video, leverage the defined Brunswick playlist tracks within the Universal Production Music library. Tracks should be futuristic and tech-inspired.

Video Graphics

Package — Graphic Use

Brunswick has a branding package available for use in all corporate video productions, containing the following elements:

- Logo Open (16:9 and 9:16 aspect ratios)
- Transition Tether
- Simple Lower Third Template
- Simple Art Card Template (title card)
- Tether Lower Third Template
- Tether Art Card Template (title card)

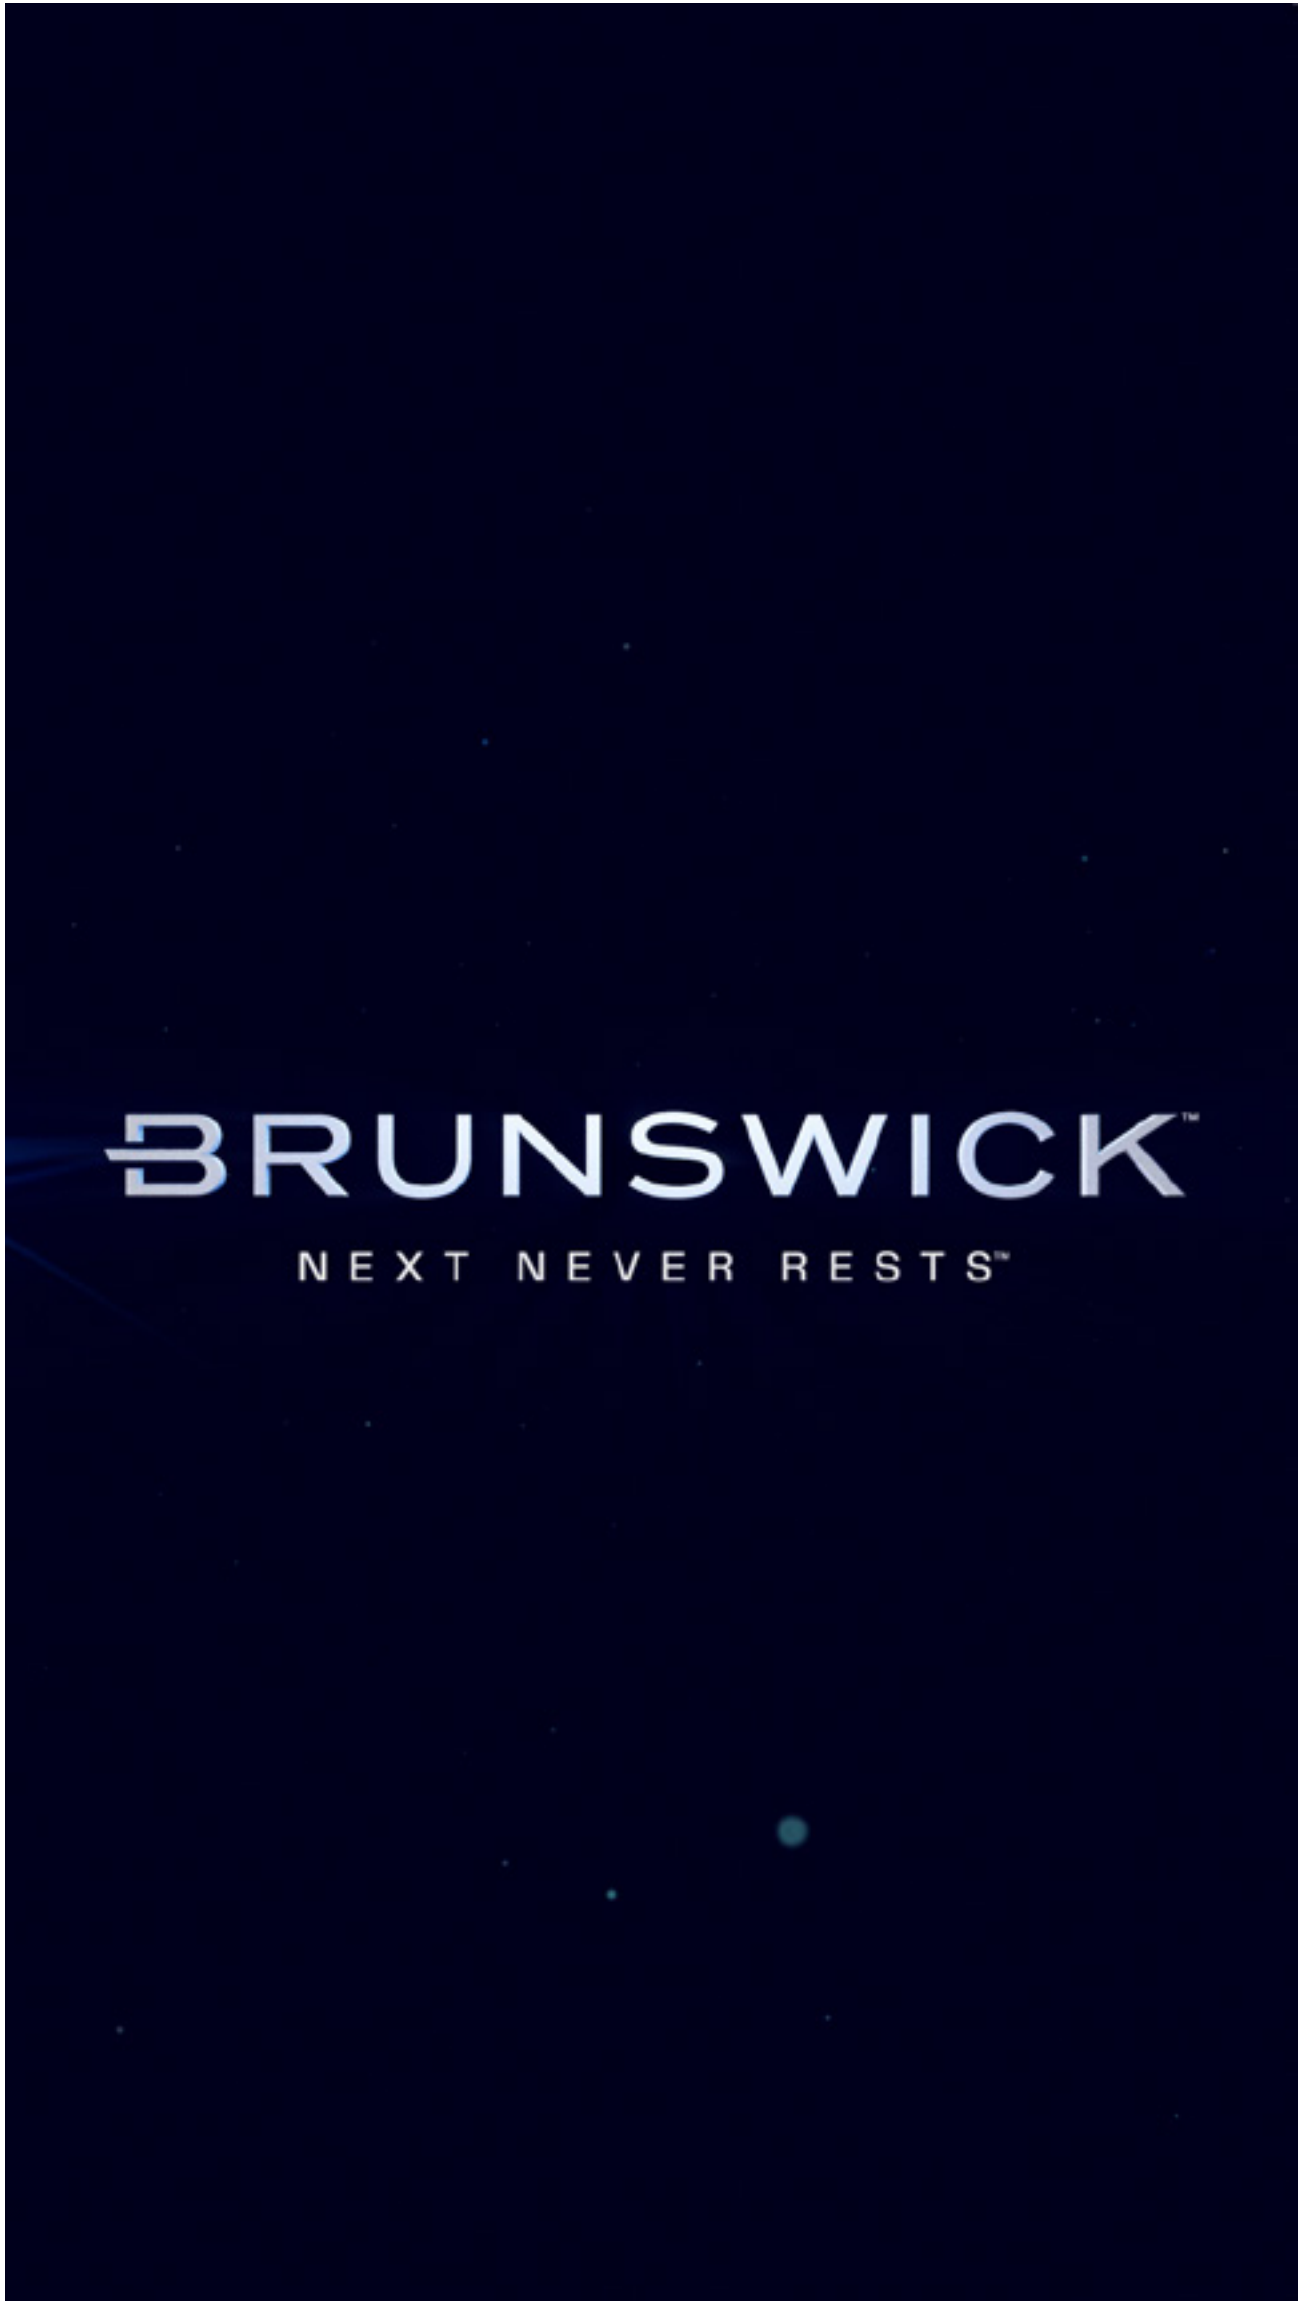

Video Graphics Package — Opening and Closing

Guidance: All videos can be either opened or closed with *Logo Open*.

Note:

The Graphics Package can be found here:

Comparison Charts

Comparison charts compare data between multiple distinct categories. Whenever possible, keep it to minimum use of brand colors. Tap into Brunswick's accent colors for more extensive charts and to highlight specific data, using opacity to create more tones if necessary.

Highlight Data

There are many ways to express data without the use of complex graphics. Highlighting key figures with Telegraph headline font and following them with captions/descriptions with EB Garamond makes it a readable and elegant way to format dense data.

Part to Whole Chart

Part-to-whole charts show how partial elements add up to a total. Highlight numbers and key data with Telegraph headline font and use EB Garamond body font for annotations and descriptions.

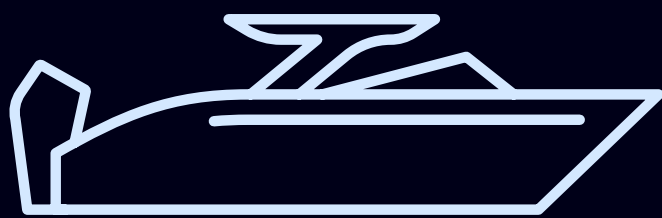

Info with Icons

Icons, such as those presented in Chapter 2.5, may be used to highlight information or data. The theme of the icon should correspond to the data.

When developing icons, look for the most direct way to make the audience understand what you want them to feel and know. Follow the Brunswick Iconography guide to create simple, monotone outlined shapes and lines to communicate effectively.
